Subject: Northampton Gateway Rail Freight Interchange Project- Non material changeTR05006
Date: 24 September 2022 10:08:29

Dear Sirs

I am writing to express my opposition to the amendment proposed by SERGO.

I feel this is a material change to the original planning application and it is an excuse by the developers just simply to build warehousing. It is a travesty that the development has been allowed at but the amendment would mean acres of warehousing causing noise pollution. The infrastructure particularly around Blisworth village is not robust enough to take the heavy transport.. Lorries in the village will ENDANGER THE CONVERSATION AREA IN BLISWORTH. The thatched stone properties will be damaged by the traffic and this can not be allowed. The increase in traffic will endanger the lives of children in the village. I consider any traffic surveys to be out of date. If a rail interchange is not operating it will significantly affect traffic and this can not happen. The roads around Blisworth are already busy and congested at busy times and any further development on the NGRF site will be severely damaging
