Hello

Please take the below as an objection to the terminal being built, I am an interested party.

I want to again reiterate the negative impact the rail freight terminal would have on Hinckley and the surrounding areas as well as mine and my children's life quality should it be built.

Burbage common was left to the Hinckley area as a common land which is surrounding fields to allow for local people to relax and enjoy the land. With the building of a freight terminal on this land and next to the common land, it will destroy the nature, landscape and beauty. Replacing it with noise, pollution, traffic and chaos. I am 5 mins from this grotesque proposal and can hear the trains already so no doubt I will hear the noise and chaos, not to mention have to deal with the pollution! It is too near to people's homes and businesses, one such business woodhouse farm would have to sell up and close their farm. This is outrageous and a disgrace. Those poor people will lose their livelihood after being there for over 20 years!

I often visit the common with the family and we love the quiet peaceful environment.

I have driven down burbage common road this evening also and came across 2 foxes, many rabbits and a wild muntjack deer. This was the road next to the railway line where you propose to build!

All of these animals would be forced out of their natural habitat if you choose to build this terminal here. Destroying the UK.

Can I also ask why it is proposed to be built here which is so close to rugby dirt? This is 25-30 mins away so why do we need another so close by!

There are better locations away from towns and villages in the middle of nowhere, this is near homes and business and would cause more harm than good. Hinckley folk don't struggle for employment, they can access magna park and further afield for jobs if needed. So saying it would boost employment is incorrect.

This would ruin my home town and destroy the habitat for the many animals. I can't let you do that, I love my home too much to let you do this. You need to listen to the local people and their views. It's a recipe for disaster.

Rachel Wareham
