1 Introduction

1.1.1 This appraisal has been carried out to set out a scope of assessment for heritage assets that may be affected as a result of change to setting as a result of the construction, operation and decommissioning of the proposed Hampshire Water Transfer and Water Recycling Project (hereafter referred to as the ‘Proposed Development’). This responds to the request at ID 3.2.9 of the adopted Environmental Impact Assessment (EIA) Scoping Opinion [1] that the Environmental Statement (ES);

‘...explain how these designated assets were identified with reference to information obtained by site walkover, setting assessment, and Zone of Theoretical Visibility (ZTV).’

1.1.2 This appraisal has been carried out to fulfil the requirements of Step 1 of the methodology set out in the Historic Environment Good Practice Advice in Planning: 3 (GPA3) [2]. This step is defined as:

1. Step 1: Identify which heritage assets and their settings are affected.

1.1.3 This appraisal therefore identifies those heritage assets which have the potential to be affected by construction, operation and decommissioning of the Proposed Development. These heritage assets will be taken forward for detailed assessment within the Preliminary Environmental Information (PEI) Report and subsequent ES.

1.1.4 The assessment in the PEI Report (PEI Report Chapter 7 Archaeology and cultural heritage, Volume I) and subsequent ES will address the requirements of Steps 2, 3, 4 of the GPA3 process, which are:

1. Step 2: Assess the degree to which these settings make a contribution to the significance of the heritage asset(s) or allow significance to be appreciated.

2. Step 3: Assess the effects of the Proposed Development, whether beneficial or harmful, on that significance or on the ability to appreciate it.

3. Step 4: Explore ways to maximise enhancement and avoid or minimise harm.

1.1.5 The final step relates primarily to decision-making and monitoring of outcomes following any consent decision and is:

1. Step 5: Make and document the decision and monitor outcomes.

2 Methodology

- 2.1.1 GPA3 sets out that it is appropriate to agree an ‘area of search’ around the Proposed Development within which it is reasonable to consider setting effects. This is reflected in the commitment in the EIA Scoping Report [3] to consider all designated and non-designated heritage assets (NDHA) in a study area defined as 500m from the draft Order Limits, and designated heritage assets within 1km of the draft Order Limits or within 3km of the proposed Above Ground Plant (AGP) locations to identify whether an affect may arise. In response to ID 3.2.9 of the adopted EIA Scoping Opinion [1], a review of designated heritage assets outwith this study area has been undertaken and no heritage assets that are potentially subject to an adverse effect arising through change to setting have been identified.
- 2.1.2 GPA3 further advises the applicant to consider approaches such as site visits, a ZTV and viewpoints in relation to the Proposed Development in order to better identify heritage assets and settings that may be affected. At this point in time this approach has been used with reference to site visits undertaken in November 2023, the ZTV contained within the landscape and visual chapter of the EIA Scoping Report (Chapter 13) to assist the identification of potentially affected heritage assets within the identified areas of search by reviewing provisional viewpoint locations identified within that chapter to enable early engagement. This report will be updated with the latest ZTV which is currently being produced for this PEI report for the submission at the Summer 2024 Consultation. A number of the provisional viewpoint locations have been identified as providing viewpoints of those heritage assets where further visualisations may be helpful to support this assessment. These are identified at Table 4-1.
- 2.1.3 As setting relates to the perceptual environment in which a heritage asset is experienced, this assessment takes account of all and any perceptual change within that environment. These are primarily:
1. Visual change resulting from visibility of works or elements of the Proposed Development within the setting of the asset; this visibility may be in views of or from the heritage asset, or from other parts of the setting where visibility would cause the viewer to experience the asset differently as a consequence of that view.
 2. Change to the sound environment of a heritage asset.
 3. Change to the character of the historic landscape or townscape context of a heritage asset.
 4. Change of use or access to a heritage asset¹.
 5. Change to other sensory aspects of setting (e.g. odour, vibration, lighting).
- 2.1.4 Clearly, different heritage assets and classes of heritage assets will have different characteristics of setting and will be sensitive to different types of change. This aspect of setting is considered more fully in Step 2 of the GPA3 methodology and is discussed in the narrative assessment set out in section 7.8 of PEI Report Chapter 7 Archaeology and cultural heritage in Volume I.

¹ While guidance is clear that access to or use of a heritage asset is not required for that heritage asset to be considered as having a setting, the means and routes of access to a heritage asset can be fundamental to the viewer's experience of that asset.

- 2.1.5 Table 4-1 sets out a list of all of the heritage assets considered within the agreed scope, noting the potential for an effect to arise as a result of the construction, operation or decommissioning of an identified element of the Proposed Development.
- 2.1.6 Those heritage assets which are within 1km of the Eastney Transfer Tunnel and Eastney Long Sea Outfall but are not otherwise located within the relevant study area have not been considered further, in line with The Planning Inspectorate comment at ID 3.2.3 of the adopted EIA Scoping Opinion [1]. This decision to scope out these heritage assets will be reviewed further as design proposals and operational arrangements emerge.
- 2.1.7 Perceptible elements of the Proposed Development that have the potential to give rise to harm as a result of change to setting comprise:
1. Construction of the proposed Pipeline, primarily through visible or audible change - any effects arising from construction would reduce on completion of construction works and would be reversible through restoration of the site to its previous condition.
 2. Construction of proposed shafts – again, any change would reduce on completion of construction works and would in most cases be reversible through restoration of the site to its previous condition.
 3. Proposed AGP comprising proposed Intermediate Pumping Stations (IPS) and proposed Break Pressure Tanks (BPT) which would present potential change during construction and operation as retained infrastructure.
 4. Proposed Water Recycling Plant (WRP) and proposed High Lift Pumping Station (HLPS) which would present potential change during construction and operation as retained infrastructure.
 5. Proposed Washout Valve(s) and proposed Air Valve(s) would be provided along the route to allow for drainage and ventilation of sections of proposed Pipeline during commissioning and operation – these would be seen as part of the construction programme and are not considered likely to be sufficiently perceptible to give rise to change to setting. Proposed Washout Valve(s) may result in occasional releases of water leading to localised ponding of released water for short periods.

3 Summary of baseline environment

- 3.1.1 The historic landscape of the study area reflects a long history of agricultural use from the medieval period onwards, with a regionally distinctive pattern of fields within the valleys of the Rivers Ems, Wallington, Meon, Hamble and Itchen, based on a mixture of arable and pastoral agriculture, water meadows and parkland, including areas of medieval deer parks and fishponds as well as ornamental landscape parks; well preserved examples of these features are preserved as designated heritage assets.
- 3.1.2 There are areas of larger fields on the north facing slopes of Portsdown Hill, which were partially cleared to afford fields of fire to the Palmerston Forts, built to protect Portsmouth from the landward during the 19th century, and areas of more recent urban and suburban growth around Havant, but in general, settlements within the study area comprise villages and smaller towns that were established in the medieval period and reflect the settled settlement geography of the region, with the principal change over time being the expansion (and in some cases contraction) of these settlements around their medieval cores.
- 3.1.3 Some medieval buildings survive, principally historic parish churches, but the majority of listed buildings date from the post-medieval period, with some notable Victorian and modern structures, principally related to military activity and the defence of the strategic Solent ports from the Victorian period onwards.
- 3.1.4 Visibility in this landscape is variable. While in most cases, the landscape could be considered intimate, with longer views precluded by the relatively dense settlement and characteristic hedgerows and woodlands of the river valleys, some longer views are available, particularly to and from the north facing slopes of Portsdown Hill.

3.2 Heritage asset types

- 3.2.1 The types of heritage assets considered for inclusion within the scope of this assessment, as shown on ES Appendix 7.6 Figure 1 Study area, Volume III (Document reference 6.3, DCO Volume 6), are:
1. All terrestrial designated heritage assets:
 - a. Listed Buildings
 - b. Scheduled Monuments
 - c. Registered Parks and Gardens
 - d. Conservation Areas
 - e. There are no Designated Battlefields or World Heritage Sites within the agreed study area.
 2. Historic Buildings identified in the Winchester and Hampshire Historic Environment Records (HER).
 - a. Buildings identified as contributing to the character of conservation areas that are not otherwise identified will be discussed in the narrative assessment of those conservation areas as appropriate.

3. Historic parkland identified in the Winchester and Hampshire HER.
 - b. Former deer parks identified in the Winchester HER and water meadows identified in the Hampshire HER do not survive in a sufficiently coherent manner to consider in terms of setting but are assessed in section 7.8 of the ES Chapter 7 Archaeology and cultural heritage, Volume I, in terms of their contribution to historic landscape character and as archaeological heritage assets and are shown on ES Figure 7.2 Non-designated heritage assets within the study area, Volume III (Document reference 6.3, DCO Volume 6).
4. Non-designated archaeological remains that are wholly buried or otherwise not readily discernible have not been considered here but will be referenced where their presence is relevant to the assessment of a designated or NDHA within the scope set out above.

3.2.2 While not intended to be an exhaustive description, the majority of designated heritage assets within the study area fall into the classes set out below:

1. Parks and designed landscapes
 - a. These heritage assets are primarily of value of architectural and historic interest. While they represent discrete and carefully curated sites and as such their value is frequently independent of their wider setting, many incorporate longer views into the surrounding landscape, either as a feature of their overall design scheme or by incorporating and framing views towards specific structures or landscape features. These sites are also frequently perceived as tranquil places sensible to change in sound environments.
2. Military structures
 - a. These features are primarily of historical interest, though many incorporate significant elements of architectural design. They were generally constructed as elements of a wider tactical scheme and to control or surveil particular elements of the landscape and are frequently sensitive to visible change within those areas which has the potential to disrupt the viewers ability to visualise that tactical scheme.
3. Historic villages
 - a. These features tend to comprise a core of historic, frequently designated, residential and agricultural buildings and a church, with more recent development around that core in the case of larger structures. While these sites frequently have high levels of architectural and historic interest, the contribution of setting is principally derived from their near surroundings, with intervening structures and planting limiting longer views of and from these sites. However, some features, such as church towers, may be visible from longer distances, providing a focal point within wider views and change that challenges or obscures that prominence may be harmful.
4. Isolated farm buildings and houses
 - a. These features are generally of architectural and historic interest but tend not to derive significance from longer views, with the contribution of lands associated with or farmed from these locations being limited to those immediately adjacent as longer views are disrupted by more recent buildings and hedgerow planting, but in some cases longer views are

available and contribute to specific aspects of the historic interests of these structures.

4 Conclusions

4.1 Results of the appraisal

- 4.1.1 The results of the scoping appraisal are set out at Table 4-1. This has identified individual designated and NDHA that may be affected by the Proposed Development. These heritage assets have been grouped under the proposed Underground Pipeline between Havant Thicket Reservoir and Otterbourne Water Supply Works (WSW) sections and by those which are not within 1km of the scoping boundary but are within 3km of the proposed AGP. This report should be read in conjunction with the PEI Report Chapter 3 Description of the Proposed Development, Volume I.
- 4.1.2 Heritage assets are referenced by their National Heritage List for England (NHLE) or the relevant County HER reference number. Some listed buildings are also identified in County HERs. To avoid duplication in these instances, only the NHLE number is cited.
- 4.1.3 Only these heritage assets will be taken forward for further assessment; these have been highlighted in bold type in Table 4-1.
- 4.1.4 Table 4-1 also sets out the locations of viewpoints. Heritage-specific viewpoints are marked as 'Heritage', while heritage assets where Landscape and visual viewpoints are proposed that would provide an understanding of the likely worst case visual change form a heritage asset are noted as Landscape and Visual Impact Assessment (LVIA).
- 4.1.5 In general, the nature of the landscape and the settings of individual heritage assets mean that any effects would primarily be expected to arise in relatively close proximity to the heritage assets involved, although some heritage assets have settings that may be expected to be sensitive at longer distances.

4.2 Proposed scope of assessment

- 4.2.1 Groups of heritage assets that may be affected and have therefore been taken forwards for more detailed assessment are set out below.

Section A

- 4.2.2 Section A of the proposed Underground Pipeline is a relatively short section of construction which is contained within the Sir George Staunton Conservation Area. While this area is relatively well-screened by planting and modern development at the fringes of the parkland and does not lend itself to long-distance or panoramic views, the parkland itself is a highly valued heritage asset forming the setting for a number of structures and was designed to frame specific views across the landscape, making it sensitive to visual change. Similarly, the parkland contains a number of routes on which the viewer experiences a sequence of different character areas and change to this movement around the parkland may present adverse perceptual change.
- 4.2.3 Heritage assets within and associated with Leigh Park/Sir George Staunton Conservation Area, which would be affected primarily by change to parkland

character caused by perceptibility of proposed Pipeline construction works within the historic parkland comprise:

1. Sir George Staunton Conservation Area
2. Grade II* Registered Leigh Park (NHLE 1000112)
3. Grade II* listed The Staunton Memorial (NHLE 1303476)
4. Grade II listed Footbridge (NHLE 1339961)
5. Grade II listed Pathway (to the South of the Staunton Memorial) (NHLE 1092133)
6. Non-designated Icehouse at Leigh Park (NDHA 26737)
7. Non-designated The Fort, Staunton Country Park (NDHA 69792)

Section B:

4.2.4 Works within this section would primarily comprise tunnelling, which would leave little, if any surface trace of works, and effects would arise primarily where surface works were undertaken, and visible infrastructure constructed. Visibility towards the proposed WRP may also contribute to change to setting.

4.2.5 Heritage assets within and associated with the Old Bedhampton Conservation Area which would be affected by construction of the connection to Bedhampton Springs waterworks, potential visibility of the proposed WRP and visibility of retained infrastructure at Bedhampton Springs.

1. Old Bedhampton Conservation Area
2. Grade II listed Bidbury House (1154418)
3. Grade II listed Church of St Thomas (1340186)
4. Crossing Keeper's House (NDHA 23432)
5. Stable Block to Old Rectory (LB II 1303829)
6. The Old Mill House (LB II 1340188)
7. The Old Rectory (LB II 1091648)
8. Granary Building (NDHA 54954)

Section C:

4.2.6 This section is predominantly urban/suburban and is densely developed. It would be tunnelled and while visibility of the proposed WRP may be expected to contribute to adverse change to setting, no heritage assets have been identified in this area that would potentially be subject to adverse effects arising from change to setting.

Section D

4.2.7 This section is predominantly urban/suburban and is densely developed. It would be tunnelled, and no heritage assets have been identified in this area that would potentially be subject to adverse effects arising from change to setting other than Fort Purbook (LBII* 1092134, LBII* 1387127, SM 1001842), which may be affected during construction of a tunnel shaft in close proximity.

Section E

- 4.2.8 This section is on the lower north facing slopes of Portsdown Hill and is discernibly more open, with large fields cleared to create open fields of fire for the Palmerston Forts along the ridge of Portsdown Hill. Heritage assets in this area would primarily be subject to effects arising from perceptibility of construction of the proposed Underground Pipeline, although visibility of proposed BPT-E and releases may also contribute.
1. Grade II Buildings at Offwell Farm
 - Grade II listed Barn 20 metres east of Offwell Farmhouse (NHLE 1350291)
 - Grade II listed Offwell Farmhouse (NHLE 1167209)
 2. Grade I and II Listed Buildings at Boarhunt
 - Grade II listed Barn 20m West of Manor Farmhouse (NHLE 1095590)
 - Grade II listed Barn 35m West of Manor Farmhouse (NHLE 1350615)
 - Grade II listed Granary 20m South-West of Manor Farmhouse (NHLE 1095589)
 - Grade II listed Manor Farmhouse (NHLE 1350614)
 - Grade I listed Church of St Nicholas (NHLE 1350613)
 3. Broomfield Park
 - Grade II listed Broomfield House (NHLE 1096246)
 - Broomfield Park (Non-designated Park)
 4. Scheduled Monuments and listed buildings at the Palmerston Forts
 - a. Fort Nelson (Scheduled Monument NHLE 1001860 and Grade I listed building NHLE 1350616)
 - b. Fort Southwick (Scheduled Monument NHLE 1001808 and Grade I listed building 1167213/1104368), which is also on the national Heritage at Risk Register
 - c. Fort Widley (Scheduled Monument 1001862 and Grade II* listed building 1387128) which is also on the national Heritage at Risk Register
 5. Non-designated New Barns (MWC4328)
 6. Non-designated Pigeon House Farm (MWC4341)
 7. Grade II* listed The Nelson Monument (NHLE 1095592)
 8. Scheduled World War II Heavy Anti-Aircraft gunsite (P12) at Monument Farm (NHLE 1020960)

Section F

- 4.2.9 As with Section E, this section is also generally located low on the north facing slope of Portsdown Hill and is relatively open.
1. Grade II listed Boundary Oaks School Roche Court (NHLE 1233653)
 2. Non-designated Farm range at Albany Farm (50684)
 3. Non-designated Buildings at Whitedell Farm
 - a. Milking Parlour at Whitedell Farm (42506)
 - b. Whitedell Farmhouse (42505)

4. Buildings at North Fareham Farm
 - a. Grade II listed North Fareham Farmhouse (NHLE 1232921)
 - b. Non-designated Model Farm East of North Fareham Farmhouse (42496)
 - c. Non-designated Nos 1 and 2 North Fareham Farm Cottages (11802)
5. Buildings at Spurlings Farm
 - a. Non-designated Cattle Shed, Milking parlour and Dairy 110m north-west of Spurlings Farmhouse (42503)
 - b. Non-designated Spurlings Farmhouse (42501)
6. Grade II listed Saw Mills (Pink and Company Ltd) (NHLE 1230002)
7. Grade II listed Mission Room with Cottage Adjoining (NHLE 1351248)
8. Grade II listed Castle Farmhouse (NHLE 1095637)

Sections G-K

4.2.10 These sections become more typical of the historic character of this part of Hampshire, with extensive areas of woodland, dispersed settlements and relatively small enclosures combining with more subtle topography to present a more intimate historic character with very limited views, although some areas of historic parkland survive and may present areas of particular sensitivity.

1. Section G
 - a. Listed Buildings at Webbs Land Farm
 - i. Grade II listed Barn 25m North of Webbs Land Farmhouse (NHLE 1350592)
 - ii. Grade II listed Granary 20m North of Webbs Land Farmhouse (NHLE 1095623)
 - iii. Grade II listed Webbs Land Farmhouse (NHLE 1166779)
 - b. Heritage assets within and associated with Park Place, Wickham
 - iv. Grade II* listed Park Place (NHLE 1095586)
 - v. Grade II listed Little Park Mansions (NHLE 1350591)
 - vi. Non-designated park at Park Place, Wickham
2. Section H
 - a. NDHA Non-designated park at New Place
 - b. Grade II listed Sandy Hill House (NHLE 1350573)
 - c. Grade I Listed New Place Shirrell Heath (NHLE 1095660)
3. Section J
 - a. Grade II listed Spencer Place (NHLE 1095662)
 - b. Grade II listed Woodman's Farmhouse (NHLE 1179414)
4. Section K
 - a. Non-designated Wintershill Farm (340)

- b. Non-designated park at Wintershill Hall
- c. Grade II listed Wool Street Farmhouse (NHLE 1095629)

Section L

- 4.2.11 This section retains the intimate historic character typical of this part of Hampshire, and includes the substantial former deerpark at Marwell, which has a high density of designated and NDHA which present specific sensitivities to change to setting.
- 1. Grade II listed Keeper’s Cottage (NHLE 1095822)
 - 2. Grade II listed Low Hill Farmhouse (NHLE 1302822)
 - 3. Grade II listed Woodcroft Lodge (NHLE 1095821)
 - 4. Grade II listed Hill Farmhouse (NHLE 1350492)
 - 5. Scheduled Parkland features at Marwell Park
 - a. Park Pale at Marwell (NHLE 1012308)
 - b. Park Pale at Marwell (NHLE 1012309)

Section M

- 4.2.12 This section occupies low lying land crossed by the River Itchen and associated smaller streams and the Itchen Navigation and once again contains a large number of designated heritage assets. Works here include a directional drill where the proposed Underground Pipeline passes under the River Itchen.
- 1. Heritage assets associated with Otterbourne Manor
 - a. Scheduled Moated Site at Otterbourne Manor (NHLE 1013055)
 - b. Grade II listed The Manor House (NHLE 1095795)
 - c. Grade II listed Wall 5m NW of Manor House (NHLE 1178879)
 - d. Moat Cottage barn, Otterbourne Manor, Kiln Lane NDHA (MWC7574)
 - e. Non-designated Manor House barn, Otterbourne Manor (50m North-West of house) (MWC3858)
 - f. Grade II listed Barn NW of Otterbourne Manor House (1095751)
 - 2. Heritage Assets at Otterbourne House
 - a. Grade II listed Otterbourne House (NHLE 1350540)
 - b. Non-designated park at Otterbourne House
 - 3. Heritage Assets at Brambridge Park
 - a. Grade II* listed Brambridge House (NHLE 1350494) which is also on the national Heritage at Risk Register
 - b. Non-designated Brambridge Park
