1 Introduction

1.1 Background

1.1.1 Ove Arup and Partners Ltd (Arup) has been appointed by Southern Water Services Limited ('the Applicant') to prepare a Transport Assessment Scoping Report (TASR) in support of the Hampshire Water Transfer and Water Recycling Project (the 'Proposed Development').

1.1.2 The purpose of this TASR is to establish the scope, including content and extent of matters which should be covered in the Transport Assessment (TA). The TA will be appended to the EIA for the Proposed Development and will accompany the Development Consent Order (DCO) application.

1.1.3 In May 2022, under Section 35 of the Planning Act 2008, the Secretary of State directed that the Proposed Development be defined as a project of national significance, which requires development consent.

1.2 The Applicant

1.2.1 The Proposed Development is being progressed by Southern Water Services Limited ('the Applicant'). The Applicant is responsible for supplying water and providing wastewater services to over four million customers in the South-east of England, operating across Hampshire, Kent, the Isle of Wight and East and West Sussex.

1.2.2 The Applicant is governed under the Water Industry Act 1991. In accordance with section 37A of the Water Industry Act 1991, the Applicant is required to meet statutory duties as a water undertaker to prepare and maintain a Water Resources Management Plan (WRMP).

1.2.3 A WRMP sets out how each water undertaker will manage and develop water resources to meet their supply obligation for at least the next 25 years. The Applicant produced a WRMP in 2019 (WRMP19), which outlined proposed long-term solutions to protect the unique chalk rivers in Hampshire, the River Test and Itchen and make up future water shortfalls. This included a long-term and large-scale water resource solution, or Strategic Resource Option (SRO).

1.2.4 The Applicant published its draft WRMP24 on 14 November 2022 for consultation. Consultation on this draft was between 14 November 2022 and 20 February 2023 and the Applicant is now developing a Statement of Response. The draft WRMP24 reaffirms the need for a SRO to meet the WRMP19 water resource deficit. The Preferred SRO Option is now identified as the Proposed Development which would play a major role in making up any shortfall in water supply across the Hampshire supply area.

1.3 Development Proposals

1.3.1 Following extensive optioneering and consultation between the Applicant, the Regulators' Alliance for Progressing Infrastructure Development (RAPID) and other key stakeholders, the Proposed Development was identified as the preferred option for an SRO.

1.3.2 The Proposed Development comprises the following principal elements:

Proposed Water Recycling Plant and proposed High Lift Pumping Station

1.3.3 A proposed Water Recycling Plant (WRP) in the vicinity of Budds Farm Wastewater Treatment Works (WTW) with a total peak output (i.e. during severe drought conditions) of approximately 60MI/d of recycled water. During normal (i.e. non-peak/drought) operation, the output of the proposed WRP is expected to be approximately 20MI/d depending on water availability at Bedhampton Springs which also provides water to Havant Thicket Reservoir. The proposed WRP may increase output during normal operation to maintain water levels within Havant Thicket Reservoir. There would be three pumping stations at the site including the proposed HLPS.

Proposed Underground Pipelines between Budds Farm Wastewater Treatment Works and the proposed Water Recycling Plant

1.3.4 Proposed Underground Pipelines between Budds Farm WTW and the proposed WRP to accommodate approximately 80Ml/d peak transfer volumes in each direction.

Proposed Underground Pipeline between the proposed Water Recycling Plant and Havant Thicket Reservoir

1.3.5 Proposed Pipeline to transfer at peak operation approximately 60Ml/d of recycled water from the proposed WRP to Havant Thicket Reservoir. The proposed Pipeline would either be located within two separate tunnels from the proposed WRP to Havant Thicket Reservoir with a connection at Bedhampton Springs or a single continuous tunnel between the proposed WRP and Havant Thicket Reservoir,

1.3.6 A combined tunnel with Portsmouth Water is also being explored. The preferred option will be confirmed prior to the DCO. The construction traffic estimates presented in this scoping report is based on a single tunnel option rather than a combined tunnel.

Proposed Underground Pipeline between Havant Thicket Reservoir and Otterbourne Water Supply Works

1.3.7 Proposed Underground Pipeline to transfer at peak operation approximately 90MI/d of water from Havant Thicket Reservoir to Otterbourne Water Supply Works (WSW) via the High Lift Pumping Station (HLPS). During normal operation, the pipeline would transfer at least 20Ml/d of water from Havant Thicket Reservoir to Otterbourne WSW.

Proposed Above Ground Plant

1.3.8 Proposed Above Ground Plant (AGP) comprising proposed Intermediate Pumping Stations (IPSs) and proposed Break Pressure Tanks (BPTs) located along the proposed Underground Pipeline between Havant Thicket Reservoir and Otterbourne WSW.

1.3.9 The Proposed Development will also comprise:

- Use of the Havant Thicket Reservoir for the storage of recycled water.
- Use of the existing Eastney TT, Eastney PS and Eastney LSO for the release of reject water to the Solent. Works are not anticipated to be undertaken on the Eastney Transfer Tunnel (TT), Eastney Pumping Station (PS) or Eastney Long Sea Outfall (LSO).

1.3.10 The construction and operation of these principal components of the Proposed Development would be supported by Associated Development and ancillary matters, which is expected to include, but is not limited to:

- Temporary works to support construction including construction compounds and water storage lagoons;
- Permanent works to support operation and maintenance;
- Site accesses and potential utility connections for the Proposed Development; and
- Landscaping, environmental mitigation, enhancement, and compensation measures.

1.3.11 It is anticipated that there would be no demolition works or utilities diversion required as part of the Proposed Development.

1.4 Study Area

1.4.1 The Proposed Development involves the construction of a proposed Underground Pipeline and proposed WRP to be located within Hampshire, with components spanning from Havant to Otterbourne.

1.4.2 An overview of the proposed Underground Pipeline sections, inclusive of the Draft Order Limits and the proposed WRP, is shown below in Figure 1-1. These draft order limits remain work in progress and are confidential.

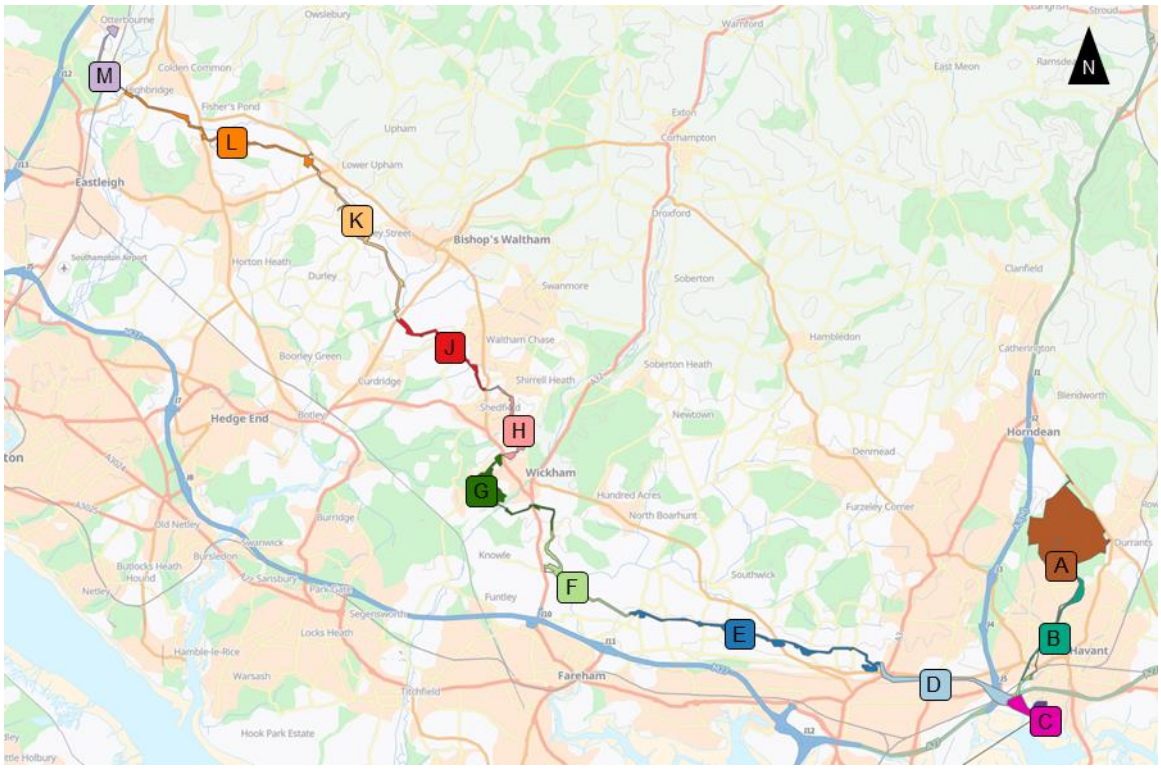

Figure 1-1 Pipeline Sections Overview

1.4.3 In addition to the pipeline section areas presented above, the proposed routes for construction traffic will also be included within the Proposed Development study area. At this early stage, the location of all construction compounds is yet to be finalised, however, preliminary locations have been identified. There is not expected to be a significant change to these preliminary compound locations, and thus the prospective construction traffic routes associated with these locations have been included within the study area for this TASR.

1.4.4 Those roads expected to be impacted by construction traffic are shown below in Figure 1-2. Beyond these links, construction traffic is expected to use the strategic road network, including the M3, A3 (M), M27 and A27.

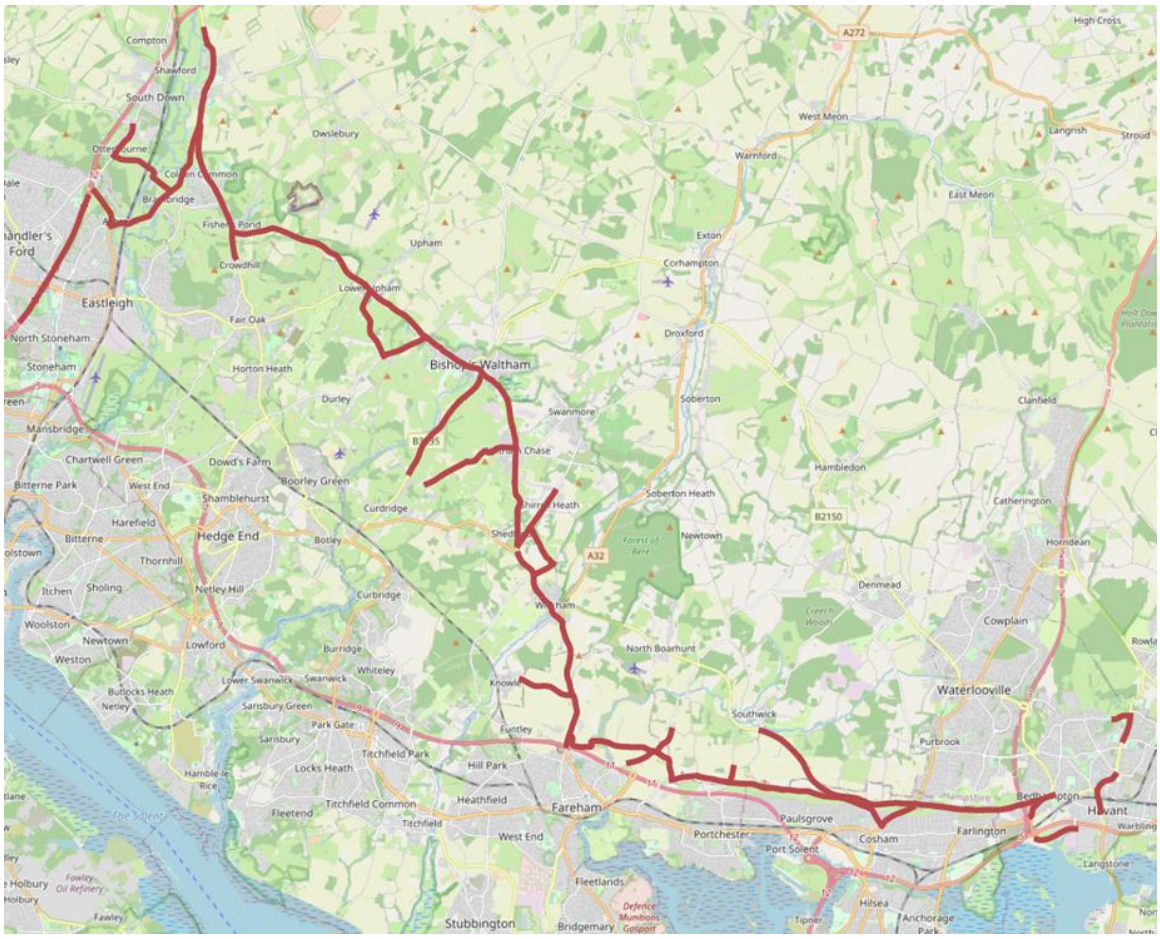

Figure 1-2 Construction Route Links

1.4.5 All roads contained within the study area fall under the control of Hampshire County Council (HCC), Portsmouth City Council (PCC) or National Highways (NH).

1.4.6 The routes within the study area are discussed in further detail at Sections 3 and 4.

1.5 Engagement

1.5.1 The following stakeholders have been engaged as part of the wider EIA process with regards to traffic and transport:

- Hampshire County Council Highways Authority (HCC)
- Portsmouth City Council (PCC)
- National Highways (NH)
- Eastleigh Borough Council (EBC)
- Fareham Borough Council (FBC)
- Havant Borough Council (HBC)
- South Downs National Park Authority (SDNPA)
- Winchester City Council (WCC)
- East Hampshire District Council (EHDC)
- Royal Mail Group Ltd

- The British Horse Society
- Network Rail

1.5.2 Public consultation was undertaken between 5 July and 16 August 2022 to consult the public and stakeholders about the Proposed Development and feedback was received in August 2022. Those groups that provided responses with regards to Traffic and Transport included HCC, Royal Mail Group Ltd, The British Horse Society, and WCC. The key themes from the feedback received were:

- Construction impact should be as minimal as possible, particularly on walkers, cyclists and horse riders and public transport routes where possible. As the design develops, potential opportunities to minimise impacts will be discussed with the relevant stakeholders.
- Suggested mitigation measures to be considered i.e. night time working, and early engagement and notice for route closures. Potential Traffic Management will be discussed with the relevant highway authority.
- Consents, where required, for road or Public Rights of Way (PRoW) temporary closures and/or diversions.
- Requirements that a framework Transport Management Strategy (fTMS) and a framework Construction Traffic Management Plan (fCTMP) be provided alongside the TA. This should provide details of the construction activity and potential measures to limit the impact on the highway e.g., trenchless technology. Further management plans and impact studies have been requested by HCC in subsequent engagement. The scope and list of supporting documents will be agreed with the relevant highway authorities as part of the scoping exercise for the TA.
- Infrastructure improvements – PRoW and cycleways – be considered along the route of the proposed Underground Pipeline where the existing highway is disrupted from construction. As the design develops, potential opportunities to minimise construction impacts will be discussed with the relevant stakeholders. Opportunities to enhance the existing infrastructure provision for walking and cycling will also be explored.
- Highways that should be avoided for road closures where possible include A3, A32, A334, B2177 and B3354.

1.5.3 In addition, technical engagement has been ongoing with a number of consultation bodies in relation to traffic & transport. The Emissions and Transport EIA Working Group consists of key stakeholders, including traffic and transport, air quality and odour, noise and vibration, and waste and material topic specialists.

1.6 Report Structure

1.6.1 The remainder of the TASR is structured as follows:

- Chapter 2 – Summarises the policy context.
- Chapter 3 – Provides detail of the local highway network in the vicinity of the Proposed Development.
- Chapter 4 – Presents an initial audit of the study area, focusing on the local highway network and the existing traffic data.

- Chapter 5 – Presents the baseline traffic data and sets out the assumptions and methodology that will inform the future baseline.
- Chapter 6 - Sets out the methodology for the Proposed Development's traffic impact assessment.
- Chapter 7 – Outlines the proposed structure of the TA.
- Chapter 8 – Provides details of the supporting management plans and assessments to be submitted in conjunction with the TA.

2 Policy Context

2.1 National Policy

National Policy Statement for Water Resources Infrastructure (NPS) (2023)

2.1.1 The NPS sets out the government's policies for the development of nationally significant infrastructure projects for water resources in England. It provides planning guidance for applicants as defined within the Planning Act (2008).

2.1.2 Paragraphs 4.14.1 to 4.14.22 of the document are particularly pertinent to the Proposed Development, with paragraph 4.14.2-3 noting that environmental impacts may result particularly from trips generated on road and the disturbance caused by traffic and abnormal loads generated during the construction phase will depend on the scale and type of the proposal.

2.1.3 Paragraph 4.14.6 notes that applicants should consult National Highways (NH), Network Rail and any local highway authorities impacted by the development proposals to discuss the assessment and any potential mitigation.

2.1.4 Paragraph 4.14.7 states that a Construction Management Plan (CMP) and Travel Plan (TP) should be prepared for the construction and operational phase. Supporting documentation should also be discussed as part of the ongoing engagement with the relevant highway authorities.

2.1.5 Paragraph 4.14.18 states that the assessment should also consider any possible disruption to services and infrastructure, with paragraph 4.14.11 noting that if a Proposed Development is likely to have significant transport implications, the applicant's Environmental Statement (ES) should also include a TA.

2.1.6 This TASR presents the proposed scope of the TA and outlines the supporting documents and management plans. This TASR will be shared with the relevant transport authority including the local and strategic highway authorities, complying with paragraphs 4.14.6-7 of the NPS.

National Planning Policy Framework (2023)

2.1.7 In September 2023, the Ministry of Housing, Communities and Local Government published the latest version of the National Planning Policy Framework (NPPF). Paragraph 11 states that "plans and decisions should apply a presumption in favour of sustainable development" before expanding on this, saying that in relation to decision-making this means:

- "Approving development proposals that accord with an up-to-date development plan without delay; or
- Where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless:
  - The application of policies in this Framework that protect areas of assets of particular importance provides a clear reason for refusing the development proposed; or

- Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

2.1.8 In terms of the NPPF's transport content, Chapter 9 focuses on the promotion of sustainable transport. Paragraph 104 states that "transport issues should be considered from the earliest stages of plan-making and development proposals."

2.1.9 In paragraph 110, the NPPF highlights that "in assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:

- Appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location;
- Safe and suitable access to the site can be achieved for all users;
- The design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Model Design Code; and
- Any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree."

2.1.10 Paragraph 111 goes on to note "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe."

2.1.11 Paragraph 112 provides requirements for applications for development, which should:

- "Give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second – so far as possible – to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and appropriate facilities that encourage public transport use;
- Address the needs of people with disabilities and reduced mobility in relation to all modes of transport;
- Create places that are safe, secure and attractive – which minimise the scope for conflicts between pedestrians, cyclists and vehicles, avoid unnecessary street clutter, and respond to local character and design standards;
- Allow for the efficient delivery of goods, and access by service and emergency vehicles; and
- Be designed to enable charging of plug-in and other ultra-low emission vehicles in safe, accessible and convenient locations."

2.1.12 This TASR sets out the proposed scope of the TA and outlines the findings of the preliminary construction traffic impact assessment. The findings of the assessment indicate adverse transport impacts associated with the Proposed Development would be temporary and limited to the construction phase.

2.1.13 The TA and supporting management plans will include measures and interventions that seek to promote sustainable transport modes and facilitate access for all users.

2.2 Local Policy

The Portsmouth Plan, Portsmouth's Core Strategy (2012)

2.2.1 The Portsmouth Plan is Portsmouth's Core Strategy. It is the overarching planning policy document, which forms part of a wider set of local planning policy documents known as the Local Development Framework (LDF).

2.2.2 The Portsmouth Plan is designed to:

- Set out a vision and objectives for the development of Portsmouth up to 2027;
- Identify broad locations for development, protection or change and allocate strategic sites;
- Set clear policies that guide decisions on planning applications;
- Indicate how the plan will be implemented; and
- Show how progress will be monitored.

2.2.3 The vision for the Portsmouth Plan is taken from the Sustainable Community Strategy Vision for Portsmouth, which was developed by the Local Strategic Partnership, with input from local agencies, businesses and residents. By 2027 the aims are for Portsmouth to be a rejuvenated and sustainable city.

2.2.4 These aims are developed further through the Portsmouth Plan's Objectives:

- Objective 1: To make Portsmouth an attractive and sustainable city.
  - This objective addresses the issues of the quality of the urban and natural environment.
- Objective 2: To make Portsmouth an accessible city with sustainable and integrated transport.
  - This objective addresses the issue of transport and will be achieved by encouraging sustainable transport alternative.
- Objective 3: To develop Portsmouth as a city of innovation and enterprise, with a strong economy and employment opportunities for all.
  - This objective addresses the issues of accommodating development, improving employment opportunities and promoting the city centre.
- Objective 4: To make Portsmouth a city in which everyone feels and is safe.
  - This objective mainly addresses the issue of flood risk and also that of improving the quality of the urban environment.
- Objective 5: To deliver affordable/quality housing where people want to live.
  - This objective tackles the issues of accommodating development and housing mix & affordable housing.
- Objective 6: To encourage and enable healthy choices for all and provide appropriate access to health care and support.
  - This objective tackles the issues of health and inequalities.
- Objective 7: To enhance Portsmouth's reputation as a city of culture, energy and passion offering access for all to arts sport and leisure.
- Objective 8: To ensure there is adequate supporting infrastructure for the new development and growth of the city.

- This objective tackles the issues of accommodating development and transport.

Draft Portsmouth Local Plan 2038 (2021)

2.2.5 The Draft Portsmouth Local Plan sets out a vision for the city over the next fifteen years which reflects the major challenges facing the city in the coming years. This includes the government's imposed target of an additional 17,000 new homes to be located within what is already a densely populated city. The plan also responds to changes in consumer behaviour and the need to create new employment opportunities.

2.2.6 The timetable for the new local plan is currently unclear, and will be set out within a new Local Development Scheme.

Hampshire Local Transport Plan (LTP3) (Revised 2013)

2.2.7 The LTP3 is a document published by HCC which sets out the vision for developing and supporting stronger and safer communities, maximising well-being and enhancing quality of place, and on its sustainable community strategy. The LTP3 spans over the period 2011 to 2031, though by their own admission, HCC states that the current LTP3 is no longer relevant to today's challenges and opportunities hence the development of the Draft Hampshire Local Transport Plan 4.

Draft Hampshire Local Transport Plan (LTP4) (2022)

2.2.8 The Hampshire Local Transport Plan 4 (LTP4) (also published by HCC) has been developed over the last two years to set out key priorities and policies for transport within Hampshire looking ahead to 2050. A final version of the plan is expected to be adopted in 2023. The document sets out the current and future issues and challenges relating to transport, the long-term vision for transport, the priority outcomes for transport and guiding principles and policies covering the planning, operation and maintenance of the transport network.

2.2.9 The LTP4 outlines a number of core policies tailored to help the county achieve their desired outcomes. The core policies are intended to determine how mechanisms to improve all aspects of transport are planned and delivered. Key themes included within the various core policies are a need to put people and places at the heart of planning decisions, the need to consider all users, the need to protect the environment and place climate change at the heart of decision-making and encourage sustainable travel behaviour.

Other Local Policy

2.2.10 In addition to counties and unitary areas, the Proposed Development is also likely to residually or directly impact upon several district areas including East Hampshire, Eastleigh, Fareham, Havant, Winchester and South Downs. Relevant local policy that guides and shapes development within these areas is outlined as follows:

- East Hampshire District Council (EHDC) Local Plan: Joint Core Strategy (2014)
- Eastleigh Borough Local Plan 2016-2036 (2022)

- Fareham Local Plan 2037 (2023)
- Fareham Local Plan Part 3: Welbourne Plan (2015)
- Havant Borough Council (HBC) Core Strategy (2011)
- Winchester District Council (WCC) Local Plan Part 1: Joint Core Strategy (2013)
- WCC Local Plan Part 2: Development Management and Site Allocations (2017)
- South Downs Local Plan (2019)

2.3 Other Material Considerations

Department for Transport (DfT) Circular 01/2022 – Strategic Road Network and the Delivery of Sustainable Development

2.3.1 The DfT Circular document was published by DfT and last updated in December 2022. It is a policy paper which explains how NH will engage with the planning system and fulfil its role as a delivery partner for sustainable economic growth whilst managing and operating a safe and efficient strategic road network. The document outlines NH's approach to planning engagement, stating that plans must not compromise the Strategic Road Network's (SRN's) prime function to enable the long-distance movement of people and goods.

2.3.2 It goes on to state that NH expect local plans and spatial development plans of local authorities to not include any reliance on the SRN. Local authorities and development promoters are encouraged to identify any potential impacts on the SRN that may arise as a result of development proposals for discussion with NH. Where impacts do occur, NH expects developers to prioritise a reduction in the need to travel by car and facilitate the uptake of sustainable modes ahead of capacity enhancements and new connections on the SRN.

2.3.3 TA's should consider existing and forecast levels of traffic on the SRN alongside any additional trips from committed developments that would impact on the same sections (links or junctions) as the proposed development. Scenario assessments should be agreed with NH in advance, whilst planned improvements to the SRN or local road network should be considered. Assessments should typically consider an opening year assessment, forecast growth and committed development. For multi-phase developments, assessments shall be provided based on the opening of each phase.

2.3.4 Where a TA indicates that a development would have an unacceptable safety impact, or the residual cumulative impacts on the SRN would be severe, the developer must identify when transport improvements become necessary, with the scope and phasing of necessary transport improvements usually defined by NH in planning conditions.

3 Highway Network

3.1 Introduction

3.1.1 This chapter of the TASR presents an audit of the local and strategic highway network and an initial review of road traffic collisions.

3.1.2 The study area for the Proposed Development encompasses Southern Hampshire and Portsmouth and is bound by Winchester and Petersfield in the north, the B2149 and Havant to the east, the M27 and A27 in the south, Langstone to the south-east and the M3 in the west. A number of routes within this study area will be directly affected by the construction phase of the Proposed Development.

3.1.3 Other routes will be indirectly affected by the Proposed Development, meaning that they may be impacted by temporary diversion routes associated with road closures, or they may be used by construction traffic. Further information on diversions and construction routing will be detailed in the fCTMP and the framework Traffic Management System (fTMS) which will be prepared alongside the TA.

3.2 Local Highway Network

3.2.1 This section presents an audit of those roads that form part of the local highway network that are likely to be impacted by the Proposed Development. Given the large geographical scale of the Proposed Development, this audit has been split to reflect the sections of the proposed Underground Pipeline, as illustrated in Figure 1-1.

Sections A and B

3.2.2 Sections A and B of the proposed Underground Pipeline comprise of the tunnel between the proposed WRP and Havant Thicket Reservoir, and a tunnel to Bedhampton Springs. Draft order limits (work in progress) for both a single tunnel and a combined tunnel (with Portsmouth Water) option have been shown, as shown in Figure 3-1 below.

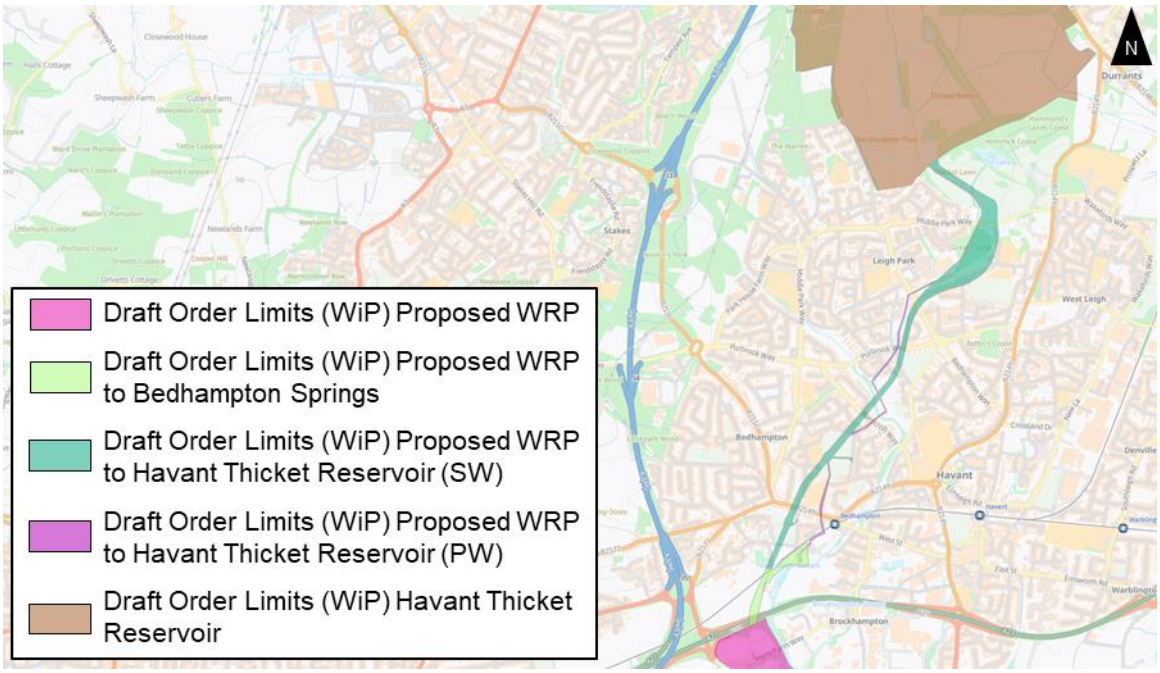

Figure 3-1 Sections A and B

3.2.3 Whilst the construction of the tunnel would not directly impact the local highway network, construction traffic movements may impact the following roads:

- Middle Park Way – Middle Park Way provides a north-east/south-west link between the B2149 and Purbrook Way. Middle Park Way accommodates two-way vehicular traffic which is segregated by a central reservation. There are regular formal pedestrian crossing points along the extent of Middle Park Way, whilst traffic calming features permeate the extent.
- B2149 Petersfield Road provides a north/south connection within eastern Havant between the four-arm Elmleigh Road, Park Road North and New Road roundabout junction and Rowlands Castle to the north-east of Havant. Within Havant, the B2149 is a dual carriageway with a grass verge segregating bi-directional traffic. Within Havant, the B2149 has a speed limit of 40mph.
- B2149 New Road and Bedhampton Road – provides an east/west connection within Havant. To the east, the road provides access to the Bedhampton Railway Station and Petersfield Road beyond. The B2149 is a two-way road with a single carriageway in either direction, though it widens to two lanes westbound on the approach to the signalised junction with the B2150 Hubert Road.
- Purbrook Way – an east/west link which provides access to Junction 4 of the A3 (M). Purbrook Way bisects the north of Havant, accommodating two-way vehicular traffic with a single lane in either direction. On-road parking is also provided along Purbrook Way.
- Park Road (North and South) provides a north/south connection between the A27 Havant Bypass and the four-arm Elmleigh Road, Park Road North and New Road roundabout junction. Park Road is predominantly a dual carriageway, though it widens to three lanes northbound in the vicinity of the roundabout to the north and three lanes southbound towards the mid-section in the vicinity of Bulbeck Road.

Section C

3.2.4 Section C of the proposed Underground Pipeline encompasses the proposed WRP and the tunnel to the Budds Farm WTW, as shown in Figure 3-2 below.

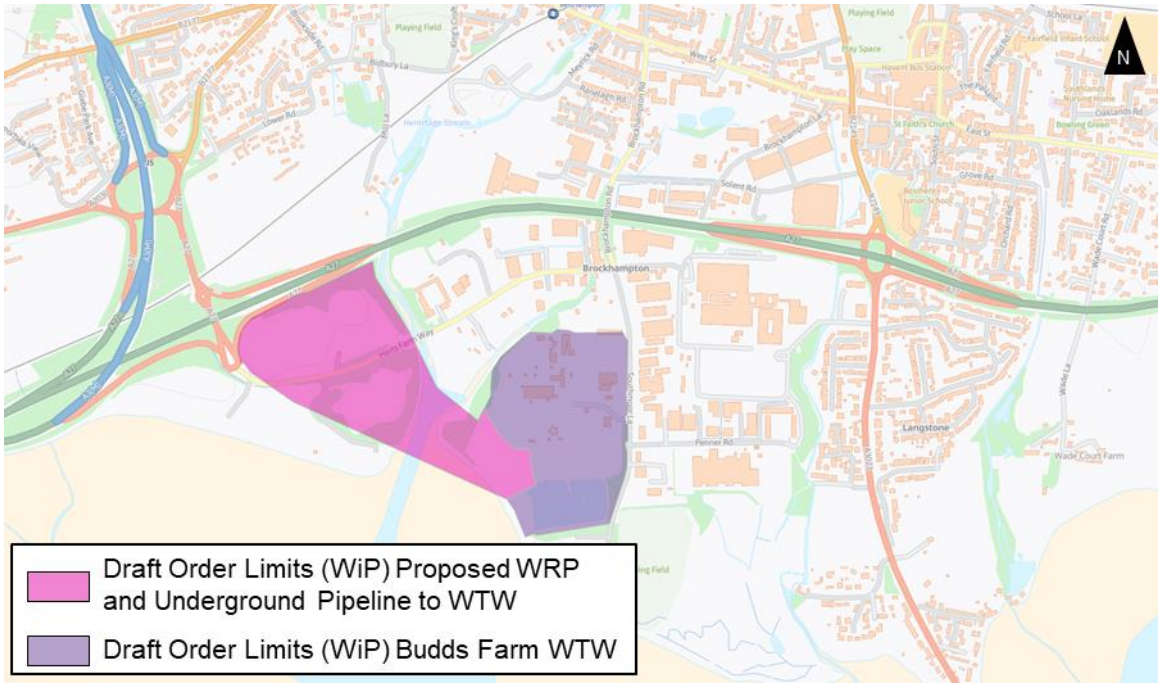

Figure 3-2 Sections C

3.2.5 Key routes in the vicinity of the proposed WRP and the underground pipeline to Budds Farm WTW are set out as follows:

- Harts Farm Way runs in an east/west alignment to the south of Havant, connecting the Langstone Technology Park with the A27 Havant Bypass dumbbell junction to the west. To the south, Harts Farm Way provides connections to two car parks adjacent to Chalkdock Lake.
- The A27 (T) Havant Bypass forms part of the SRN and provides an east/west connection in the vicinity of Havant. The A27 Havant Bypass accommodates two-way vehicular traffic in a dual carriageway arrangement, with a central reserve segregating directional traffic. To the west, the A27 (T) Havant Bypass forms a dumbbell junction arrangement with the A3 (M) which involves a link road which is also known as the A2030. To the east, the A27 forms a gyratory junction with Park Road South and Langstone Road.
- Southmoor Lane provides a north/south connection between a four-arm roundabout junction with Brockhampton Road, Brookside Road and Southmoor Lane and Budds Wall to the south of Langstone adjacent to Budds Farm WTW. Southmoor Lane accommodates two-way vehicular traffic with a lane in either direction.

Section D

3.2.6 The local highway network in the vicinity of Section D of the proposed Underground Pipeline is illustrated below in Figure 3-3.

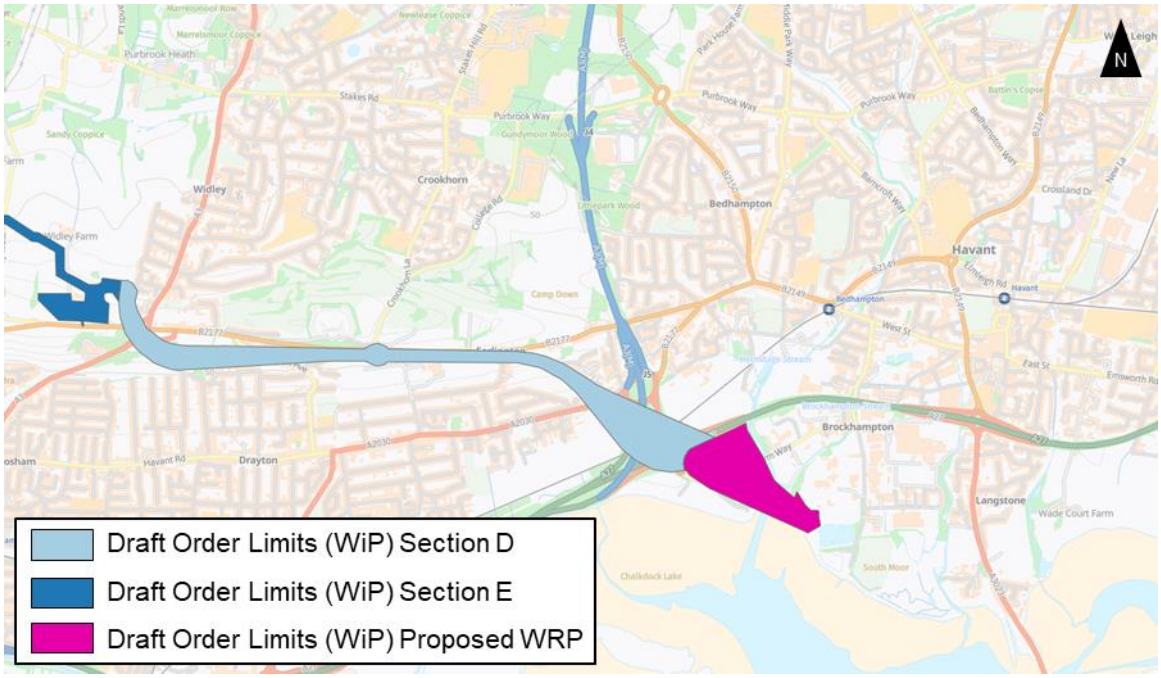

Figure 3-3 Section D

3.2.7 Affected routes in the vicinity of Section D of the proposed Underground Pipeline are set out as follows:

- B2177 Portsdown Hill Road – The B2177 provides an arterial north-west/south-east link between Wickham and Cosham. The B2177 accommodates two-way vehicular traffic and is subject to the national speed limit.
- Mill Lane – Provides a north/south connection to the west of Fort Widley, connecting Portsdown Hill Road to the south to Purbrook Heath Road to the north.
- Widley Walk – Widley Walk runs parallel to Mill Lane, providing a north/south connection between Portsdown Hill Road and Purbrook Heath Road. Widley Walk also provides access to the Fort Widley Electricity Sub-station as well as the Fort Widley Equestrian Centre. On-road parking is provided to the south of the road.
- A3 London Road – The A3 London Road runs in a north/south alignment through Widley, Purbrook and Waterlooville. To the south, the A3 forms an on-slip/off-slip junction with the B2177, whilst to the north it connects to the A3 (M) at Junction 2 via the B2149. Through Widley, Purbrook and Waterlooville, the A3 accommodates two-way vehicular traffic, with a dedicated bus lane running south-bound and sporadic provision of advisory cycle lanes along the northbound carriageway.
- Crookhorn Lane is a north south route which links the B2177 Portsdown Hill Road to Purbrook Way. Crookhorn Lane accommodates one lane of vehicle traffic in each direction, with footway also provided on both sides of the carriageway.

Section E

3.2.8 Section E of the proposed Underground Pipeline routes to the north of Southwick. The local highway network in the vicinity of Section E is illustrated below in Figure 3-4.

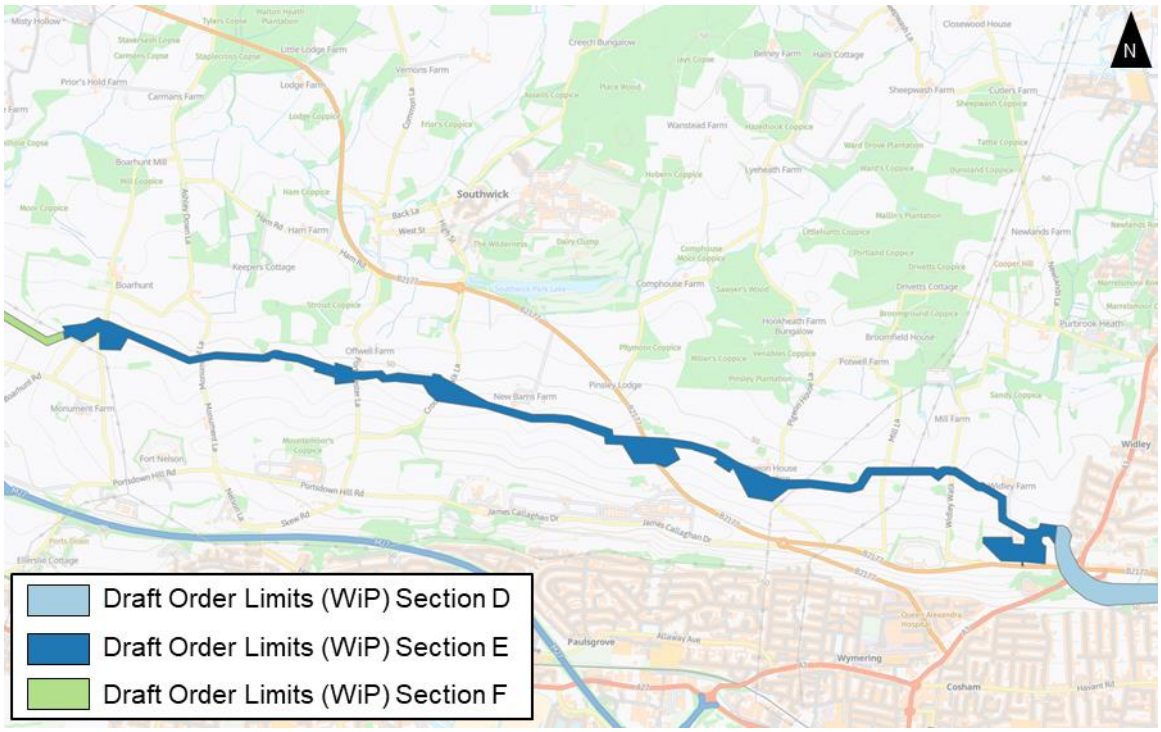

Figure 3-4 Section E

3.2.9 Key affected routes within the immediate vicinity of Section E, which covers a significant proportion of the Southwick and Widley CP area, includes:

- Boarhunt Road – provides a north-east/south-west connection between Junction 11 of the M27 and Boarhunt. It accommodates two-way vehicular traffic flows, measuring between 5.0m and 5.5m in width. Boarhunt Road is subject to the national speed limit.
- Portsdown Hill Road/James Callaghan Drive is an east/west link located to the north of Portsmouth. It accommodates two-way vehicular traffic and provides a connection between Portchester and Havant via the B2177.
- Monument Lane – provides a north/south connection between Portsdown Hill Road to the south and Ashley Down Lane to the north measuring approximately 1.2km. Monument Lane provides access to the popular national museum Fort Nelson. Monument Lane is subject to the national speed limit and accommodates two-way vehicular traffic. Monument Lane measures approximately 4.2m in width in the vicinity of Nelson's Monument, narrowing to approximately 2.9m wide to the north of this.
- Portchester Lane – is a north/south route that connects Portsdown Hill Road to the south, to the B2177 to the north. Portchester Lane measures approximately 5.0m in width and accommodates two-way vehicular traffic. Portchester Lane also has a height restriction of 2m in place, making it unsuitable for HGV movements.

- Crooked Walk Lane – provides a north-east/south-west link between the B2177 and Portchester Lane. Crooked Walk Lane typically measures between 3.8m and 4.8m in width and accommodates two-way vehicular traffic.
- Pigeon House Lane – Pigeon House Lane measures approximately 3.8m in width and provides a north/south connection between Belney Farm to the north and the B2177 to the south.
- B2177 Portsdown Hill Road (as above)

Sections F and G

3.2.10 Sections F and G of the proposed Underground Pipeline pass near Wickham and Knowle. The local highway network in the vicinity of this pipeline section is illustrated below in Figure 3-5.

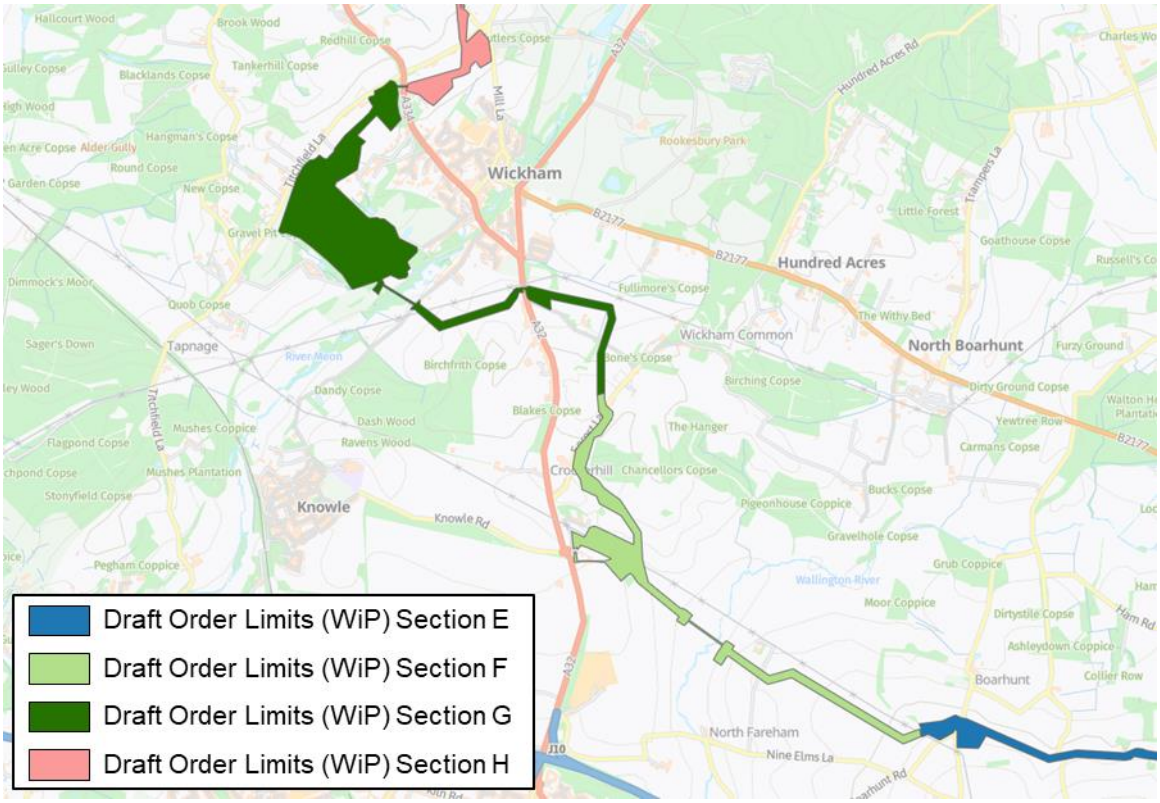

Figure 3-5 Sections F and G

3.2.11 Key routes affected within the vicinity of Wickham and Knowle are set out as follows:

- A334 Winchester Road – The A334 Winchester Road provides a north-west/south-east link between Wickham and Botley. The A334 Winchester Road ranges between approximately 6.0m and 6.8m in width and accommodates two-way traffic. To the south-east of Wickham, the A334 forms a roundabout junction with the A32.
- A32 (Hoad's Hill, Wickham Road) – The A32 provides an arterial connection between Junction 10 of the M27 to the south and Wickham to the north, forming a roundabout junction with the A334 to the south-east of Wickham. To the south, the A32 Wickham Road is a dual carriageway, with directional traffic segregated by a central reservation. To the north, the road narrows to a single

lane in either direction, though a central reservation continues to separate directional traffic. The A32 has a speed limit of 50 mph.

- Titchfield Lane – A north-east/south-west minor road which connects Wickham to Titchfield, located to the south-west of Knowle. Titchfield Lane typically measures approximately 5.5m in width and accommodates two-way vehicular traffic. Titchfield Lane has a speed limit of 40mph.
- Mayles Lane – One of two routes to/from Knowle, Mayles Lane extends for approximately 2.8km, connecting Wickham in the north-east to Knowle and on to Funtley to the south. Mayles Lane is narrow, typically measuring between 4.0m and 5.3m in width. It has a speed limit of 20-30mph for the majority of its extent, reducing to 20mph in places. Much of Myles Lane is private, with access restricted to authorised vehicles only.

Section H

3.2.12 Figure 3-6 below presents the local highway network in the vicinity of Section H of the proposed Underground Pipeline.

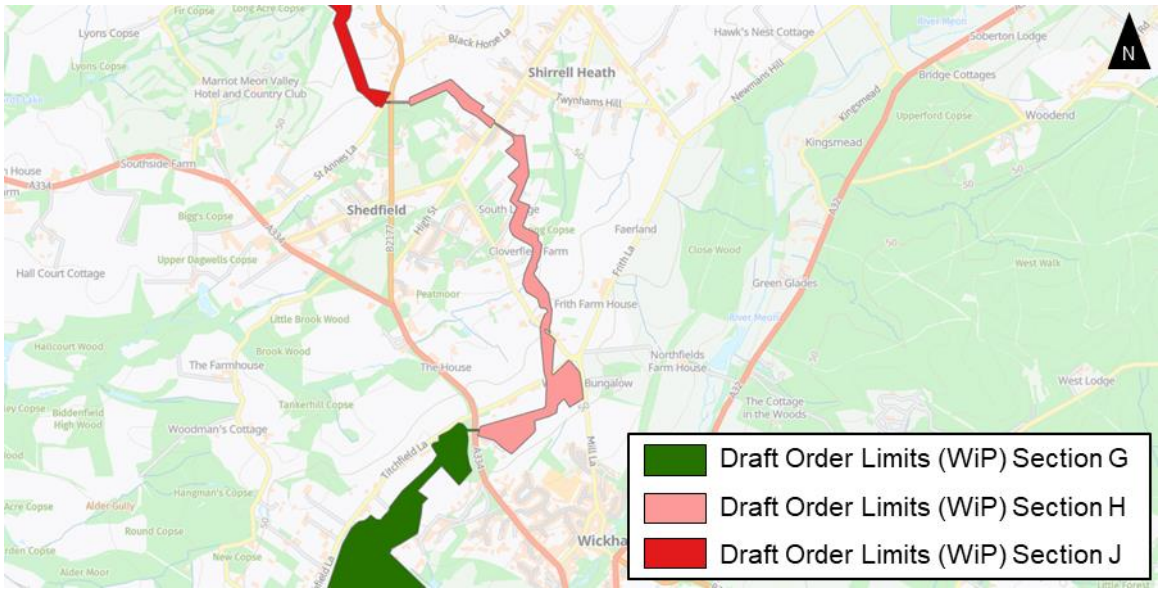

Figure 3-6 Section H

3.2.13 Routes affected within the vicinity of the Section H include:

- A334 Winchester Road (as above)
- B2177 (Portsmouth Road, Winchester Road) – A north-west/south-east route which provides a link between the B3354 and Lower Upham. The B2177 is subject to the national speed limit and accommodates two-way vehicular traffic. It measures approximately 6.0m in width and contains limited provision for pedestrians.
- Pricketts Hill is narrow north-west/south-east road connecting Shedfield High Street to Blind Lane, north of Wickham. The lane measures approximately 4.2m in width and accommodates two-way vehicular traffic (with passing places).
- Blind Lane is approximately 3.8m-4.3m in width and provides an east/west link between the A334 Winchester Road and Pricketts Hill/Mill Lane to the east.

- Shirell Heath High Street provides a north-east/south-west link between Shedfield and Hillpound. It accommodates two-way vehicle traffic and has a speed limit of 40 mph.
- Mill Lane is located to the south-east of Section H and provides a north/south connection between Wickham and Shedfield. Mill Lane measures approximately 5.5m in width and accommodates two-way vehicle flows.
- Black Horse Lane is located to the north of Section H (and Shedfield), providing a connection between the B2177 and Solomons Lane. Black Horse Lane is a very narrow lane, measuring approximately 3.1m wide with the provision of some passing places along its extent, which also provides access to a number of dwellings and agricultural facilities.

Section J

3.2.14 Section J of the proposed Underground Pipeline passes near Waltham Chase and Shedfield. The local highway network in the vicinity of Section J is illustrated below in Figure 3-7.

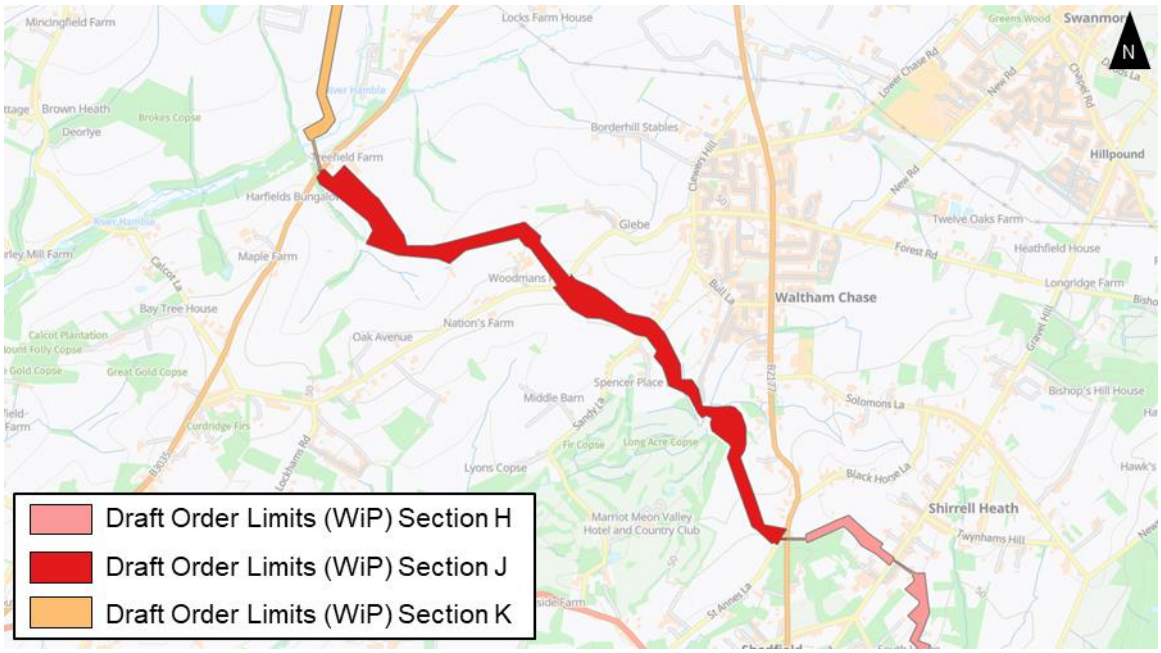

Figure 3-7 Section J

3.2.15 The following routes are located within the vicinity of the Proposed Development near to Waltham Chase and Shedfield:

- B3035 Botley Road (as above)
- Curdridge Lane – An east/west route which provides a link between the B3035 Botley Road in the west and the B2177 Winchester Road in the east. Curdridge Lane accommodates two-way vehicular traffic flow (with passing places) and has a speed limit of 40mph. Curdridge Lane is narrow, typically measuring approximately 4.2m in width.
- Sandy Lane – A narrow rural lane which measures approximately 3.5m in width and provides a connection between Shedfield and Waltham Chase. Given the narrow width of the road, there are passing places provided frequently along its extent.

- B2177 Winchester Road (as above)

Section K

3.2.16 Figure 3-8 below presents the local highway network in the vicinity of Section K of the proposed Underground Pipeline.

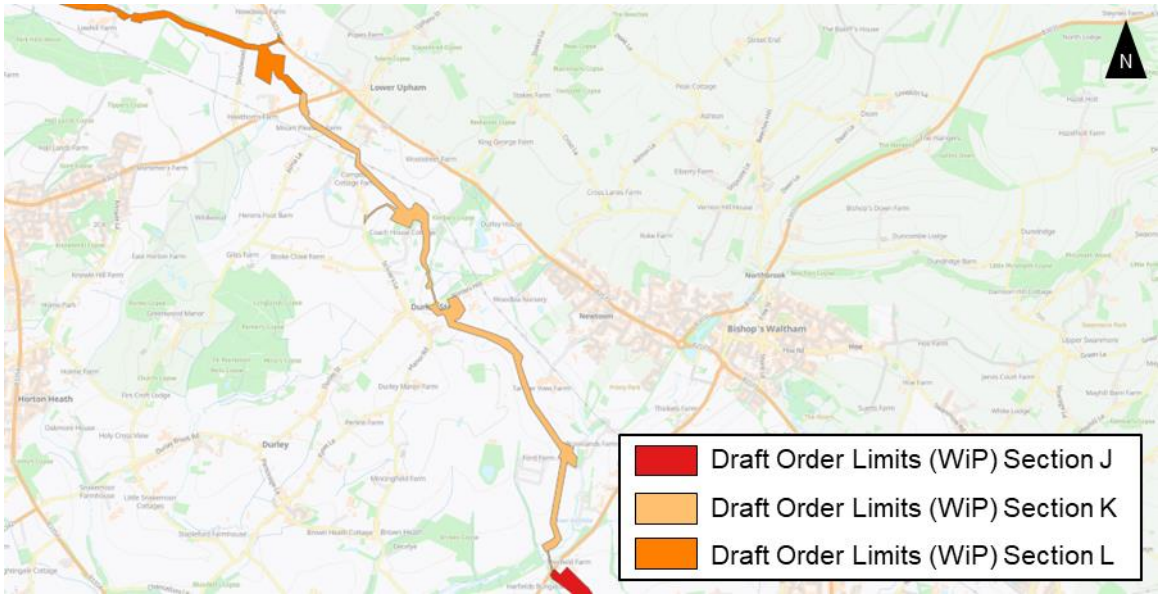

Figure 3-8 Section K

3.2.17 The Proposed Development will affect the following routes near Lower Upham and Bishops Waltham:

- B2177 Winchester Road (as above)
- B3037 Mortimers Lane (as above)
- B3035 Botley Road extends from Bishops Waltham in the north-east to Botley to the south-west. It accommodates two-way traffic and typically measures approximately 5.5m in width. There is a 40mph speed limit.
- Scriviers Lane is a single carriageway rural road characterised by its narrow profile, ranging from 4.8m-5.5m in width, which provides a link between the B2177 and Winters Hill.
- Winters Hill is an east/west link which measures approximately 4.5m in width, providing a connection between Scriviers Lane and the B2177.
- Alma Lane is a narrow, single carriageway north-east/south-west link that connects Lower Upham to Greenwood Lane to the south-west.

Section L

3.2.18 Section L of the proposed Underground Pipeline includes Colden Common, Fair Oak and Lower Upham. The local highway network in the vicinity of Section L is illustrated below in Figure 3-9.

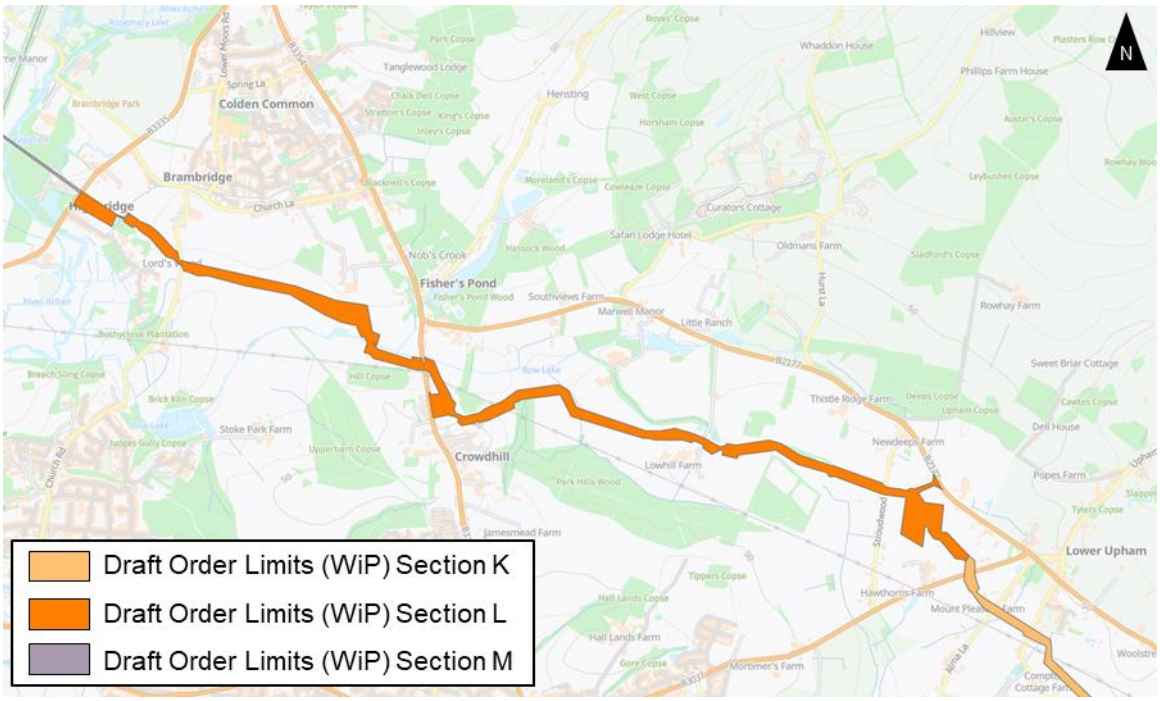

Figure 3-9 Section L

3.2.19 The Proposed Development will affect the following routes in the vicinity of Colden Common, Fair Oak and Lower Upham:

- B2177 Winchester Road (as above)
- B3354 (Main Road, Winchester Road) – A north/south route connecting from B3335 to the north, towards Botley to the south. The B3354 accommodates two-way vehicular traffic which is segregated by a central reservation at places (through Colden Common). There are multiple formal crossing points on the B3354 through Colden Common, including signalised pedestrian crossing points. The speed limit ranges between 30mph (through Colden Common) to 50 mph outside of residential areas.
- B3037 Mortimers Lane – An east/west link connecting Fair Oak to the west to Lower Upham to the east. The B3037 Mortimers Lane measures approximately 5.5m in width and accommodates two-way vehicular traffic. The speed limit ranges between the national speed limit and 40mph. The 40-mph limit is in place on the approach to Lower Upham, which is demarked by signage and gateway features.
- Stroudwood Lane is a circa 5.0m wide, two-way lane which provides a short link between the B2177 Winchester Road and the B3037 Mortimers Lane.
- Bishopstoke Lane is a narrow, circa 3.8m wide lane which accommodates two-way vehicular traffic, providing a two-way link between Eastleigh and Colden Common.

Section M

3.2.20 Figure 3-10 below presents the local highway network in the vicinity of Section M of the proposed Underground Pipeline.

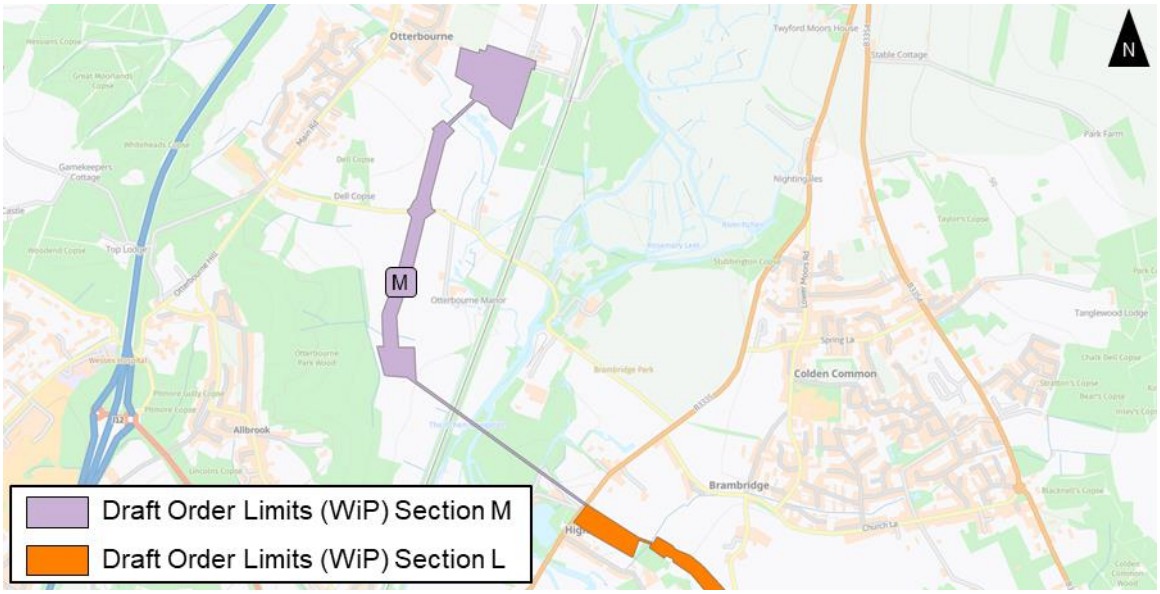

Figure 3-10 Section M

3.2.21 The Proposed Development would likely either directly or indirectly affect the following links in the vicinity of Otterbourne and Colden Common:

- B3335 (Coxs Hill, High Street, Highbridge Road) – A north/south route connecting J11 of M3 to the north to Colden Common and Otterbourne to the south. The B3335 accommodates two-way traffic and measures between 5.2m-7.0m in width. The road has a speed limit which varies between 30mph through Twyford to 50mph outside of residential areas. To the south-west, the B3335 Highbridge Road passes under a railway line, and therefore this link may not be suitable for some HGVs given that the height clearance of the bridge is 3.7m.
- A335 (Allbrook Way) – A north/south route connecting J12 of the M3 to the B3335 Highbridge Lane to the east. The A335 accommodates two-way vehicular traffic, is subject to the national speed limit (reducing to 40mph as it approaches Eastleigh) and measures approximately 7.2m in width.
- Kiln Lane – An east/west route connecting the B3335 to the east to Main Road to the west. Kiln Lane is a two-way vehicular traffic route providing a key link to Otterbourne. Kiln Lane ranges in width between 4.5m and 5.8m. Kiln Lane is subject to the national speed limit, although towards Otterbourne a speed limit of 30mph is in place. As with the B3335, Kiln Lane may be unsuitable for some HGV movements due to a clearance height (4.8m) underneath the railway bridge.
- Otterbourne Main Road – Provides a north/south connection through Otterbourne, linking to Kiln Lane to the south. The Main Road provides access to a number of facilities and amenities in central Otterbourne and as such pedestrian facilities including formal crossing points permeate the extent of the road. Main Road has a speed limit of 30mph, and ranges between 7.5m-9.0m in width, with frequent crossing spaces provided for pedestrians. Main Road

accommodates two-way vehicular traffic, which is separated by advisory road markings.

3.3 Strategic Road Network

3.3.1 Whilst the Proposed Development would not directly impact the SRN, it is anticipated that construction traffic would impact several roads located near the Proposed Development. Figure 3-11 below illustrates those SRN links located near the Proposed Development.

Figure 3-11 Strategic Road Network

3.3.2 As shown in the figure above, the following roads along the SRN could be used by construction traffic:

- A34 – The A34 runs in a north/south alignment and provides a connection between Winchester to the north-west of the Otterbourne WSW north to Newbury and on to Oxford. The A34 connects to the M3 at Junction 9.
- M3 – The M3 provides a strategic connection between Eastleigh and West London. In the vicinity of the proposed Underground Pipeline it connects the M27 Junction 4 south of Eastleigh to Winchester to the north-west of Otterbourne.
- M27 – The M27 offers an east/west connection between the New Forest and Portsmouth, circumventing Southampton to the north where it forms a junction with the M3. The M27 is aligned to the south of the proposed Underground Pipeline as it passes through areas such as Wickham and Boarhunt.
- A3 (M) – The A3 (M) runs in a north/south alignment from Junction 5 of the A27 at Broadmarsh to West London via Petersfield, Guildford and a number of other settlements. The A3 (M) bounds Havant to the west, segregating it from

Waterlooville to the west. The proposed Underground Pipeline is to pass underneath the A3 (M) in the vicinity of Junction 5.

- A27 (T) – The A27 (T) provides an east/west connection between the M27 north of Portsmouth and Polegate to the south-east of England. It passes to the south of the proposed Underground Pipeline in the vicinity of Cosham/Farlington, and passes immediately north of the proposed WRP. The proposed Underground Pipeline will pass underneath the A27 (T) adjacent to Junction 5 at Broadmarsh.

3.4 Highway Safety

Introduction

3.4.1 Given the substantial geographical scale of the Proposed Development, a two-stage approach is proposed to review road traffic collision data, as follows:

- Stage 1: using Personal Injury and Accident (PIA) data obtained from the Department for Transport (DfT), identify locations where fatal collisions have been recorded alongside any clusters of slight and serious collisions.
- Stage 2: for those locations identified above, obtain detailed collision data from the Hampshire Constabulary for further analysis.

3.4.2 This section of the TASR presents an initial review of the collision data obtained from the DfT, including locations proposed to be investigated further as part of the TA.

Stage 1 Review of DfT PIA Data

3.4.3 The study area for this PIA analysis encompasses the roads directly impacted by the pipeline sections and potentially indirectly impacted by construction traffic and local diversions, as illustrated in Figure 3-12 below.

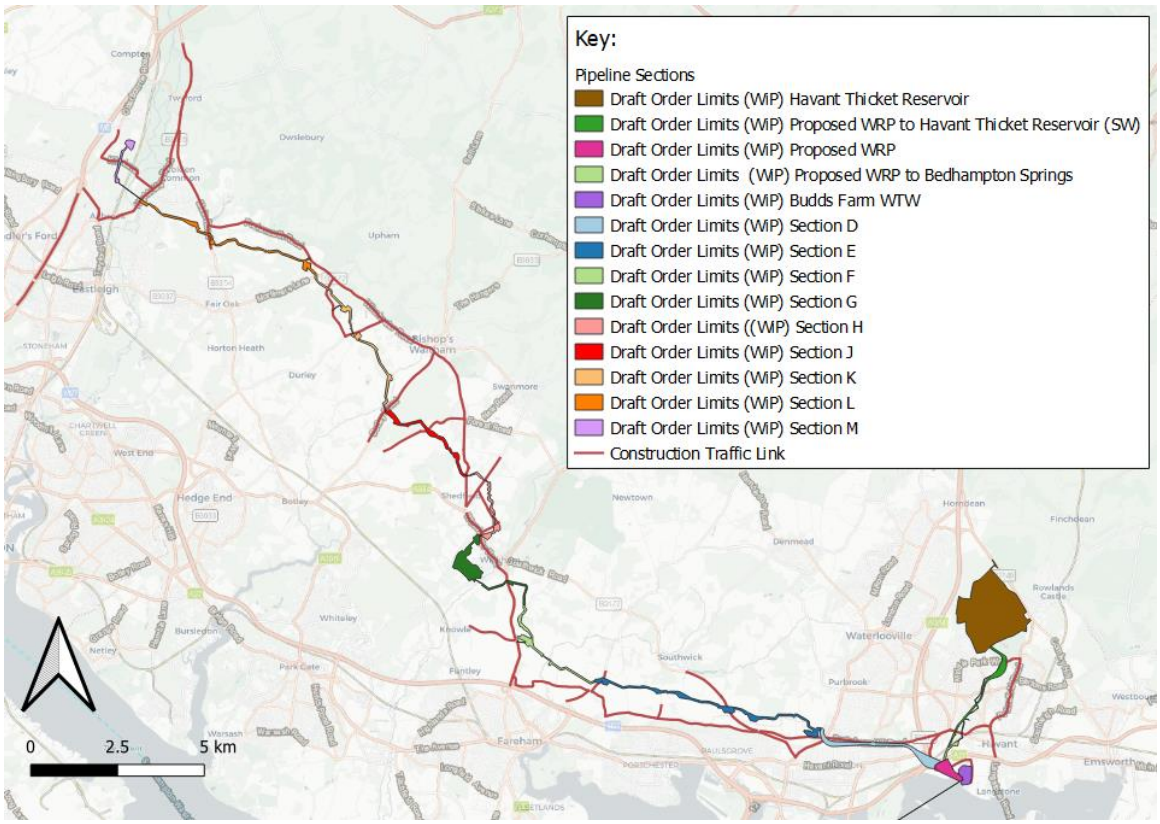

Figure 3-12 Highway Safety Study Area

3.4.4 The following provides a review of fatal collisions as well as any clusters of slight or serious collisions across the study area:

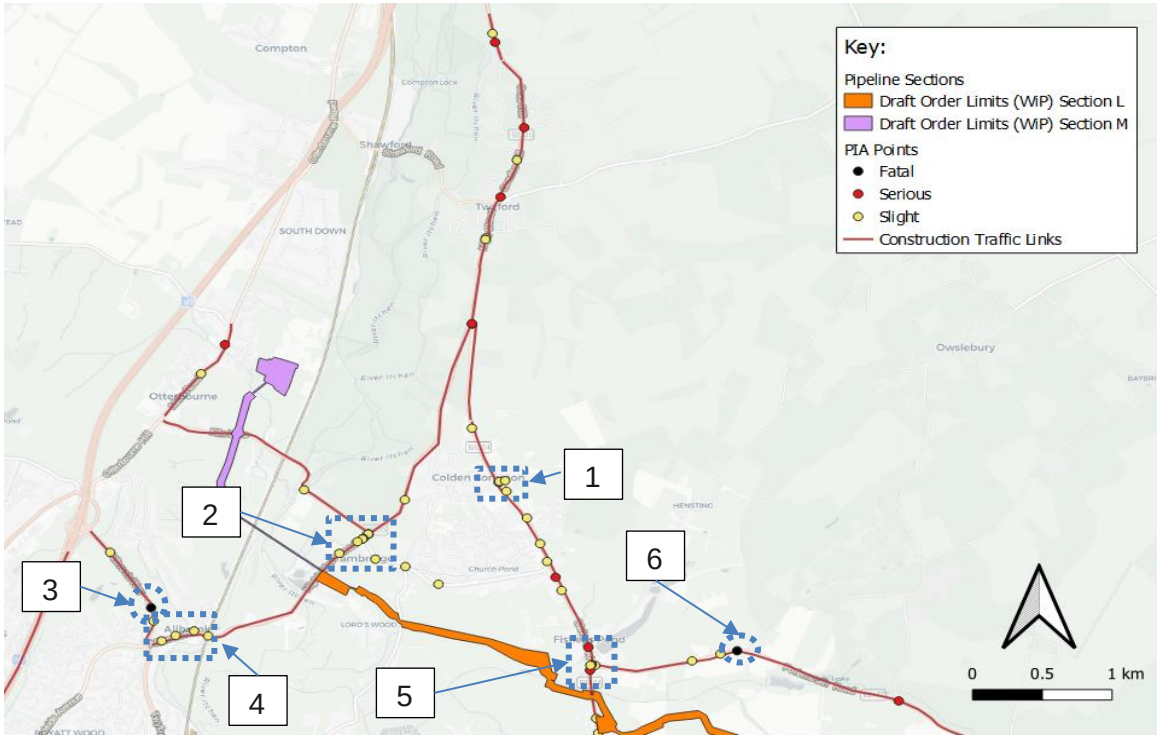

Figure 3-13 PIA Incidents: Otterbourne and Colden Common

Table 3-1 PIA Incident Summary: Otterbourne and Colden Common

PIA Ref	Incident Overview	Road/Junction
1	Cluster of four slight incidents	B3354 Main Road/Spring Lane/Francis Copse Priority Junction
2	Cluster of six slight and three serious incidents	B3335 Highbridge Road/Kiln Lane/Church Lane Staggered Crossroads
3	Fatal incident	A335 Allbrook Way
4	Cluster of four slight incidents	A335 Allbrook Way/Allbrook Hill Roundabout
5	Cluster of two slight and three serious incidents	B3354 Main Road/B2177 Portsmouth Road Signalised Junction
6	Fatal incident	B2177 Portsmouth Road

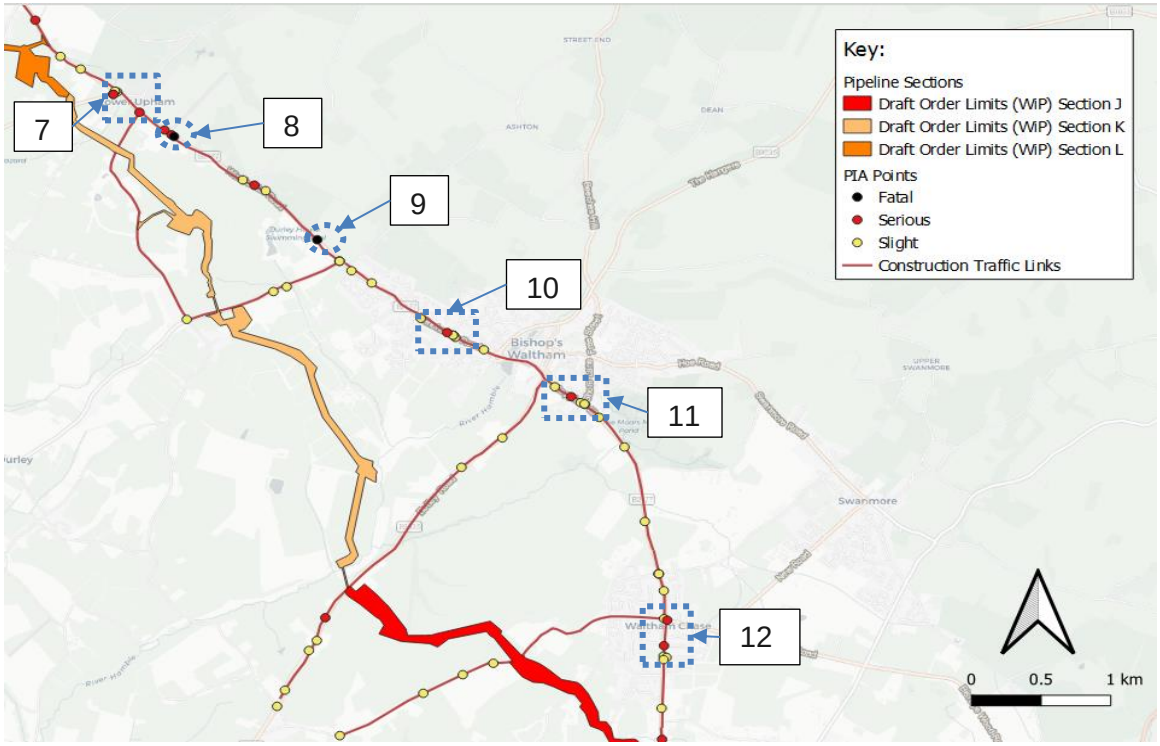

Figure 3-14 PIA Incidents: Lower Upham, Bishops Waltham and Waltham Chase

Table 3-2 PIA Incident Summary: Lower Upham, Bishop's Waltham and Waltham Chase

PIA Ref	Incident Overview	Road/Junction
7	Cluster of four slight and one serious incident	B2177 Winchester Road/B3037 Mortimers Lane Priority Junction
8	Fatal incident	B2177 Winchester Road
9	Fatal incident	B2177 Winchester Road

PIA Ref	Incident Overview	Road/Junction
10	Cluster of three slight and two serious incidents	B2177 Winchester Road/Claylands Road/Victoria Road Crossroads
11	Cluster of four slight and one serious incident	B2177 Coppice Hill/Shore Lane Priority Junction
12	Cluster of four slight and two serious incidents	B2177 Winchester Road

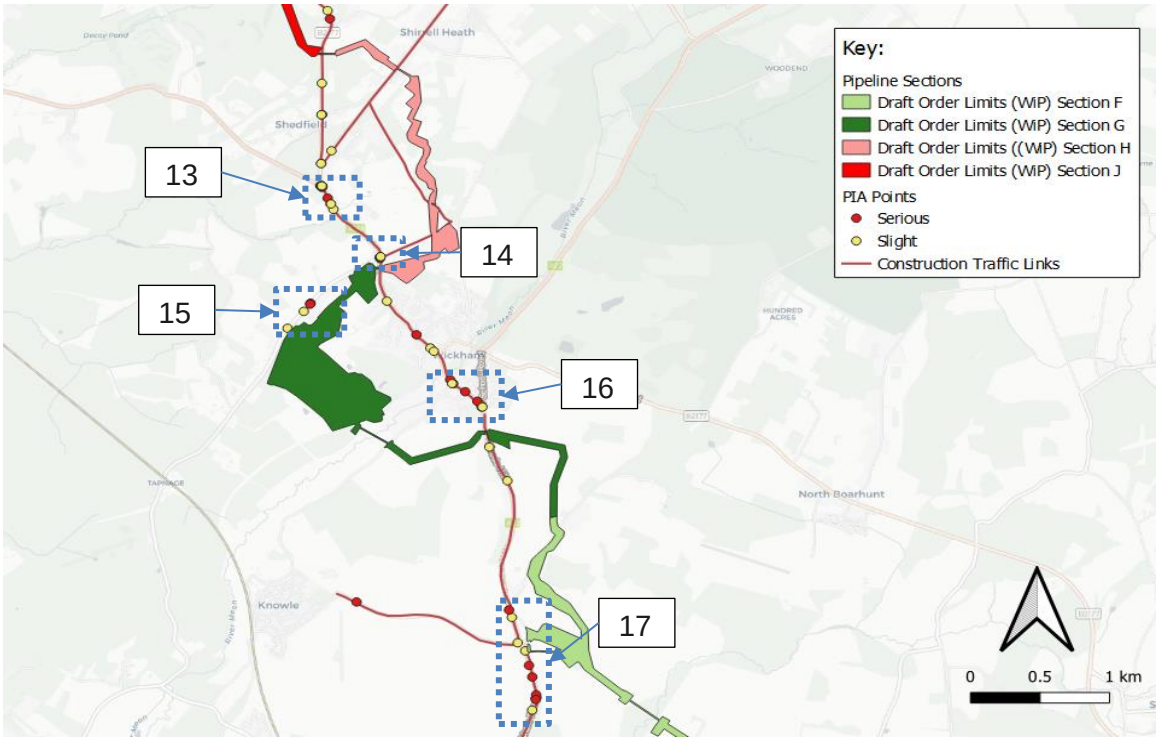

Figure 3-15 PIA Incidents: Shirrell Heath, Shedfield and Wickham

Table 3-3 PIA Incident Summary: Shirrell Heath, Shedfield and Wickham

PIA Ref	Incident Overview	Road/Junction
13	Cluster of 14 slight and three serious incidents	A334 Winchester Road/B2177 Winchester Road Priority Junction
14	Cluster of two slight and two serious incidents	A334 Winchester Road/Titchfield Lane/Blind Lane Signalised Junction
15	Cluster of two slight and two serious incidents	Titchfield Lane adj. to Park Place Farm Nursery
16	Cluster of four slight and four serious incidents	A334 Fareham Road/A32 Hoad's Hill Roundabout
17	Cluster of four slight and five serious incidents	A32 Wickham Road adj. to A32 Wickham Road/Knowle Road Roundabout

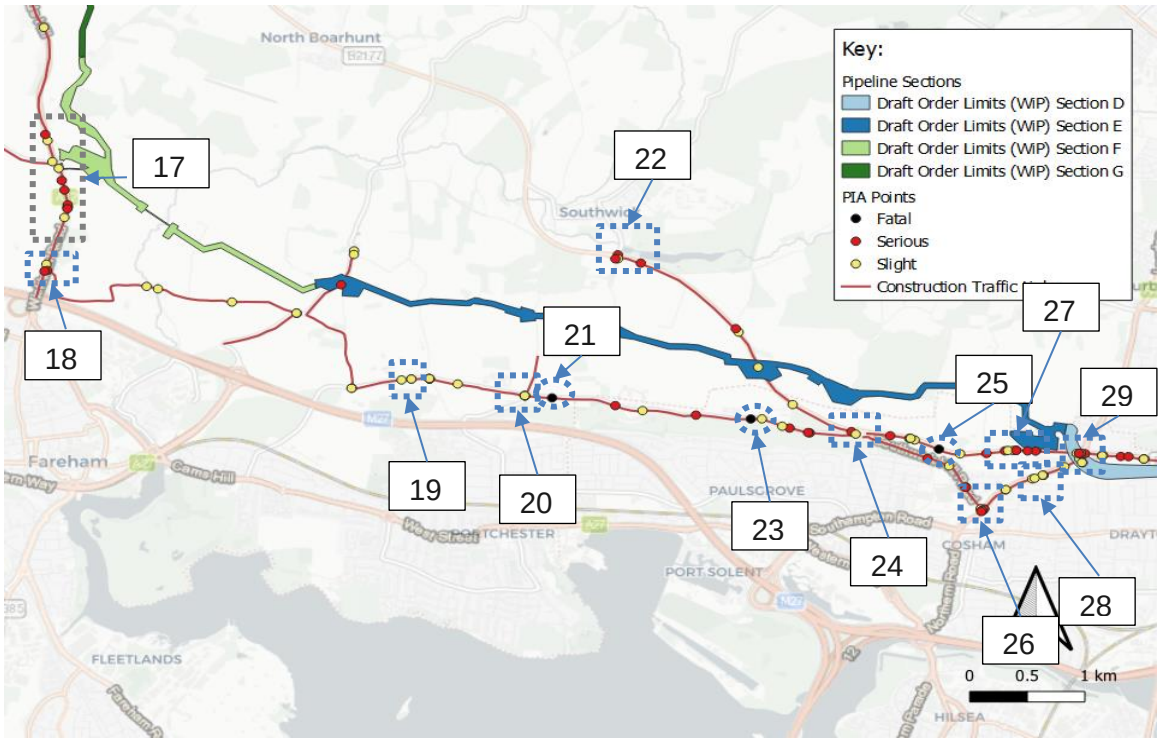

Figure 3-16 PIA Incidents: Portsdown Hill

Table 3-4 PIA Incident Summary: Portsdown Hill

PIA Ref	Incident Overview	Road/Junction
18	Cluster of one slight and two serious incidents	A32 Wickham Road/Pook Lane Priority Junction
19	Cluster of four slight and one serious incident	Portsdown Hill Road/Monument Lane/Nelson Lane Crossroads
20	Cluster of four slight incidents	Portsdown Hill Road/Portchester Lane/Skew Road Crossroads
21	Fatal Incident	Portsdown Hill Road
22	Cluster of one slight and three serious incidents	B2177 Southwick Road/High Street Roundabout
23	Fatal Incident	James Callaghan Drive
24	Cluster of four slight and one serious incident	Portsdown Hill Road/Pigeon House Lane/Mill Lane Staggered Crossroads
25	Fatal Incident	Portsdown Hill Road
26	Cluster of six slight and four serious incidents	B2177 Southwick Road/A3 London Road Signalised Junction
27	Cluster of three slight and five serious incidents	Portsdown Hill Road adjacent to junction with Widley Walk
28	Cluster of five slight incidents	A3 London Road/Cliffdale Gardens Priority Junction
29	Cluster of six slight and two serious incidents	B2177 Portsdown Hill Road/A3 London Road Priority Junction

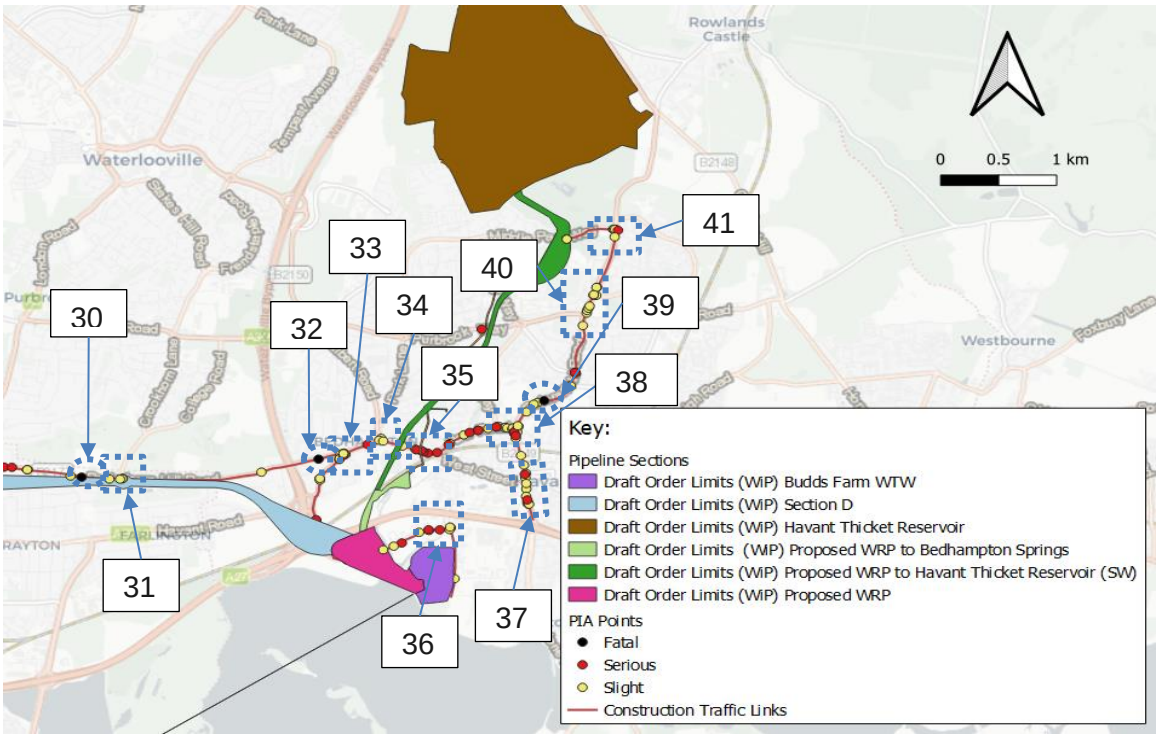

Figure 3-17 PIA Incidents: Havant

Table 3-5 PIA Incident Summary: Havant

PIA Ref	Incident Overview	Road/Junction
30	Fatal Incident	B2177 Portsdown Hill Road
31	Cluster of three slight and one serious incident	B2177 Portsdown Hill Road/College Road Priority Junction
32	Fatal Incident	B2177 Portsdown Hill Road
33	Cluster of six slight and three serious incidents	Belmont Junction (B2177 Portsdown Hill Road/ B2177 Bedhampton Hill Roundabout)
34	Cluster of three slight incidents	B2177 Bedhampton Road/B2150 Hulbert Road Signalised Junction
35	Cluster of three slight and six serious incidents	B2150 Bedhampton Road/B2149 New Road/West Street Priority Junction
36	Cluster of two slight and two serious incidents	Harts Farm Way/Brockhampton Road/Brookside Road/Southmoor Lane Roundabout
37	Cluster of four slight and one serious incidents	Park Row South/Solent Road Signalised Junction
38	Cluster of 13 slight and two serious incidents	New Road Roundabout
39	Fatal Incident	B2149 Petersfield Road
40	Cluster of seven slight and two serious incidents	B2149 Petersfield Road

PIA Ref	Incident Overview	Road/Junction
41	Cluster of five slight and one serious incident	B2149 Petersfield Road/Middle Park Way Priority Junction

3.4.5 Stage 1 of the PIA Analysis has identified 40 notable PIA incidents or clusters within the study area. PIA data will be obtained from Hampshire Constabulary, and a detailed analysis of this data will be presented within the TA.

4 Accessibility by Sustainable Modes

4.1 Introduction

4.1.1 This chapter of the TASR presents an audit of the local transport network for sustainable modes of transport, including walking, cycling, horse-riding, bus and rail.

4.1.2 As previously noted, the study area encompasses Southern Hampshire and Portsmouth and is bound by Winchester and Petersfield in the north, the B2149 and Havant to the east, the M27/A27 in the south, Langstone to the south-east and the M3 in the west.

4.2 Walking and Cycling

4.2.1 This section presents an audit of the walking and cycling routes (including Public Rights of Way) that are likely to be impacted by the Proposed Development. Given the large geographical scale of the Proposed Development, this audit has been split to reflect the pipeline sections, as illustrated in Figure 1-1.

Sections A and B

4.2.2 Sections A and B of the proposed Underground Pipeline comprise of the tunnel between the proposed WRP and Havant Thicket Reservoir. As shown in Figure 4-1 below, the tunnel would route below Havant. A second 'combined tunnel' option is also shown.

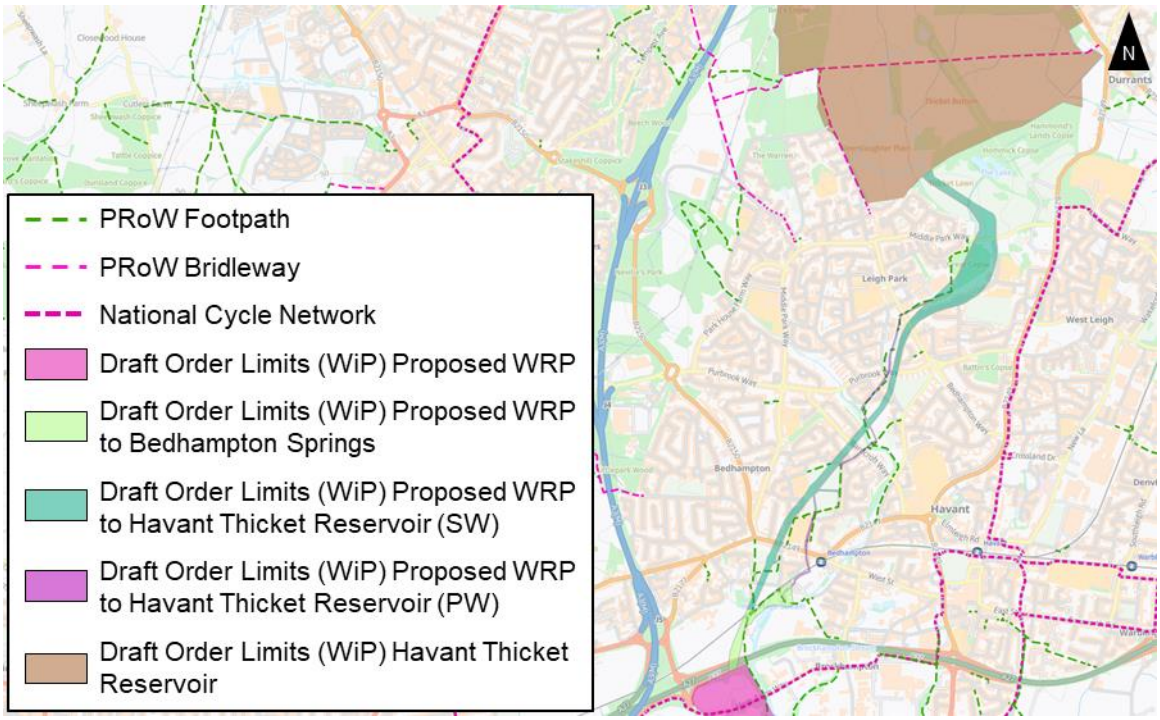

Figure 4-1 NCN and Public Rights of Way – Sections A and B

Walking

4.2.3 Sections A and B of the proposed Underground Pipeline encompass a number of predominantly residential roads within Havant, including Barncroft Way, Purbook Way and Dunsbury Way. Pedestrian provision on these roads is generally of a good standard, with footways typically present on both sides of the carriageway to serve the frontages of dwellings. On these residential roads, car parking is catered for by dedicated lay-bys which are segregated from the adjacent footways (see Figure 4-2 below).

Figure 4-2 Footways on Barncroft Way (source: Google)

4.2.4 Formal pedestrian crossing points are provided plentifully throughout Havant, with crossing types varying between simple uncontrolled pedestrian crossings with dropped kerbs and tactile paving, to pedestrian refuge island crossing points (Figure 4-3) and signalised crossings complete with a pedestrian phase.

Figure 4-3 Pedestrian Refuge Island Crossing on Dunsbury Way (source: Google)

4.2.5 To the north, pedestrian provision on Middle Park Way is generally adequate, with footways present on both sides of the carriageway serving the frontages of dwellings.

4.2.6 There are also a series of footpaths within High Lawn and Thicket lawn. These footpaths provide pedestrian connections to Havant Thicket and the Staunton Country Park.

Public Rights of Way Network

4.2.7 Table 4-1 provides an overview of the PRoW network within the vicinity of Sections A and B of the proposed Underground Pipeline.

Table 4-1 Public Rights of Way – Sections A and B

PRoW	Overview
Havant: 45/2	Medium-length route connecting Harts Farm Way to other PRoWs at the bank of Broad Lake
Havant: 30/1	Medium-length route connecting PRoWs to Harts Farm Way. Route includes a footbridge over the A27 (t)
Havant: 30/2	Short link route connecting Bidbury Lane to other PRoWs. Route includes a link over the West Coastway Railway Line
Havant: 30/3	Medium-length route providing a link between Harts Farm Way and the car parks at the bank of Broad Lake
Havant: 34/1	Short link route connecting various PRoWs
Havant: 34/5	Short link route connecting various PRoWs
Havant: 40/1	Short link route connecting Hook's Farm Way to Havant: 40/2
Havant: 40/3	Short link route connecting Bedhampton Road to Havant: 40/2
Havant: 507/1	Short link route connecting North Street to other PRoWs
Havant: 44/1	Short link route connecting Hook's Lane to Hook's Farm Way
Havant: 506a/1	Short link route connecting Purbrook Way to Ellisfield Road
Havant: 506b/1	Short link route connecting Corhampton Crescent to other PRoWs
Havant: 506b/4	Short link route connecting Corhampton Crescent to Purbrook Way
Havant: 33/2	Short link route connecting Stockheath Lane to other PRoWs
Havant: 505/2	Short link route connecting various PRoWs
Havant: 505/1	Short link route connecting Dunsbury Way and Middle Park Way
Havant: 121/1	Medium-length bridleway route connecting Havant: 120/2 and Meadow Place
Havant: 120/2	Short link bridleway route connecting various bridleways and PRoWs
Havant: 120/3	Short link bridleway route connecting various bridleways

PRoW	Overview
Rowlands Castle: 29/1	Short link bridleway route connecting Manor Lodge Road to Havant: 120/3

4.2.8 Although not a designated PRoW, the Denmead to Emsworth section of the Wayfarers Walk utilises a section of Bedhampton Road before passing through Brockhampton to the south. The Wayfareres Walk is a 70-mile, long-distance walking route from Inkpen to Emsworth Harbour.

Cycling

4.2.9 Local roads within Havant are considered suitable for cycling in line with LTN 1/20 guidance[1] as set out in Figure 4-4 below.

Figure 4-4 Appropriate protection from motor traffic on highways (LTN 1/20)

4.2.10 This Guidance advises that cyclists of all abilities would likely be comfortable mixing with traffic on roads with low-speed limits and low traffic volumes. This criterion fits many of the residential roads within Havant. Some of the busier roads however, such as Purbrook Way and Middle Park Way, do not match these criteria and lack dedicated continuous cycling facilities. As such, only more experienced cyclists would likely be confident mixing with traffic.

4.2.11 To the south of the proposed Underground Pipeline between the Proposed WRP and Havant Thicket Reservoir, the NCN Route 22 traverses the southern boundary of the A27 and passes along Harts Farm Way. The NCN 22 bisects Havant in a

[1] Local Transport Note 1/20, Department for Transport, July 2020 (accessed from: https://www.gov.uk/government/publications/cycle-infrastructure-design-ltn-120)

north/south alignment, passing Havant railway station to the north-east. NCN 22 also provides a connection to NCN 2 to the east, which goes on to link to Hayling Island to the south and Chichester to the east.

4.2.12 The NCN Route 22 off-road link on Harts Farm Way comprises a shared use footway/cycleway segregated from the carriageway by a narrow grass verge.

4.2.13 There are also on-road advisory cycle lanes on either side of the carriageway on Middle Park Way in the immediate vicinity of Section A.

Section C

4.2.14 The Public Rights of Way and cycle infrastructure in the vicinity of the proposed WRP are shown in Figure 4-5 below.

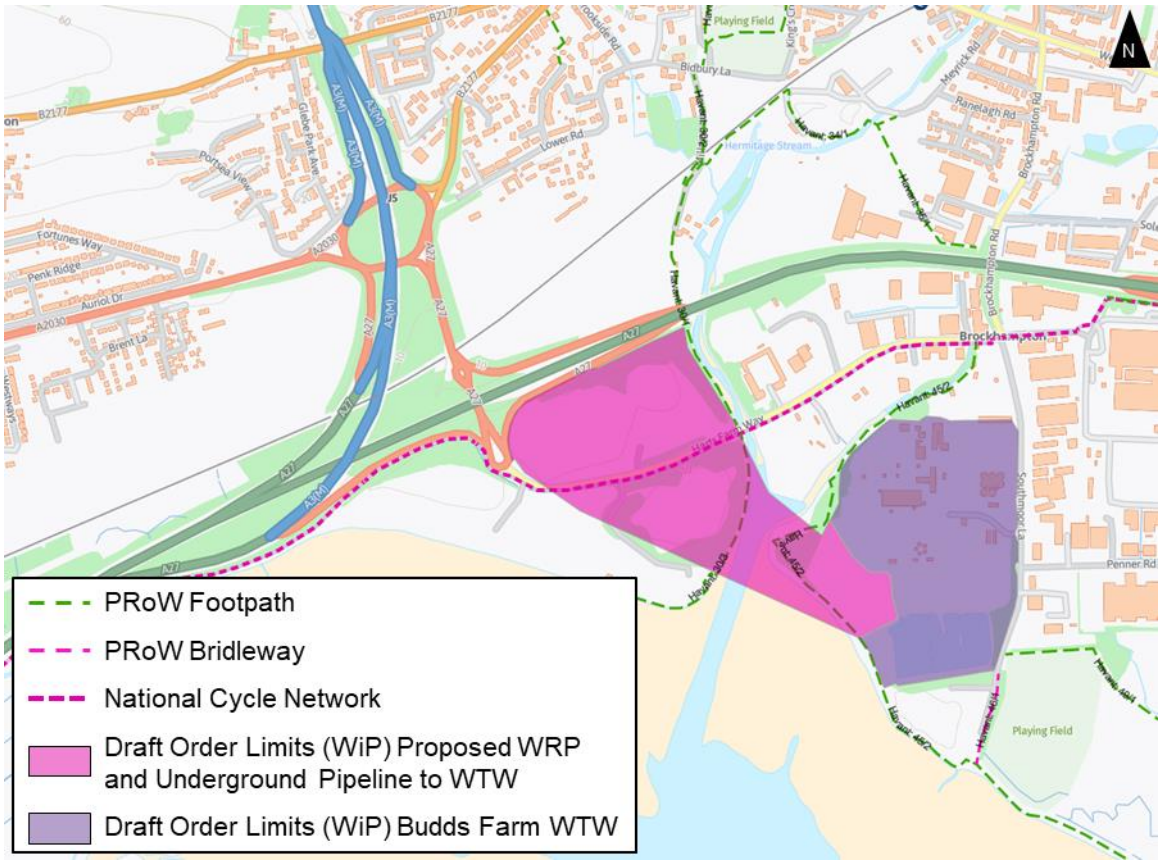

Figure 4-5 NCN and Public Rights of Way – Section C

Walking

4.2.15 A footway is provided along the southern side of the carriageway at Harts Farm Way in the immediate vicinity of the proposed WRP. Dropped kerb and tactile paving crossings provide a continuous connection to the Langstone Technology Park to the east.

4.2.16 To the west, a continuous off-road shared footway/cycleway provides a connection to Farlington Marshes approximately 2.8km west of the proposed WRP.

4.2.17 A pedestrian footway bounds the proposed WRP site to the west, measuring approximately 125m. To the north, a signalised pedestrian crossing provides access to the off-road footway to the west of the A2030. The footway then

terminates to the north, at which point it does not tie into any other existing infrastructure.

Public Rights of Way Network

4.2.18 There are two PRoW's within the vicinity of the proposed WRP and Section C of the proposed Underground Pipeline. This includes Havant 30/3 which provides a connection along the west bank of the stream feeding into Brockhampton Mill Lake. This link runs along the eastern boundary of the proposed WRP and provides a connection across the A27 via a pedestrian footbridge.

4.2.19 The other link within the vicinity of Section C is the PRoW 'Havant 45/2' which provides a connection from Harts Farm Way on the eastern side of the stream feeding into the Brockhampton Mill Lake to the south of Brockhampton.

Cycling

4.2.20 The NCN Route 22 traverses the southern boundary of the A27 and passes through Harts Farm Way. The NCN Route 22 is a predominantly off-road link which, locally, provides a connection between Route 222 of the NCN to the west and Havant and Route 2 to the east. At Harts Farm Way, the link comprises a shared use footway/cycleway. It links to Farlington Marshes to the west and to the Langstone Technology Park to the east.

4.2.21 The NCN Route 22 off-road link on Harts Farm Way is shown at Figure 4-6. This section of the link comprises a shared use footway/cycleway segregated from the carriageway by a narrow grass verge.

Figure 4-6 Off-road Shared Use Cycleway on Harts Farm Way (source: Google)

Section D

4.2.22 The Public Right of Ways and NCN routes in the vicinity of Section D of the proposed Underground Pipeline is illustrated below in Figure 4-7.

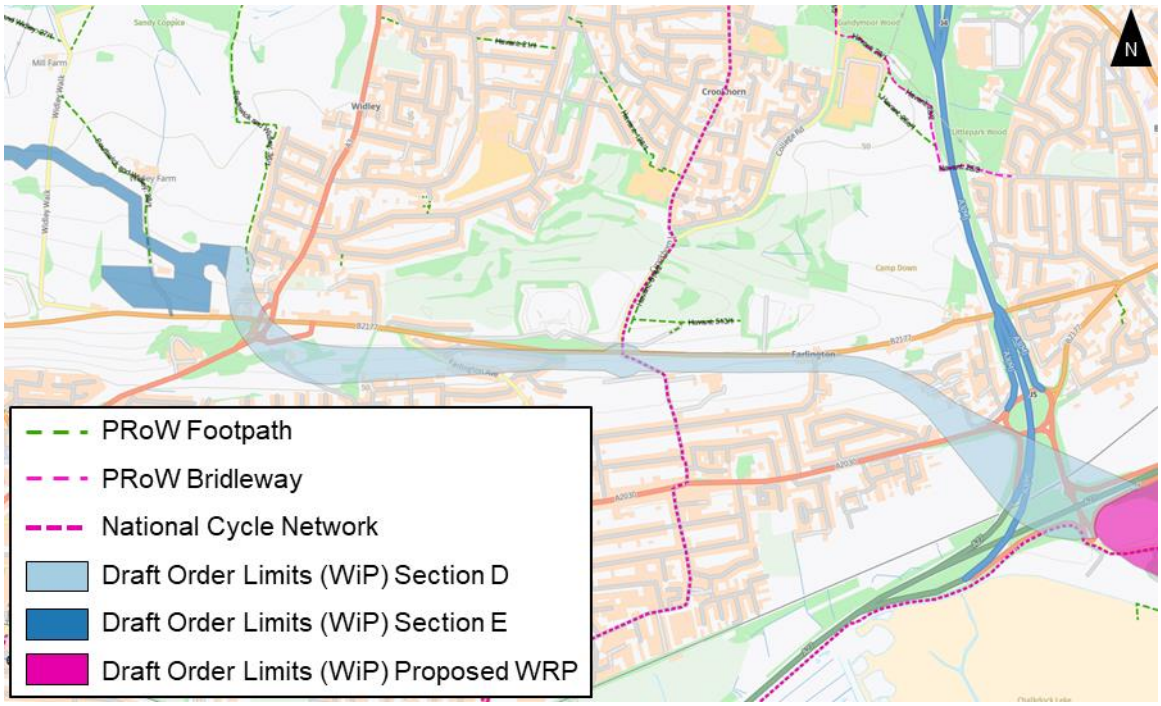

Figure 4-7 NCN and Public Rights of Way – Section D

Walking

4.2.23 Walking infrastructure within Section D largely comprises of footways provided along principal road links including B2177 Portsdown Hill Road, A3 London Road and Crookhorn Lane.

4.2.24 On the B2177 Portsdown Hill Road, pedestrian provision comprises of a footway along the northern side of the carriageway. To the east, this footway is segregated from the carriageway with a grass verge. A dropped kerb, uncontrolled crossing with a refuge island is provided at the junction with Crookhorn Lane. North of this crossing, a footway is provided on both sides of the carriageway to the north.

Figure 4-8 Pedestrian Provision at B2177 Portsdown Hill Road/Crookhorn Lane Junction (source: Google)

4.2.25 Continuous footway also connects the B2177 to the A3 London Road, though crossing provision at the junction between these two links is limited to intermittent provision of uncontrolled, dropped kerb crossing points.

Public Rights of Way Network

4.2.26 There are no PRoWs of note within the vicinity of Section D of the proposed Underground Pipeline with the exception of Southwick and Widley 36/1 which connects Widley to Purbrook Heath Road to the north. This route will be crossed by the proposed Underground Pipeline alignment.

Cycling

4.2.27 Route 222 of the NCN passes along Crookhorn Lane, crossing the B2177 Portsdown Hill Road in the vicinity of the proposed Underground Pipeline's southern route and Purbrook Way along the pipeline's northern route. Locally, this route provides a connection between Portsmouth to the south and Horndean to the north.

4.2.28 Except for the B2177 Portsdown Hill Road and the A3 London Road, local roads within the vicinity of Section D are generally lightly trafficked and suitable for cyclists to mix with vehicle traffic in line with LTN 1/20 guidance.

Section E

4.2.29 Section E of the proposed Underground Pipeline, alongside nearby Public Rights of Way and Routes of NCN are illustrated in Figure 4-9.

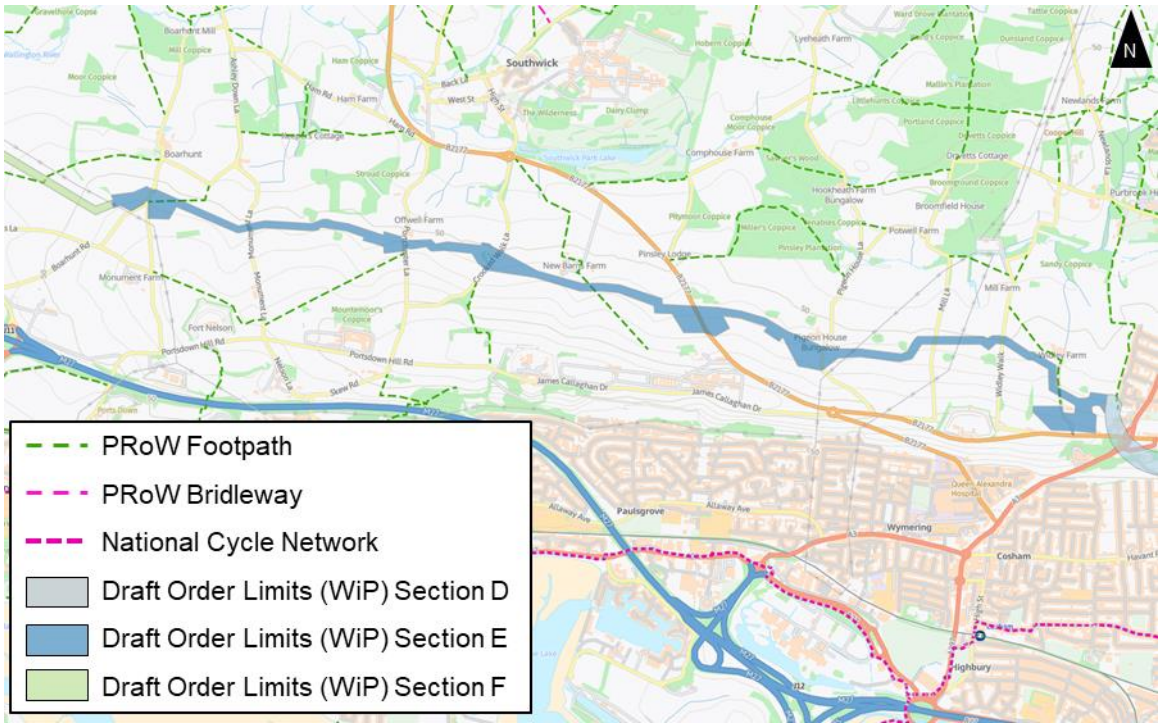

Figure 4-9 NCN and Public Rights of Way - Section E

Walking

4.2.30 Within Section E of the proposed Underground Pipeline there are several rural lanes which do not have dedicated pedestrian provision such as Crooked Walk Lane, Portchester Lane (see Figure 4-10) and Monument Lane. These roads are anticipated to accommodate a small number of pedestrian movements associated with access to dwellings, farms and PRoWs.

Figure 4-10 Portchester Lane (source: Google)

4.2.31 There is anticipated to be slightly more pedestrian demand along lanes in the vicinity of Fort Nelson and Nelson's Monument, which are located to the south of the study area. These two tourist attractions are likely to mostly be accessed by car, as reflected by car parking provision and a lack of pedestrian provision in the vicinity of them, however some trips may be taken by foot. There is limited

pedestrian infrastructure on roads to the north of these attractions including Monument Lane and Swivelton Lane which fall within Section E.

Public Rights of Way Network

4.2.32 Table 4-2 presents the PRoWs that are located within the corridor for Section E of the proposed Underground Pipeline.

Table 4-2 Public Rights of Way – Section E of the proposed Underground Pipeline

PRoW	Overview
Boarhunt: 14/1	Short link route connecting Boarhunt Road to Fareham: 107/1
Boarhunt: 15/1	Short link route connecting Boarhunt Road to other PRoWs
Boarhunt: 12/1	Short link route connecting Blackhouse Lane to Monument Lane
Boarhunt: 13/5	Short link route connecting various PRoWs
Boarhunt: 13/1	Short link route connecting Monument Lane to B2177 Southwick Road
Boarhunt: 16/1	Short link route connecting Ham Road to Monument Lane
Boarhunt: 19/1	Short link route connecting Boarhunt Road to Ashley Down
Boarhunt: 17/2	Short link route connecting Ham Road to other PRoWs
Southwick and Widley: 3/1	Short link route connecting B2177 Southwick Road to Portsdown Technology Park
Southwick and Widley: 28/1	Short link route connecting Widley Walk to New Down Lane via Widley Farm
Southwick and Widley: 36/1	Medium-length link connecting Purbrook Heath Road to Dellcrest Path

Cycling

4.2.33 There are no dedicated cycling facilities within Section E. With the exception of the B2177 Southwick Road and the A3 London Road, local roads within the vicinity of Section E are generally lightly trafficked and have low speed limits, and therefore can be considered conducive for cycles to mix with traffic in line with LTN 1/20.

4.2.34 Other links within Section E, including the B2177 Southwick Road and rural lanes with higher speed limits are considered unsuitable for mixed traffic cycling in line with LTN 1/20.

Sections F and G

4.2.35 Sections F and G of the proposed Underground Pipeline pass near Wickham and Knowle. The nearby Rights of Way and NCN routes are illustrated in Figure 4-11.

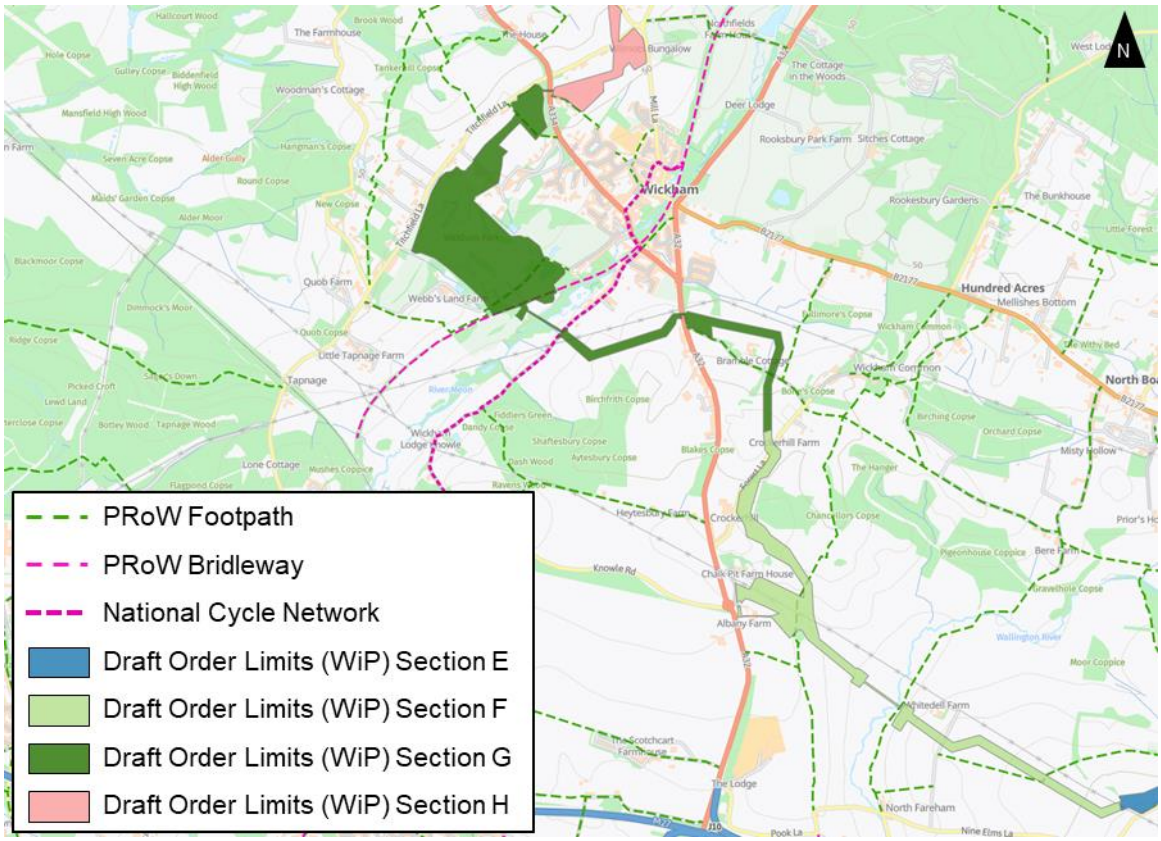

Figure 4-11 NCN and Public Rights of Way - Sections F and G

Walking

4.2.36 There is a footway on the west side of the A32 (Hoad's Hill/Wickham Road) approximately 1-2m in width, as shown in Figure 4-12 below. Crossing provision at local junctions along the A32 comprises of dropped kerb crossings with tactile paving and pedestrian refuge islands.

Figure 4-12 Footway Provision on Wickham Road and Crossing Provision at A32/Knowle Road (source: Google)

4.2.37 There are no dedicated pedestrian facilities on either Titchfield Lane, Mayles Lane or Forest Lane despite these links providing access to rural settlements (Knowle) and dwellings.

Public Rights of Way Network

4.2.38 Table 4-3 provides an overview of the PRoW network within the vicinity of Sections F and G of the proposed Underground Pipeline.

Table 4-3 Public Rights of Way – Sections F and G

PRoW	Overview
Wickham: 5/1	Short link route connecting Titchfield Lane to Tanfield Lane
Wickham: 501/1	Long bridleway route linking Wickham Lodge Knowle to Wickham
Wickham: 10/1	Short link route connecting A32 Hoad's Hill to Forest Lane
Fareham: 86/3	Short link route connecting Knowle Road to other PRoWs
Wickham: 9/1	Short link route connecting Forest Lane to other PRoWs
Fareham: 101/1	Short link route connecting Nine Elms Lane to other PRoWs
Fareham: 102/1	Short link route connecting A32 Wickham Road to other PRoWs
Fareham: 103/1	Short link route connecting various PRoWs
Fareham: 104/1	Short link route connecting various PRoWs
Fareham: 104/2	Short link route connecting various PRoWs
Fareham: 105/1	Short link route connecting various PRoWs
Fareham: 104/2	Short link route connecting various PRoWs
Fareham: 106/1	Short link route connecting Nine Elms Lane to other PRoWs
Fareham: 107/1	Short link route connecting other PRoWs to Whitedell Farm
Boarhunt: 22/1	Short link route connecting other PRoWs to Bere Farm
Boarhunt 11/3	Short link route connecting B2177 Southwick Road to Bere Farm

Cycling

4.2.39 The Meon Valley trail is located to the north-east of Sections F and G of the proposed Underground Pipeline, though it is not directly affected by the Proposed Development. The trail provides a link north-east along a disused railway towards West Meon (see Figure 4-13). Though the Meon Valley Trail will not be directly affected by the Proposed Development, the bridleway referred to as 'Wickham 501/1', which provides a direct link from Wickham Lodge Knowle to the Trail, will be crossed by the pipeline alignment. This bridleway link is likely to be used by cyclists on the Meon Valley Trail.

Figure 4-13 Cyclist using the Meon Valley Trail

4.2.40 Route 224 of the NCN is located near the Proposed Development, commencing/terminating within Wickham. Locally, this is an on-road link between the finish point of the Meon Valley Trail to the north-east of Wickham and North Fareham to the south. Despite there being no dedicated cycle infrastructure, the link also utilises Mayles Lane, passing through Knowle.

Section H

4.2.41 Section H of the proposed Underground Pipeline, alongside nearby Public Rights of Way and Routes of NCN are illustrated in Figure 4-14 below.

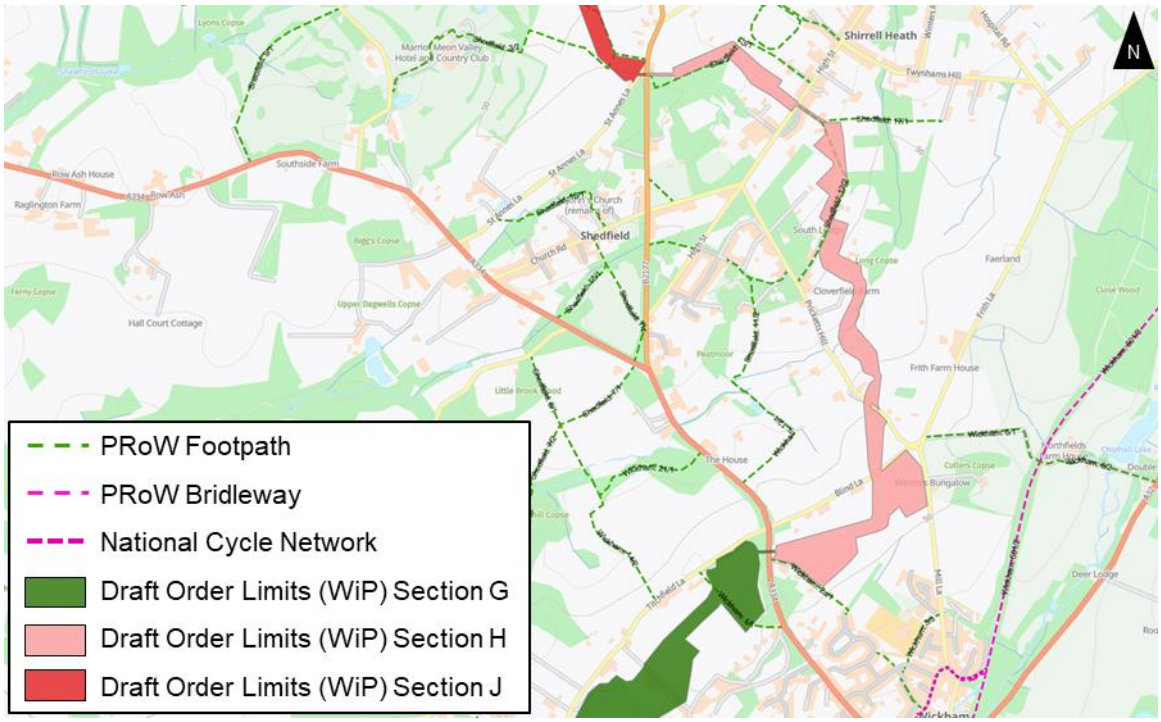

Figure 4-14 NCN and Rights of Way - Section H

Walking

4.2.42 Section H covers the A334 Winchester Road and the Shirrell Heath High Street – both of which include pedestrian footway and crossing provision.

4.2.43 The A334 Winchester Road and the Shirrell Heath High Street both contain pedestrian footway, the latter of which is shown at Figure 21. Despite the intermittent provision of footway along these roads, there is very limited provision of pedestrian crossing facilities even at notable junctions such as the A334/B2177 junction to the south of Section H.

Figure 4-15 Pedestrian Footway on Shirrell Heath High Street (source: Google)

4.2.44 Other minor roads including Pricketts Hill and Blind Lane do not have any pedestrian provision, with pedestrian movements expected to mix with traffic.

These routes primarily function to serve the frontages of residential dwellings, and do not accommodate significant pedestrian trip volumes.

Public Rights of Way Network

4.2.45 Table 4-4 provides an overview of the PRoW network within the vicinity of Section H of the proposed Underground Pipeline.

Table 4-4 Public Rights of Way – Section H

PRoW	Overview
Shedfield: 4/2	Short link route connecting PRoWs
Shedfield: 2/1	Short link route connecting PRoWs to Winchester Road
Shedfield: 3/2	Medium-length route connecting Sandy Lane to Winchester Road via the Marriot Meon Valley Hotel and Country Club
Shedfield: 13/1	Short link route connecting Winchester Road to High Street
Shedfield: 12/1	Short link route connecting High Street to other PRoWs
Shedfield: 12/2	Short link route connecting Pricketts Hill with High Street
Wickham: 12/1	Short link route connecting A334 Winchester Road with other PRoWs
Wickham: 14/2	Short link route connecting Blind Lane with other PRoWs
Wickham: 1/1	Short link route connecting A334 Winchester Road to Blind Lane

Cycling

4.2.46 There is a lack of dedicated cycle infrastructure within the vicinity of Section H. Links such as Blind Lane, Pricketts Hill and Shirell Heath High Street are generally lightly trafficked routes, however given that they have higher speed limits, they are generally unsuitable for cyclists to mix with traffic in line with LTN 1/20 guidance.

4.2.47 Other links are of an arterial nature, including the A334 Winchester Road and the B2177 Winchester Road. These routes do not have any dedicated cycle infrastructure and are not suitable for cyclists of any ability.

Section J

4.2.48 Section J of the proposed Underground Pipeline passes near Waltham Chase and Shedfield. The nearby Public Rights of Way and NCN routes are illustrated in Figure 4-16.

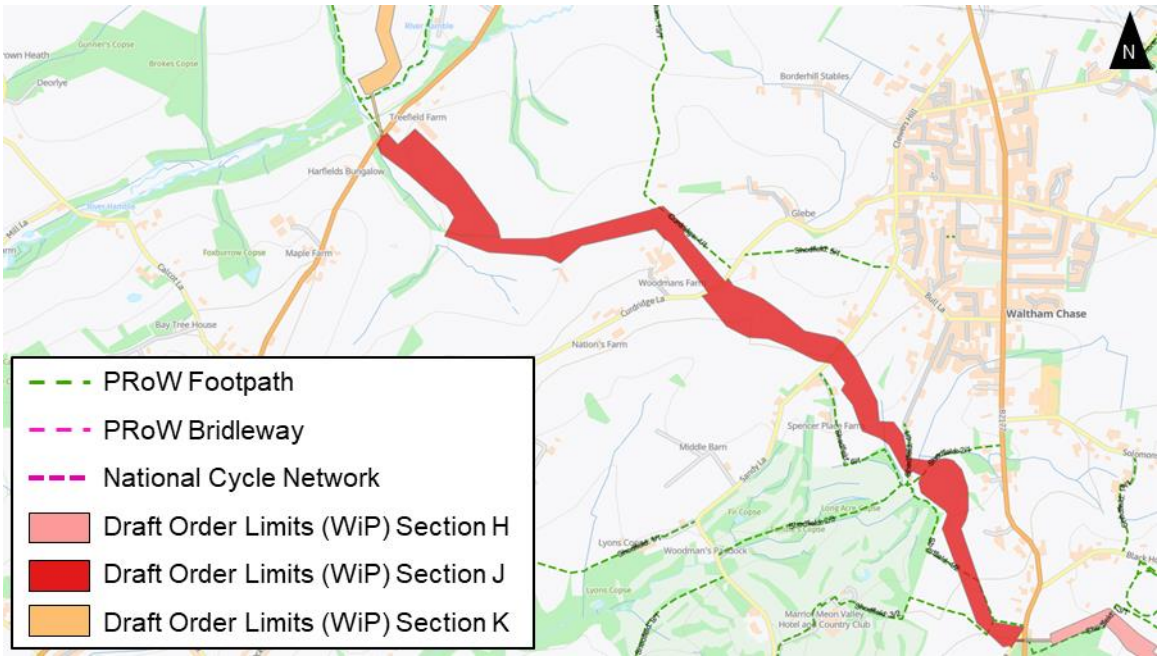

Figure 4-16 NCN and Public Rights of Way - Section J

Walking

4.2.49 Section J encompasses rural lanes that are primarily used for access, including Sandy Lane and Curdridge Lane. In addition, arterial routes including the B3035 Botley Road and the B2177 Winchester Road provide connectivity at a district level. There is intermittent provision of footway along these roads and there are limited pedestrian crossing facilities, even at larger junctions such as the A334/B2177 junction north of Section J.

4.2.50 Other roads within the vicinity of Section J of the proposed Underground Pipeline such as Pricketts Hill, Sandy Lane and Curdridge Lane provide access to the frontages of dwellings and accommodate a low volume of pedestrian movements associated with this use, with pedestrians expected to share the carriageway with traffic.

Rights of Way Network

4.2.51 Table 4-5 provides an overview of the PRoW network within the vicinity of Section J of the proposed Underground Pipeline.

Table 4-5 Public Rights of Way – Section J

PRoW	Overview
Bishops Waltham: 502/1	Short link route connecting Bishops Waltham: 44/1 to Brooklands Farm
Bishops Waltham: 44/1//44/2	Short link route connecting Bishops Waltham 502/1 to B3035 Botley Road
Curdridge: 4/1	Short link route connecting Bishops Waltham 13/1 to Curdridge Lane
Shedfield: 6/1	Short link route connecting Sandy Lane to other PRoWs

PRoW	Overview
Shedfield: 4/1	Short link route connecting Little Bull Lane to other PRoWs

Cycling

4.2.52 There is no dedicated cycling infrastructure within the vicinity of Section J. In the absence of any dedicated infrastructure, it is considered that some parts of local roads with lower speed limits and traffic volumes, including Sandy Lane and Curdridge Lane, are conducive for cyclists of all abilities. However, given that Section J covers a generally rural area, many rural roads have high speed limits despite being lowly trafficked, meaning that it is unsuitable for cycles to mix with traffic on these routes.

4.2.53 Arterial links within the vicinity of Section J, such as the B3035 Botley Road and the B2177 Winchester Road are subject to high traffic volumes and speeds. There are also some rural roads within Section J that are subject to the national speed limit. Instead, it is assumed that these routes are only suitable for more experienced cyclists in line with LTN 1/20 guidance.

Section K

4.2.54 Section K of the proposed Underground Pipeline, alongside nearby Public Rights of Way and Routes of NCN are illustrated in Figure 4-17 below.

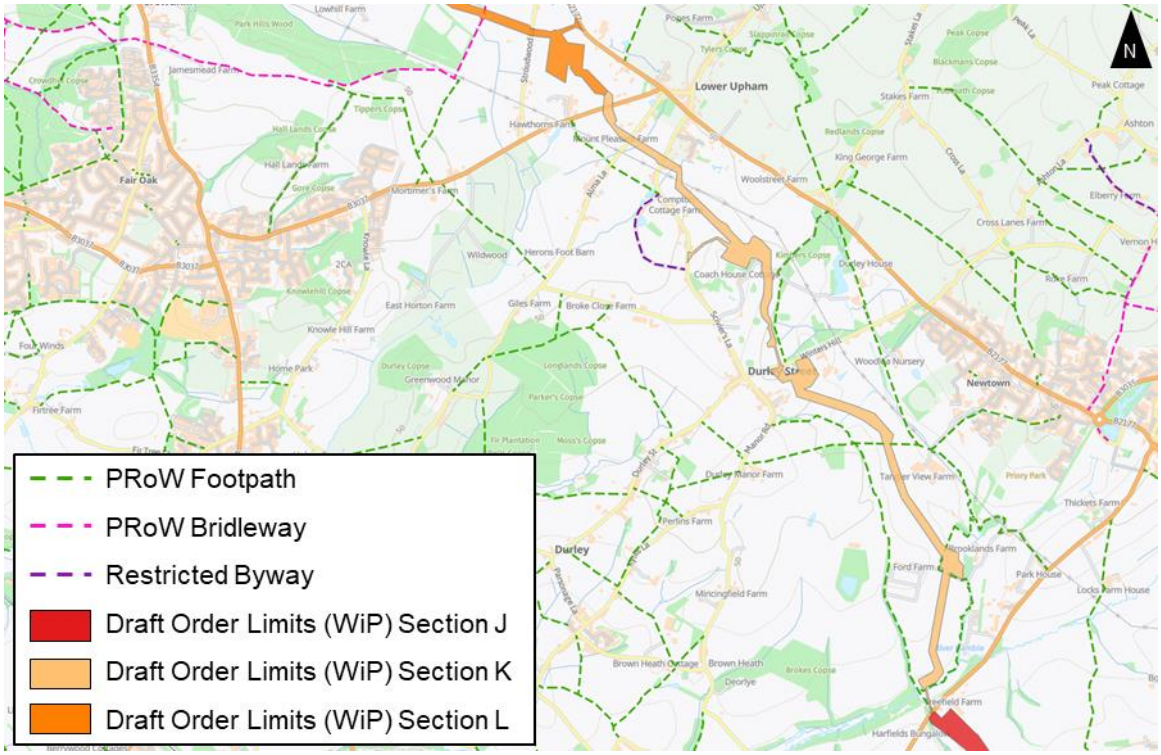

Figure 4-17 NCN and Public Rights of Way - Section K

Walking

4.2.55 There are four roads in the immediate vicinity of Section K; Winters Hill, Scriviers Lane, Alma Lane and the B3037 Mortimers Lane, with the latter previously described within Section M of the proposed Underground Pipeline.

4.2.56 Overall, there is limited pedestrian infrastructure near Section K of the proposed Underground Pipeline, with pedestrians generally expected to mix with traffic on quieter roads including Winters Hill, Alma Lane and Scriviers Lane (Figure 4-18).

Figure 4-18 Scriviers Lane (source: Google)

Public Rights of Way Network

4.2.57 Table 4-6 provides an overview of the PRoW network within the vicinity of Section K of the proposed Underground Pipeline.

Table 4-6 Public Rights of Way – Section K

PRoW	Overview
Upham: 20/1	Short link route connecting B2177 Winchester Road to Durley 20/1
Durley: 20/1	Short link route connecting Winters Hill to Upham: 20/1
Bishops Waltham: 42a/1	Short link route connecting Winchester Road to Winters Hill
Bishops Waltham: 42a/2	Short link route connecting Winters Hill to Tangier View Farm
Bishops Waltham: 43/2	Short link route connecting Tangier View Farm to other PRoWs

Cycling

4.2.58 There is little by way of existing cycle infrastructure within Section K of the proposed Underground Pipeline. Local lanes including Winters Hill, Scriviers Lane and Alma Lane are rural roads which generally accommodate low volumes of

traffic. Many of these roads within Section K also have lower speed limits of 30 mph, and as such it is considered appropriate for most cyclists to mix with traffic within these roads in line with LTN 1/20 guidance.

4.2.59 For other roads, which are subject to high traffic volumes and higher speed limits, including the B3037 Mortimers Road, B2177 Winchester Road and B3035 Botley Road, these links are not suitable for most cyclists as per LTN 1/20 guidance.

Section L

4.2.60 Section L of the proposed Underground Pipeline includes Colden Common, Fair Oak and Lower Upham. The nearby Public Rights of Way and NCN routes are illustrated in Figure 4-19.

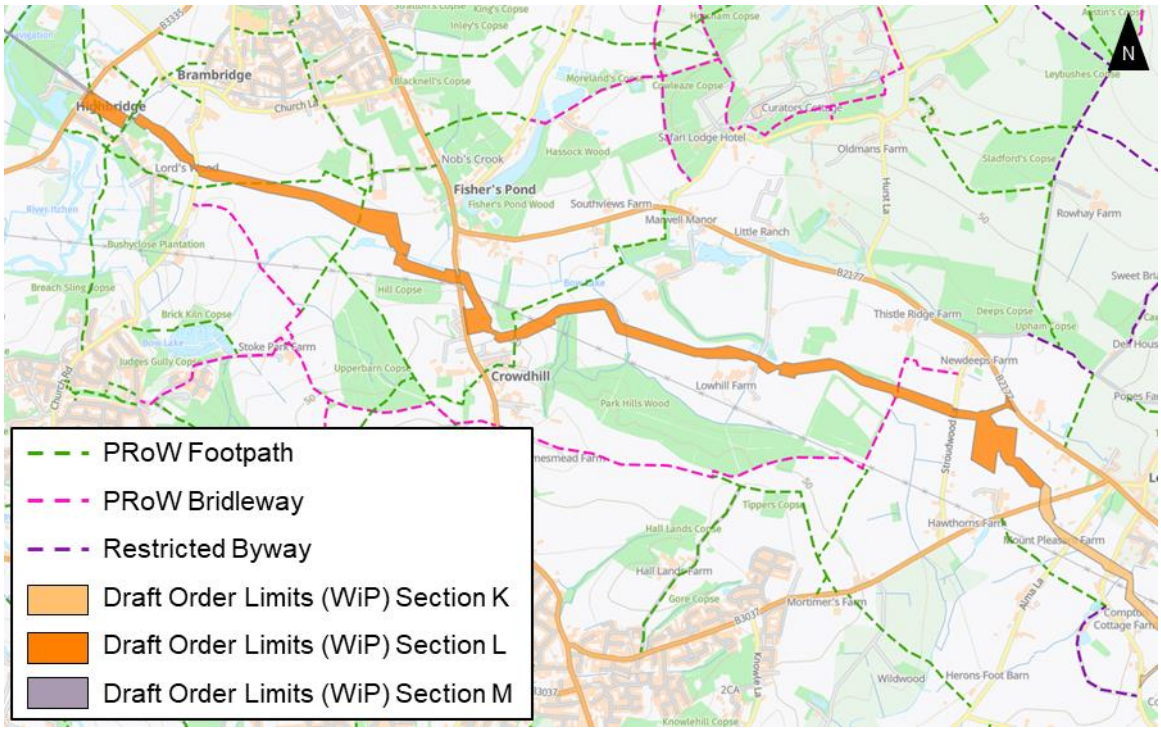

Figure 4-19 NCN and Rights of Way - Section L

Walking

4.2.61 There is a footway on the west side of the B3354 Winchester Road, approximately 2m in width. At the junction with the B2177 Portsmouth Road junction at Fisher's Pond, there is a signal-controlled pedestrian crossing on Winchester Road, as shown in Figure 4-20. The crossing links footway on either side of the B3354 Winchester Road, though there is no pedestrian provision at the B2177 Portsmouth Road arm despite the presence of footway at this location.

Figure 4-20 Signal Controlled Crossing on the B3354 Winchester Road (source: Google)

4.2.62 The B3037 Mortimers Lane is a primary vehicular route to/from Lower Upham. There is no dedicated pedestrian infrastructure on this link and given this coupled with the high volume and speeds of vehicles on this link, pedestrians are unlikely to frequently utilise this link.

4.2.63 The B2177 Portsmouth Road also has little by way of pedestrian facilities, with sparse intermittent provision throughout. Pedestrian facilities on the B335 Highbridge Road have been described previously within text accompanying Section M of the proposed Underground Pipeline.

4.2.64 Bishopstoke Lane, which is located to the north of Section L in the vicinity of Brambridge, is a rural country lane with no pedestrian provision.

Public Rights of Way Network

4.2.65 Table 4-7 provides an overview of the PRoW links that are located near Section L of the proposed Underground Pipeline.

Table 4-7 Public Rights of Way – Section L

PRoW	Overview
Colden Common: 2a/1	Short link route connecting B3335 Highbridge Road to other PRoWs
Colden Common: 6/1	Short link route connecting B3335 Highbridge Road to other PRoWs
Colden Common: 7/1	Short link route connecting Church Lane to Bishopstoke Lane
Colden Common: 8/1//8/4	Short link route connecting Church Lane to Upper Moors Road
Colden Common: 9/1	Short link route connecting B3335 Highbridge Road to Upper Moors Road

PRoW	Overview
Colden Common: 5/2	Short link route connecting Lordswood to Church Lane
Colden Common: 21/1	Medium-length route connecting Bishopstoke Lane with other PRoWs
Colden Common: 22/1	Short link route connecting Church Lane to Fisher's Pond
Colden Common: 23/2	Short link route connecting PRoWs
Colden Common: 22/3	Short link route connecting PRoWs
Fair Oak and Horton Heath: 27/1	Short link route connecting B3354 Winchester Road to other PRoWs
Fair Oak and Horton Heath: 27/1	Short link route connecting B3354 Winchester Road to Colden Common: 30/1
Colden Common: 30/1	Short link route connecting Fair Oak and Horton Heath: 27/1 to B2177 Portsmouth Road
Fair Oak and Horton Heath: 23/1	Short bridleway link connecting Stroudwood Lane to a series of other PRoWs

Cycling

4.2.66 Though there are no NCN links in the vicinity of Lower Upham, advisory on-road cycle lanes are provided intermittently on the B2177 Portsmouth Road as well as the B3354 Winchester Road to the north of the junction with B2177 Portsmouth Road (Figure 19). Given that provision of these advisory cycle lanes is sporadic, less experienced cyclists are unlikely to choose to cycle on the B2177 and B3354 as they would have to routinely mix with other traffic on what can be described as busy roads.

Figure 4-21 On-road Advisory Cycle Lane on B3354 Winchester Road

Section M

4.2.67 Section M of the proposed Underground Pipeline, alongside nearby Public Rights of Way and Routes of National Cycleway Network (NCN) are illustrated in Figure 4-22 below.

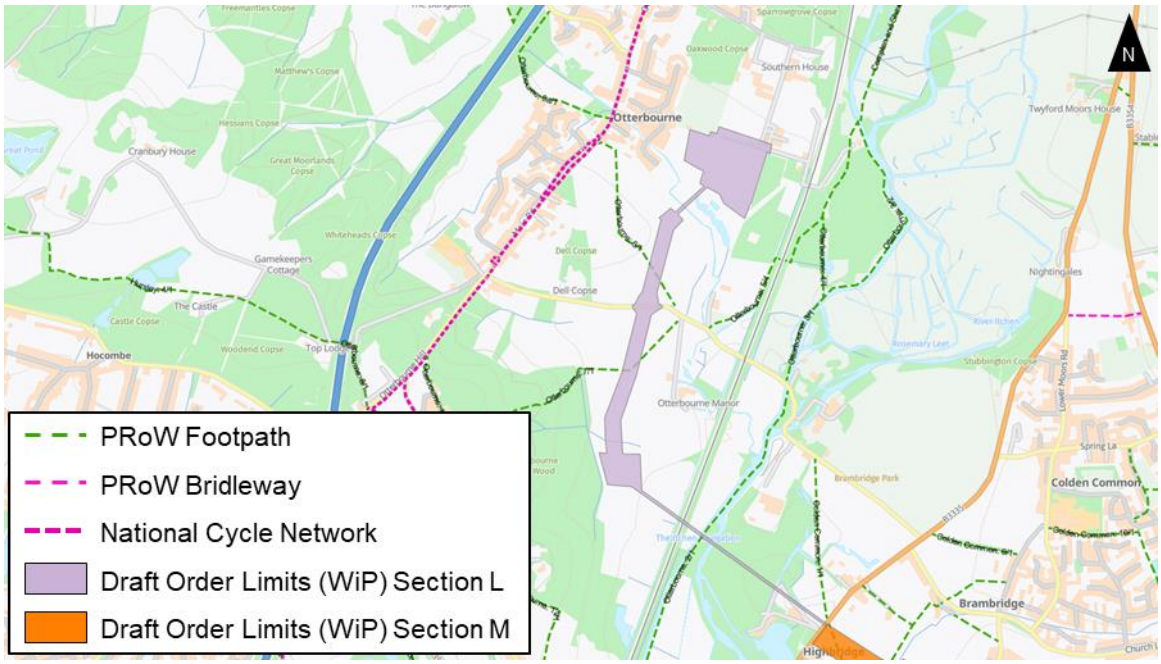

Figure 4-22 NCN and Public Rights of Way - Section M

Walking

4.2.68 Within the vicinity of the proposed Underground Pipeline, pedestrian footways permeate the southern side of Church Lane and Brambridge, whilst formal pedestrian crossing facilities are provided intermittently along Church Lane/Brambridge. The footway provision along these links is shown at Figure 4-23, with crossing provision pictured at Figure 4-24.

Figure 4-23 Footway Provision on Church Lane (source: Google)

4.2.69 The Otterbourne Main Road bisects Otterbourne in a north/south alignment. The Main Road has pedestrian footway on either side of the carriageway and features

uncontrolled pedestrian crossing points at junctions with local roads (including Kiln Lane).

4.2.70 The B3335 Highbridge Road provides a connection between Brambridge/Colden Common and north Eastleigh. It has a circa 1.8m wide pedestrian footway on the southern side of the carriageway to accommodate pedestrian movements.

Figure 4-24 Footway Provision on Brambridge (source: Google)

4.2.71 In general, the areas of Otterbourne and Colden Common contain a network of footpaths and intermittent formal crossing provision that provides walking connectivity within each respective village.

4.2.72 These pedestrian networks are limited to just that however, with a lack of external/inter-village connectivity beyond the confines of Otterbourne and Colden Common respectively. This is evidenced by Kiln Lane, a key route in and out of Otterbourne, which as Figure 4-25 shows, does not contain any pedestrian facilities.

Figure 4-25 Kiln Lane near Otterbourne (source: Google)

Public Rights of Way Network

4.2.73 Table 4-8 provides an overview of the PRoW links that are located near Section M of the proposed Underground Pipeline.

Table 4-8 Public Rights of Way – Section M

PRoW	Overview
Otterbourne: 6/1	Short link route connecting Main Road to Kiln Lane
Otterbourne: 7/1	Short link route connecting Boyatt Lane to Kiln Lane
Otterbourne: 5/4	Short link route connecting Kiln Lane over the South Western Main Line towards Twyford
Otterbourne: 2/1	Medium-length route connecting Kiln Lane to B3335 Highbridge Road
Otterbourne: 3/1	Short link route connecting Otterbourne 3/1 to other PRoWs
Colden Common: 1/1	Short link route connecting Kiln Lane to B3335 Highbridge Road
Colden Common: 2a/1	Short link route connecting B3335 Highbridge Road to other PRoWs

4.2.74 In addition to these PRoWs, there is a well-used permissive footpath that links Otterbourne Village and the River Itchen, providing means of crossing over the South Western Main Line via a level crossing. This route passes to the south of Oakwood Park Recreation Ground where it intersects with the northern section of M.

Cycling

4.2.75 Route 23 of the NCN runs through Otterbourne in a north/south alignment along Main Road. In the vicinity of Otterbourne, the route is predominantly on-road. Some sections however, including Otterbourne Hill, are off-road, traffic-free links characterised by the provision of a segregated shared use footway/cycleway (see below).

Figure 4-26 Segregated Shared Use Cycle Path on Otterbourne Hill (source: Google)

4.2.76 Locally, Route 23 NCN provides a link between Eastleigh and Winchester which passes through Otterbourne and other local settlements. Regionally, it provides a connection between Southampton and Reading.

4.2.77 Aside from Route 23 of the NCN, local roads within Otterbourne and Colden Common are generally lightly trafficked and suitable for experienced cyclists to mix with traffic based on LTN 1/20 guidance. Within the villages of Otterbourne and Colden Common, where both traffic flows and speed limits are low, roads are suitable for cyclists of all abilities.

4.3 Horse Riding

4.3.1 A range of equestrian facilities are located within or near to the pipeline sections, with a number of stables/riding centres generating horse-riding trips that might pass through the pipeline sections. Similarly, there are a number of bridleways within the pipeline sections that are suited to accommodating equestrian trips.

4.3.2 The notable stable/equestrian centre facilities within the vicinity of the pipeline sections are identified at Figure 4-27.

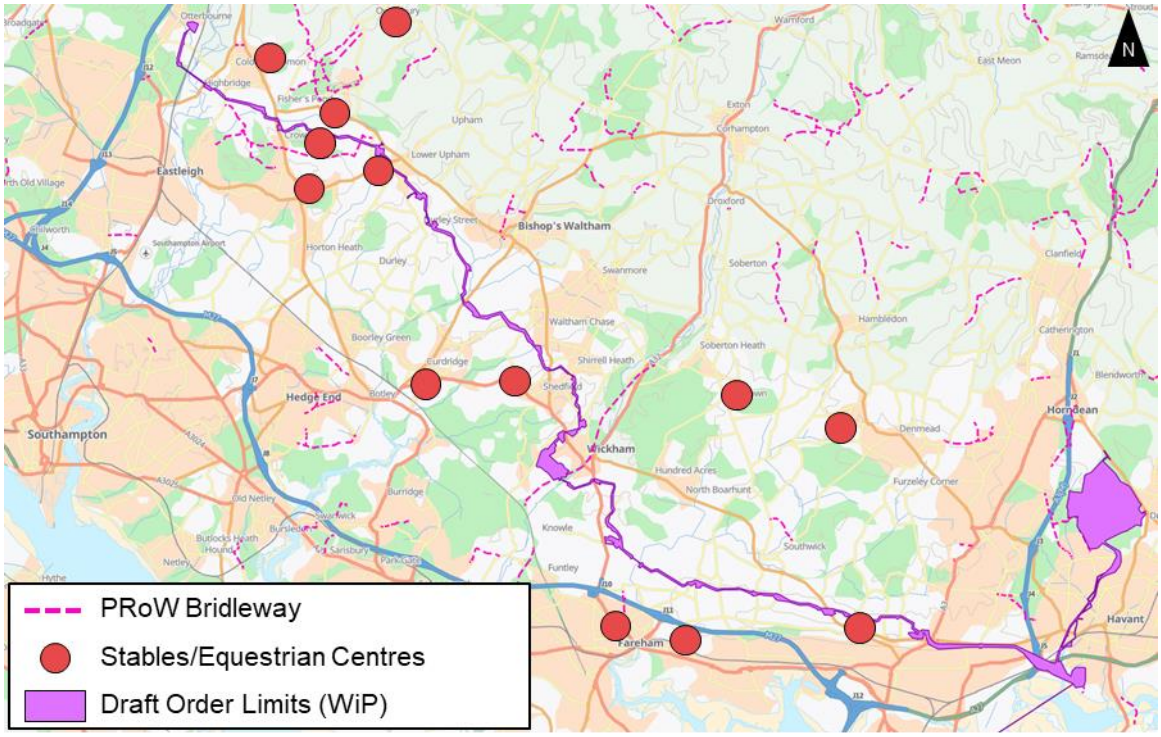

Figure 4-27 Stables/Equestrian Centres in the Vicinity of the proposed Underground Pipeline Sections

4.3.3 Bridleways are a thoroughfare used by horse-riders. Though these trails, which were originally created for use by horses, often now serve a wider range of users, they are routes that can be legally used by horse riders. As such, it is important to consider the geography of these routes in the context of the proposed Underground Pipeline sections, as illustrated at Figure 4-27.

4.3.4 As shown above, there are a series of bridleways that both bisect the proposed Underground Pipeline sections and link horse-riding and equestrian facilities to other areas in the vicinity of the proposed Underground Pipeline sections.

4.3.5 The impact of the Proposed Development on the above bridleways will be explored in further detail within the TA.

4.4 Bus

4.4.1 As shown at Figure 4-28, a range of bus routes serve the various settlements near the Proposed Development. These bus services vary in frequency and are run by Stagecoach, First and other independent operators.

4.4.2 Key bus routes that pass in proximity to the Proposed Development include the 1, E1/E2, 69 and 49, with a number of other services passing through the pipeline section in Havant. These services utilise a series of key routes within the study area, including the B3335 Highbridge Road, B3354 Winchester Road, B2177 Portsmouth Road, B3035 Botley Road, A334 Winchester Road and the A3 Hoad's Hill.

Figure 4-28 Hampshire Council Bus Routes (Extract from HCC Travel Guide 2023)

4.4.3 Table 4-9 provides a summary of the services that operate either within the area covered by the pipeline sections themself, or within their immediate vicinity.

Table 4-9 Summary of Bus Services

Service	Operator	Route	Weekday Frequency	Weekday Evening Frequency	Sunday Frequency
1	Bluestar	Southampton – Chandlers Ford –	20 mins	Hourly	30 mins

Service	Operator	Route	Weekday Frequency	Weekday Evening Frequency	Sunday Frequency
		Otterbourne – Compton - Winchester			
E1/E2	Stagecoach in Hampshire	Eastleigh – Twyford and Colden Common (E1) - Otterbourne (E2) – Stanmore - Winchester	Hourly	-	-
69	Stagecoach in Hampshire	Winchester – Colden Common – Fair Oak – Bishops Waltham – Swanmore – Wickham - Fareham	Hourly	Fri/Sat – 2 journeys	Irregular
ZOO	Bluestar	Eastleigh – Fair Oak – Marwell Zoo (operates April to September only)	Hourly	-	Hourly
49	Stagecoach in Hampshire	Bishops Waltham – Swanmore – Botley – Hedge End	Irregular	-	-
96	HCC	Swanmore, Shirrell Heath, Shedfield and Wickham to Broadcut and Fareham	Monday – Friday, 1-2 return journeys	-	-
20	Stagecoach in Portsmouth	Havant – Leigh Park – Crookhorn – QA Hospital – Portsmouth City Centre - Gunwharf	30 mins	-	-
MV1	Meon Valley Community Bus	West Meon – Soberton - Fareham	Mondays and 2nd and 5th Friday of the month	-	-
700	Stagecoach in Portsmouth	The Hard – Commercial Road – North End – Hillsea – A27 – Havant – Emsworth – Southbourne - Chichester	30 mins	Hourly	30 mins

Service	Operator	Route	Weekday Frequency	Weekday Evening Frequency	Sunday Frequency
23	Stagecoach in Portsmouth	Leigh Park – Havant – Cosham – North End – Commercial Road – Gunwharf - Southsea	10 mins	30 mins	15 mins
27	First Solent	Rowlands Castle – Leigh Park – Havant - Emsworth	Irregular	-	-
37/37X	Stagecoach in Portsmouth	Havant – Leigh Park – Crookhorn – Stakes Hill – Waterlooville – Cowplain – Horndean - Petersfield	Hourly	-	-
39	Stagecoach in Portsmouth	Wecock Farm – Waterlooville – Crookhorn – Leigh Park - Havant	Hourly	-	-

4.4.4 The services outlined above various routes within the various sections of the proposed Underground Pipeline. The following text provides an overview of the roads used by these bus services, including bus stops and waiting facilities.

Otterbourne Road/Main Road/Otterbourne Hill

4.4.5 Otterbourne Road/Main Road/Otterbourne Hill is a key route for bus services that run between the settlements south of Winchester.

4.4.6 Bus stops are located at multiple, regular points along Otterbourne Road, Main Road and Otterbourne Hill, and are served by the 1 and E2 services. Bus stop provision varies, from minimal provision comprising of a flagpole to stops with dedicated bus lay-bys and stops that have shelter facilities. Figure 4-29 provides an example of the types of bus stops that are provided on Otterbourne Road.

Figure 4-29 Bus Facilities on Otterbourne Road (Source: Google)

B3335 Highbridge Road

4.4.7 Buses mix with traffic on the B3335 Highbridge Road, and there are no dedicated lay-by facilities at bus stops. Bus stop facilities are minimal, mostly comprising solely of a flagpole though in some cases a raised platform is provided to assist passengers (Figure 4-30). The B3335 Highbridge Road accommodates the E1 bus route.

Figure 4-30 Bus Facilities on Otterbourne Road (Source: Google)

B3354 Winchester Road

4.4.8 The B3354 Winchester Road accommodates the 69 and ZOO bus services, though the latter runs during summer months only. There are no dedicated bus lanes on this route, though bus stops in the vicinity of the Portsmouth Road junction contain dedicated infrastructure including lay-bys and flagpoles (Figure 4-31). To the south however, bus stops comprise solely of flagpoles, with no other dedicated infrastructure.

Figure 4-31 Bus Facilities on B3354 Winchester Road in vicinity of Portsmouth Road (source: Google)

B2177 Portsmouth Road

4.4.9 The 69 and ZOO services also frequent the Fishers Pond Garage stops on the B2177 Portsmouth Road. There is minimal provision for buses along this route, and buses are expected to mix with traffic both in transit and when they stop. The stops at Fishers Pond Garage comprise solely of flagpoles.

B3037 Mortimers Lane

4.4.10 B3037 Mortimers Lane accommodates the 69 bus service, providing a link between Fair Oak and Lower Upham. Bus stop facilities along the route vary, with some stops containing dedicated on-carriageway bus cages and others comprising of dedicated bus lay-bys. All stops have flagpoles and raised off-road platforms for passengers to wait on.

Figure 4-32 Bus Facilities on B3037 Mortimers Lane (Stroudwood Lane stops) (source: Google)

Winters Hill

4.4.11 The 49 service travels along Winters Hill as it connects towards Botley and Hedge End. Winters Hill is a narrow route, measuring approximately 4.8m in width. As such, there is no specific provision for buses, with stops demarked solely by flagpoles and equipped with raised boarding platforms.

Figure 4-33 Bus Stop Facilities on Winters Hill (source: Google)

B3035 Botley Road

4.4.12 The B3035 Botley Road is served by the 49 bus route. Stops on the road are 'call-only' stops, meaning that they don't have any waiting facilities and buses do not stop unless they are flagged down by pedestrians.

Curdridge Lane

4.4.13 The 49 bus service also utilises Curdridge Lane through Waltham Chase. Stops along this link also vary in terms of facilities provided, with some comprising solely of flagpoles whilst other stops are supported by pedestrian crossings, shelters and waiting facilities as shown in Figure 4-34.

Figure 4-34 Bus Stop Facilities on Curdridge Lane (source: Google)

B2177 Winchester Road

4.4.14 The B2177 Winchester Road is utilised by the 69 bus service. Again, there are no dedicated bus lanes, and buses are expected to mix with traffic. However, bus stops are equipped with waiting facilities to varying degrees. These facilities range from simple flagpole provision to stops that are complete with flagpoles, shelters, benches and a dedicated bus lay-by, as shown in Figure 4-35 below.

Figure 4-35 Bus Stop Facilities on B2177 Winchester Road (source: Google)

A334 Winchester Road

4.4.15 The A334 is also frequented by the 69 bus service, with stops to the south of Wickham also served by the 20 service. Again, there are no dedicated bus lanes, and stops along the A334 Winchester Road vary from simple flagpole stops to stops that have a dedicated bus lay-by (Figure 4-36). Call-only stops are also present along the A334 Winchester Road.

Figure 4-36 Bus Stop Facilities on A334 Winchester Road (source: Google)

A32 Hoad's Hill/Wickham Road

4.4.16 The 20 and 69 services route along the A32 Hoad's Hill/Wickham Road. In a similar vein to the stops previously reviewed, the bus stop facilities on these routes varies between simple flagpole stops to stops that have a dedicated lay-by, shelter and waiting facilities (Figure 4-37).

Figure 4-37 Bus Stop Facilities on the A32 Hoad's Hill/Wickham Road (source: Google)

A3 London Road

4.4.17 Being a key traffic corridor to the west of Widley, the A3 London Road serves the "8 the Star" service which runs between Clanfield and Portsmouth. The A3 London Road accommodates this service with dedicated bus lanes which are provided intermittently in both directions. In addition to this, bus stop facilities are high-quality, with dedicated lay-bys, shelters, benches, bins, flagpoles and raised platforms as shown in Figure 4-38.

Figure 4-38 Bus Stop Facilities on A3 London Road (source: Google)

Bus Stops within Havant

4.4.18 The Proposed Development sections encompass a number of different bus links, including the 23, 27, 37/37X and 39 services. Bus stops in Havant are generally high-quality, with dedicated lay-bys/on-road bus cages, raised platforms, flagpoles and bus shelters (as shown at Figure 4-39).

Figure 4-39 Bus Stop Facilities in Havant (source: Google)

4.5 Rail

4.5.1 The South Western Mainline bisects the north-western portion of Section M of the proposed Underground Pipeline, running in a north/south alignment immediately east of Otterbourne.

4.5.2 The nearest station to this section of the railway line is the Shawford railway station which is located approximately 1.7km north of Otterbourne. This station offers regular hourly services between Winchester and Southampton Central.

4.5.3 The location of the station and the South-Western Mainline in the context of the pipeline sections is shown in Figure 4-40.

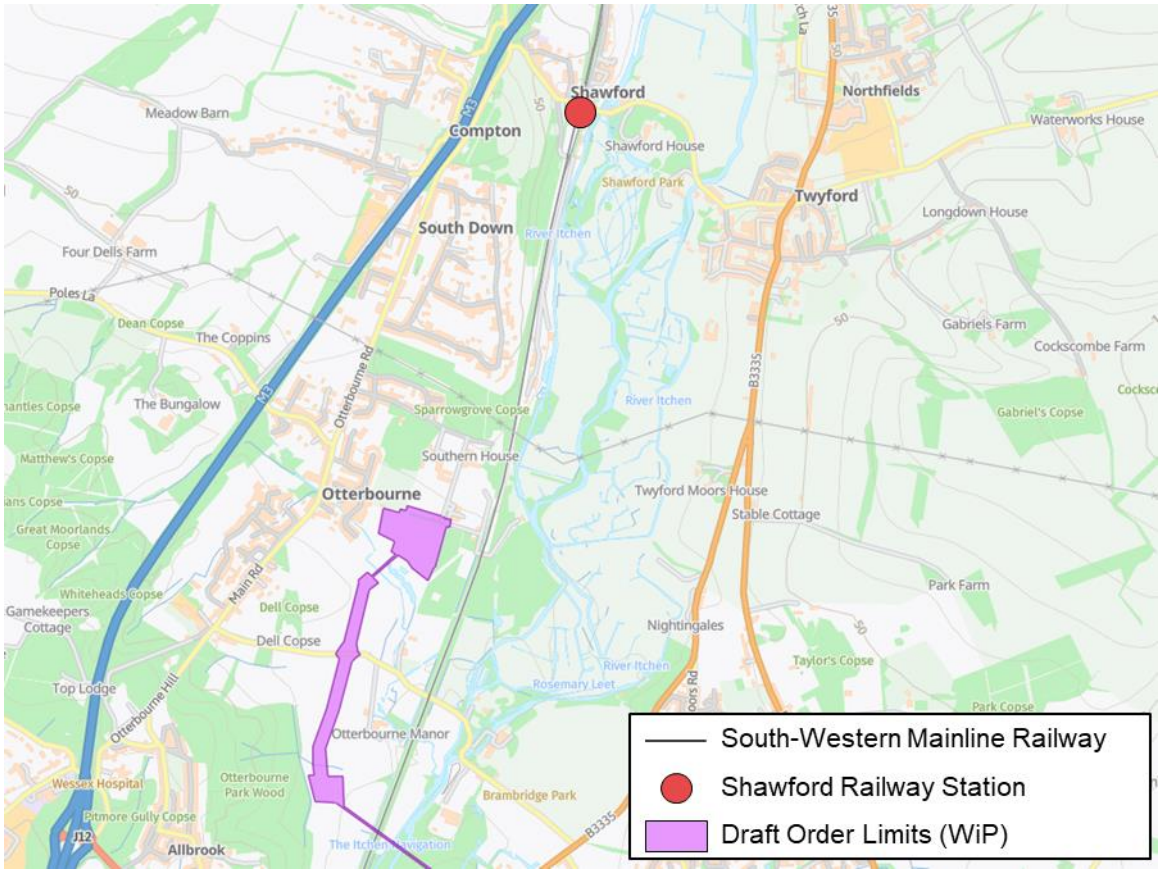

Figure 4-40 Local Railway Context to the North-West of the Pipeline Sections

4.5.4 The Bedhampton railway station is served by South Western Railway and Southern services. The former provides services between London Waterloo and Portsmouth Harbour, whilst the latter operates between Portsmouth & Southsea and Littlehampton. Both operators provide hourly services in each direction from Bedhampton.

4.5.5 East of the Bedhampton station lie the Havant and Warblington stations, though these are located outside of Section B of the proposed Underground Pipeline. To the east of the Havant station, the West Coastway Line splits, forming the Portsmouth Direct Line which diverges to the north.

4.5.6 The railway lines and stations in the vicinity of Sections B and C of the proposed Underground Pipeline are presented in Figure 4-41 below.

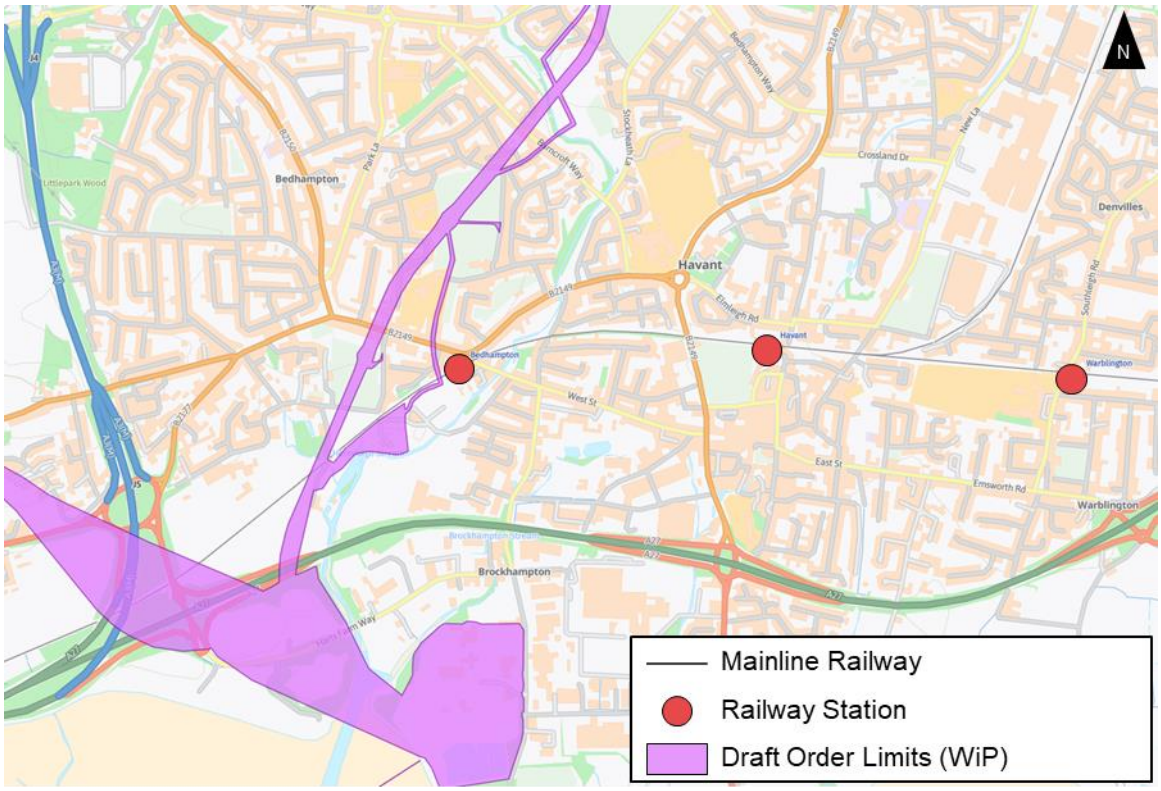

Figure 4-41 Local Railway Context to the South-East of the Pipeline Sections

5 Existing and Future Baseline

5.1 Introduction

5.1.1 This section presents the traffic data that has been collected to define baseline conditions and outlines any deficiencies with the existing data.

5.1.2 The future baseline has also been defined using background traffic growth factors obtained from TEMPro and the National Road Traffic Projections. The future baseline assumptions will be revisited in the next stage with consideration of committed developments and transport infrastructure.

5.2 Baseline Traffic Data

5.2.1 During June and July 2023 (outside of school holidays), 53 Automatic Traffic Count Surveys were conducted across a range of locations within the study area (as previously outlined at Section 1.4). The locations of these initial ATC surveys were identified based on compound locations and potential access routes.

5.2.2 The locations of these ATCs are shown in the context of the Proposed Development pipeline corridor in Figure 5-1 below.

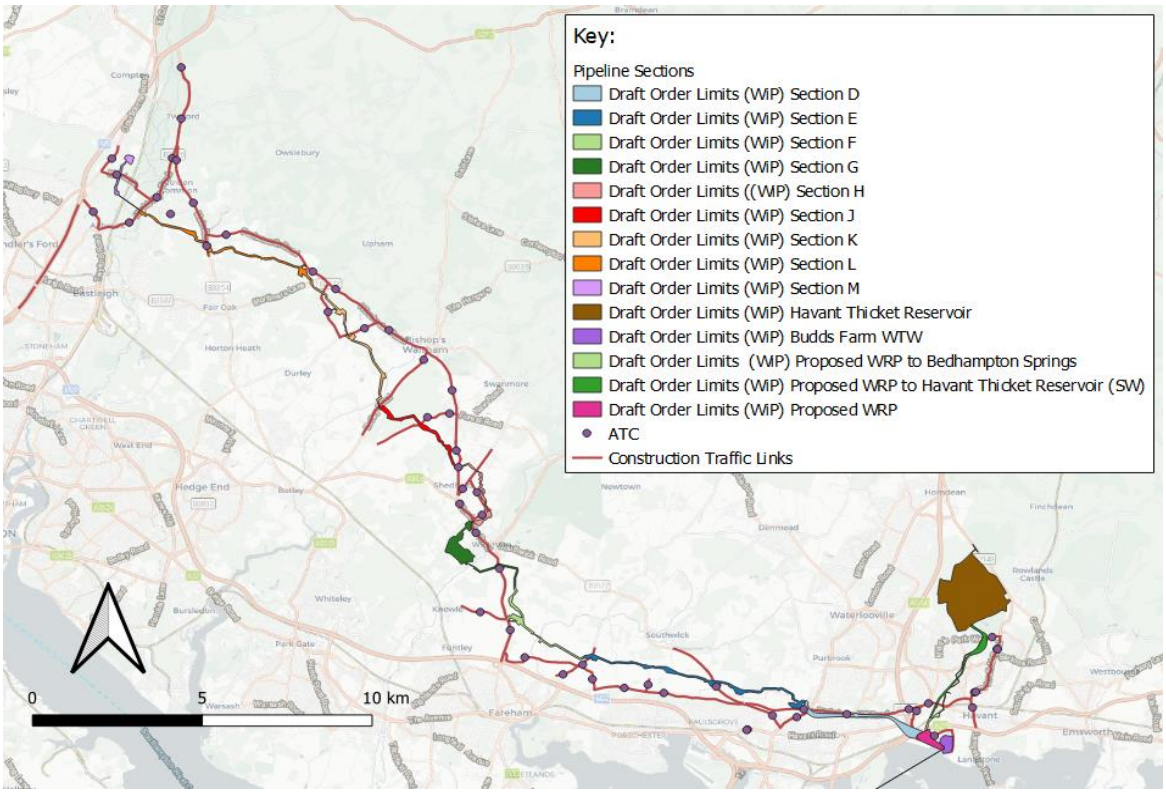

Figure 5-1 ATC Locations

5.2.3 Given that construction impacts associated with the Proposed Development are largely expected to occur outside of network peak hours, daily traffic flows have been analysed. Both Average Annual Daily Traffic (AADT) and Average Annual Weekday Traffic (AAWT) flows are set out for each of the surveyed sites at Appendix A .

5.2.4 Where construction traffic is expected to materially impact the capacity of a junction, turning count data will be collected and peak hours will be assessed. Similarly, where temporary lane closures with shuttle working signals are proposed, peak hours will be reviewed to assess impacts on driver delay.

5.2.5 Those links requiring further assessment will be agreed with the relevant highway authority once the construction traffic forecasts have been finessed in the next design stage.

Dataset Limitations

5.2.6 As outlined above, the traffic surveys were conducted during the period 20th June to 5th July 2023. Whilst this period of data collection occurred prior to the school summer holidays, it is likely that flows may differ from an autumn/winter survey. Additional surveys will therefore be undertaken at several locations within the study area in autumn/winter to validate these traffic flows.

5.2.7 Where ATCs did not cover sections of the study area, such as the M3 (links 55 and 56), alternative data sources have been used including National Highways' WebTris tool.

5.2.8 For minor links that were not covered by initial ATC survey data, such as links 18, 19 and 29, flows have been estimated using nearby ATC survey data. These minor links will be surveyed by dedicated ATC surveys for inclusion within the TA.

5.2.9 Furthermore, some ATCs experienced faults during the survey period which led to the collection of unreliable datasets. This includes links 8, 16 and 25. As with the above, for this TASR, where ATCs had faults nearby reliable ATCs were used to ascertain a proxy figure as a replacement.

5.2.10 Similarly, some ATCs, including links 5, 22, 23, 35 and 43, were tampered with by external parties or experienced other faults which led to the collection of incomplete datasets. For these ATCs, average flows were taken from the available data for this TASR. Faulty, vandalised and incomplete ATCs will be resurveyed for the TA.

5.2.11 The scope of the additional traffic surveys will be discussed and agreed with the relevant highway authorities. This includes those additional surveys proposed to validate traffic data collected in June/July 2023

5.3 TEMPro

5.3.1 The industry-standard traffic growth forecast software, TEMPro, has been used to calculate growth factors that can be applied to the baseline 2023 traffic flows to forecast future year flows.

5.3.2 TEMPro utilises information contained within the National Trip End Model (NTEM) which accounts for various factors that may influence traffic flow growth, including Local Plan site allocations, committed development and national trends.

5.3.3 The latest version of TEMPro, v.8.0, was initially published in November 2022, with a revised v.8.1 released in September 2023. Transport practitioners involved in national schemes centred around the strategic road network are encouraged to use the latest version of TEMPro to forecast future growth in conjunction with the DfT's Uncertainty Toolkit (2021) which provides a range of common analytical scenarios.

5.3.4 However, given the Proposed Development's limited impact on the strategic road network, with just two links contained within the study area for the air quality assessment (M3 Junctions 12 to 13 and 13 to 14), it is proposed to use TEMPro v.7.2 to calculate growth factors for the various types of roads within the study area.

5.3.5 This version of TEMPro (7.2) has been used in conjunction with the NTM AF15 Dataset to provide a growth figure for car trips within the study area.

5.3.6 Growth factors have been obtained for the Hampshire region within which the Proposed Development sits and have been provided in AADT and AAWT format as set out at Table 5-1. These factors cover the growth period from 2023 (baseline) to 2026, the year in which construction traffic associated with the Proposed Development's will peak. Should the construction programme change these traffic growth factors will be amended for the Transport Assessment.

Table 5-1 TEMPro v.7.2 Growth Factors (2023-2026)

Road Type	AADT Growth Factor (2023-2026)	AAWT Growth Factor (2023-2026)
Minor – Urban	1.035	1.035
Minor – Rural	1.040	1.040
Principal – Urban	1.034	1.034
Principal – Rural	1.042	1.041
Motorway – Urban	N/A*	N/A*
Motorway – Rural	1.043	1.042

*There are no motorways classed as urban within Hampshire

5.3.7 A copy of the TEMPro outputs can be found in Appendix B .

5.3.8 Specific growth factors for LGV/HGVs have been derived using the National Road Traffic Projections 2022 (NRTP22), which is based on the Department for Transports National Transport Model (NTM). The assumptions for extraction of growth factors are that core scenario has been used with data extracted for the South East region for all roads. The 2023-2026 HGV factor is shown at Table 5-2.

Table 5-2 NRTP22 HGV Growth Factor

Road Type	AADT and AAWT Growth Factor (2023-2026)
South-East – All Roads – HGVs	1.017

5.4 Committed Developments and Transport Infrastructure

5.4.1 Committed developments and transport infrastructure will be requested from the relevant planning and highway authorities. Given the TA will predominately consider the transport impacts of the Proposed Development in the construction phase, only those committed developments and transport schemes that are:

- Near certain: The outcome will happen or there is a high probability that it will happen. This includes those schemes where intent has been announced by

proponent to regulatory agencies, development proposals have been approved or currently under construction.

- More than likely: the outcome is likely to happen but there is some uncertainty. This includes projects where the submission of planning or consent application is imminent of the development application is within the consent process.

6 Construction Traffic Impacts

6.1 Introduction

6.1.1 This section of the report presents the preliminary methodology used to assess the construction traffic impacts of the Proposed Development on the transport network.

6.1.2 Given that the Proposed Development is predominately a water pipeline, it is not forecast to generate a significant number of trips once operational, with just a small number of maintenance trips associated with the proposed Underground Pipeline, AGP and WRP anticipated. Therefore, the traffic impacts of the Proposed Development are predominately associated with the construction period.

6.1.3 This section of the report presents the assessment methodology and findings of the preliminary traffic impact assessment. It presents preliminary construction trip generation forecast figures based on a series of assumptions, reflecting the early stage in the overall design process. These assumptions, including programme, trip generation forecasts and access routes will be reviewed and finessed in the next design stage and prior to the DCO submission.

6.2 Assumptions

6.2.1 Several key assumptions were made to forecast the potential impacts of construction traffic on the local transport network. These assumptions relate to aspects of the scheme that were not fully defined at the time the traffic estimates were prepared, including the following:

- There was some optionality regarding which potential compounds would be required, and of those, which would have direct access on to the public highway network (or be accessed via the temporary haul road). As such, not all compounds have been included in the assessment at this stage. This will be reviewed and amended in the next design stage once all compound locations, and their access strategies, are confirmed. For these initial construction traffic forecasts, 18 compounds have been assessed along the proposed Underground Pipeline. Given construction traffic will be split between several more compounds this approach provides for a reasonable worst-case assessment.
- High level average trips have been assumed per compound. This will be reviewed and finessed in the next design stage.
- The proposed Underground Pipeline will be delivered in three sections over three years, commencing in Havant in 2026. Once the programme is fully understood, this assumption will be revisited.
- The design team have provided construction traffic estimates per 3km section of the proposed Underground Pipeline, including both HGVs (deliveries) and LGVs (construction workers). Based on these estimates, each compound along the proposed Underground Pipeline will generate 10-14 HGV inbound trips and 29-43 LGV inbound weekday trips. These estimates represent a reasonable worst case as construction traffic demand and will be spread across additional compounds. This will be reflected in the traffic forecasts for the EIA/DCO application.

- Construction traffic at the proposed WRP compound (no. 17) will peak in 2026. Based on construction traffic estimates provided by the design team, there are estimated to be 65 HGV inbound trips and 313 LGV inbound weekday trips. There will also be 25 inbound HGV trips and 17 inbound LGV weekday trips at the compound (no. 18) adjacent to the Havant Thicket reservoir.
- The access routes for HGVs to each compound are based on the shortest appropriate journey to the SRN. Currently no HGV trips have been distributed via Botley and Hedge End. This assumption will be tested with HCC.
- A satellite compound will not be identified prior to the submission of the DCO. Given this has the potential to impact the distribution of HGV and contractor trips, a strategy will be developed and discussed with the relevant highway authorities.
- It has been assumed that 70% of contractors would drive, with the remaining travelling to site by other modes of transport. This will be revised in the next design stage as part of the construction worker travel plan.

Compound Locations

6.2.2 The construction trip generation assessment is also based on the provisional location of 18 construction compounds. The location of these compounds will affect construction traffic flows on the adjacent local highway network links.

6.2.3 The provisional location of the 18 compounds is presented at Figure 6-1.

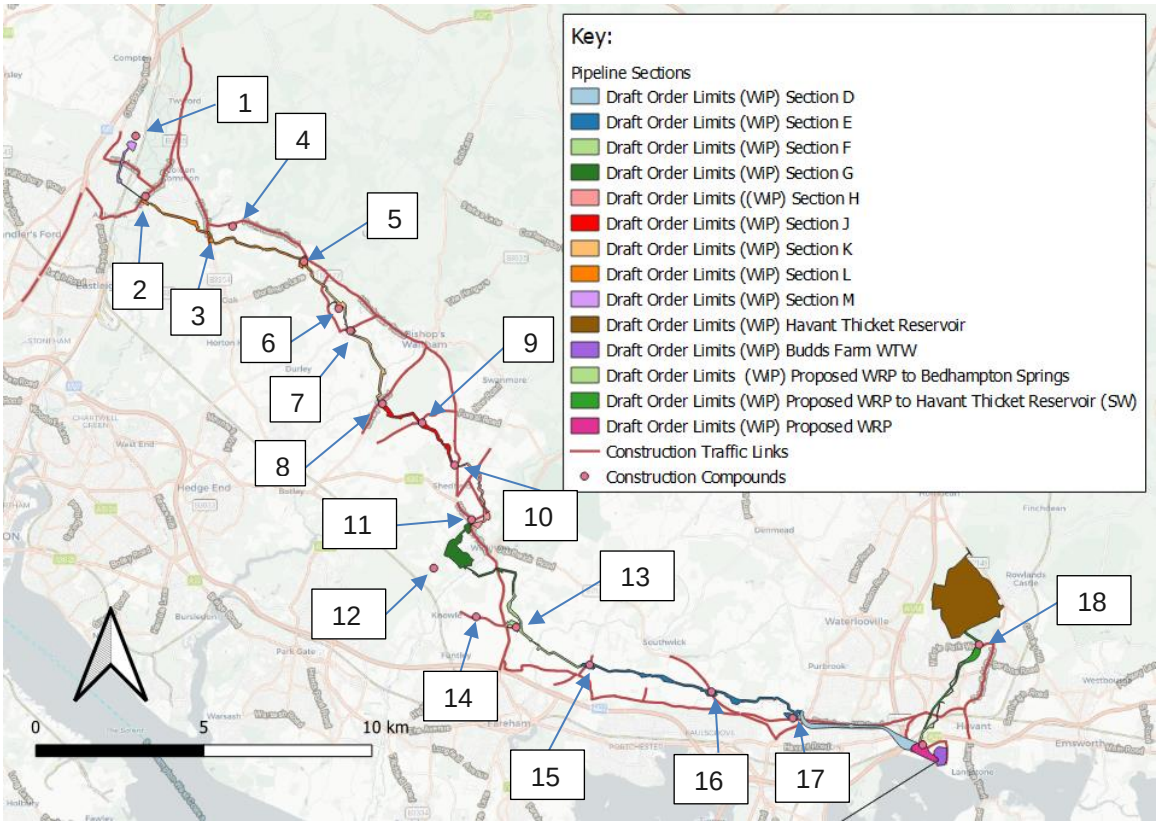

Figure 6-1 Construction Compound Locations

6.2.4 For context:

- Compounds 1-16 are proposed for the proposed Underground Pipeline between Havant Thicket Reservoir and Otterbourne WSW and Proposed AGP.
- Compound 17 will serve the proposed WRP and the proposed Underground Pipelines between Budds Farm WTW and the proposed WRP and the proposed Underground Pipeline between the proposed WRP and Havant Thicket Reservoir.
- Compound 18 is located at the northern end of the proposed Underground Pipeline between the proposed WRP and Havant Thicket Reservoir .

6.2.5 The compound locations will be reviewed in the next design stage and bespoke trip generation forecasts will be developed for each compound.

6.3 Construction Trip Generation

6.3.1 Based on the assumptions set out earlier in this section, the proposed daily two-way trip generation associated with each of the 18 potential compounds is set out below in Table 6-1. The LGV trips are associated construction worker arrivals/departures and based on the assumption 70% will travel by car.

Table 6-1 Construction Compound Two-way Trip Generation

Compound	Year	HGVs	LGVs	Total
1	2028	20	58	78
2	2028	20	58	78
3	2028	20	58	78
4	2028	20	58	78
5	2028	20	58	78
6	2028	20	58	78
7	2027	18	58	76
8	2027	18	58	76
9	2027	20	58	78
10	2027	18	58	76
11	2027	18	58	76
12	2027	20	58	78
13	2026	28	86	114
14	2026	28	86	114
15	2026	28	86	114
16	2026	28	86	114
17	2027	130	626	756
18	2027	50	34	84

6.3.2 As noted above, Compounds 1-16 relate to the pipeline between the proposed WRP and Otterbourne WSW. The variation in the construction traffic estimates between Compounds 1 and 11 relate to the quantum of trenchless crossings along that section. The construction traffic estimates for compounds 13-16 are higher as there are fewer compounds per km along that section of the proposed Underground Pipeline.

6.4 Operational Trip Generation

6.4.1 As noted in the assumptions, there are limited operational trips forecast to be generated by the Proposed Development. The design team have advised the following with regards to operational traffic:

- The proposed WRP is likely to be manned 24/7 and could require 16 LGVs for staff (5 day-shift and 3 night-shift workers)
- 1 HGV for chemical delivery (tanker) per day
- 1 vehicle per week for monitoring/maintenance at the IPS and BPT

6.5 Construction Worker Trip Distribution

6.5.1 Parking for construction workers will be provided in the compounds along the proposed Underground Pipeline. Further details on the quantum of car parking will be developed in the next design stage and set out in the fCTMP.

6.5.2 The construction compounds located along the proposed Underground Pipeline, as illustrated in in Figure 6-1, have been split into three sections for the purposes of the construction worker distribution calculations. These sections comprise of the northern section (compounds 1-6), the southern section (compounds 7-16) and the Havant section (compounds 17 and 18).

6.5.3 Construction worker trips to each of these sections has been determined with reference to the 2011 origin/destination census data from the *WU03EW Location of usual residence and place of work by method of travel to work* census category.

6.5.4 In order to interrogate the data to determine distribution of construction worker trips to the compounds, place of work was set to the Middle Super Output Areas (MSOA) for Havant and Eastleigh. Trips to usual residences in other MSOA's in Hampshire and Portsmouth were identified, along with other LA's in South East and South West England.

6.5.5 Whilst it is recognised that some of the construction activities will require specialist contractors, there will also be trainees and apprenticeships to be created throughout the duration of the construction process. As such, a distribution calculation based on the existing commuter trips in in the Havant and Eastleigh area is a suitable representative of the likely construction worker distribution. This assumption will however be further tested in the next design stage and in advance of the ES/DCO application submission.

The distribution of construction worker trips to the compounds along the northern, southern and Havant sections of the proposed Underground Pipeline are presented in Table 6-2, Table 6-3 and Table 6-4 below.

Table 6-2 Compound Route Distribution (Compounds 1-6)

Origin/ Destination	Distribution (%)	Route (Compounds 1-2)	Route (Compounds 3-6)
Proposed Underground Pipeline Section North (Compounds 1-6)			
West (M27)	24%	Via M3 J12	Via M3 Junction 12 (S/B), M27 J4
North (M3)	10%	Via M3 J11	Via M3 J11
East (A27)	33%	Via M3 J12	Via Winchester Road, M27 J10
Eastleigh BC	23%	Via A355 (into Eastleigh)	Via Botley Road M27 J7
South (M275)	10%	Via M3 Junction 12, M27 (E/B)	Via Winchester Road and M27 J10

Table 6-3 Compound Route Distribution (Compounds 7-16)

Origin/ Destination	Distribution (%)	Route (Compounds 7-13)	Route (Compounds 14-16)
Proposed Underground Pipeline Section South (Compounds 7-16)			
West (M27)	24%	Via Botley Road d M27 J7	Via B2177, A3, M27 J12
North (M3)	10%	Via M3 J11	Via B2177, A3, M27 J12
East (A27)	33%	Via Winchester Road and M27 J10	Via Portsdown Hill Road and A27 Havant Bypass
Eastleigh BC	23%	Via Botley Road, M27 J7	Via B2177, A3 and M27 J12
South (M275)	10%	Via Winchester Road and M27 J10	Via Portsdown Hill Road and A27 Havant Bypass, M27

Table 6-4 Compound Route Distribution (Compounds 17-18)

Origin/ Destination	Distribution (%)	Route (Compound 17)	Route (Compound 18)
Proposed Underground Pipeline Section Havant (Compounds 17 and 18)			
West (M27)	61%	Via A27 Havant Bypass	Via B2149, Park Road, A27
North (M3)	4%	Via A27 and A3 (M) J5	Middle Park Way, Park House Farm Way, B2150, A3 (M) J3
East (A27)	3%	Via A27 Havant Bypass	Via B2149, Park Road, A27
Havant	22%	Harts Farm Way, Brockhampton Road, New Road	Middle Park Way, Park Lane

Origin/ Destination	Distribution (%)	Route (Compound 17)	Route (Compound 18)
Proposed Underground Pipeline Section Havant (Compounds 17 and 18)			
South (M275)	10%	Via A27 Havant Bypass (W/B)	Via B2149, Park Road, A27 Havant Bypass (W/B)

6.6 Construction Traffic Distribution and Assignment

6.6.1 As noted in the assumptions, the distribution of HGVs is based on the shortest appropriate route to the SRN, including the M3, M27, A27 and A3 (M). Table 6-5 below sets out the proposed access routes to each of the compounds from the SRN. These routes will be further tested with the relevant stakeholders as part of the fCTMP.

Table 6-5 Construction Traffic Distribution

Compound	Access Route to SRN
Compound 1	Main Road, Otterbourne Hill, Winchester Road, M3 (J12)
Compound 2	B3335 (railway bridge clearance to be tested), A335, M3 (J12)
Compounds 3 & 4	B2177 Portsmouth Road, B3354 Winchester Road, B3335, M3 (J11)
Compound 5	Scivier's Lane (N/B), B2177 Portsmouth Road (W/B), B3354 Winchester Road, B3335, M3 (J11)
Compound 6	Winters Hill, Winchester Road, Portsmouth Road, B3354 Winchester Road, B3335, M3 (J11)
Compound 7	Botley Road (W/B), A334 (E/B), A334 Winchester Road (S/B), A32 Wickham Road (S/B), M27 (J10)
Compound 8	Curdridge Lane (E/B), A334 Winchester Road (S/B), A32 Wickham Road (S/B), M27 (J10)
Compound 9	St Annes Lane, B2177 Winchester Road (S/B), A334 Winchester Road (S/B), A32 Wickham Road (S/B), M27 (J10)
Compound 10	A334 Winchester Road (S/B), A32 Wickham Road (S/B), M27 (J10)
Compound 11	Titchfiled Lane (N/B), A334 Winchester Road (S/B), A32 Wickham Road (S/B), M27 (J10)
Compound 12	Knowle Road (E/B), A32 Wickham Road (S/B), M27 (J10)
Compound 13	A32 Wickham Road (S/B), M27 (J10)
Compound 14	Boarhunt Road (S/B), unnamed road, M27 Junction 11
Compound 15	Southwick Road (S/B), Southwick Hill Road, A3 London Road, A3 Southampton Road, M27 (J12)
Compound 16	Portsmouth Hill Road (E/B), A3 London Road (SW/B), A3 Southampton Road, M27 (J12)
Compound 17	Harts Farm Way, A27

Compound	Access Route to SRN
Compound 18	Middle Park Way, Petersfield Road, Park Road North/South, A27

6.7 Preliminary Traffic Impact Assessment

6.7.1 The TA will include percentage impact assessment of the construction traffic trips upon baseline traffic flows. This assessment will utilise baseline traffic flows established by a second set of traffic surveys (refreshing the surveys presented at Section 5.2), construction phase future year traffic flows calculated using TEMPro, construction trip generation figures as outlined in Section 6.3 and construction trip distribution as set out in Section 6.4 and 6.6.

6.7.2 The impact of daily construction traffic flows will be quantified at all relevant traffic links within the study area.

6.7.3 Should the results of this analysis indicate that construction traffic flows are likely to have a significant impact on any of the links, then a detailed assessment of notable junctions within the vicinity of the affected link will be undertaken using the relevant junction modelling software.

6.7.4 A preliminary percentage impact assessment of construction traffic (including construction workers trip) is shown in Appendix C and summarised in Table 6-6 below.

Table 6-6 Preliminary Construction Traffic Impact Assessment (24 Hr AADT)

Road Link		Future Baseline (2026-2030)		Do Something (Construction)		Construction Traffic Impact	
Ref	Description	Vehs	HGVs	Vehs	HGVs	Vehs	HGVs
1	B3335 Winchester Rd	14,418	1,781	14,496	1,838	0.5%	3.2%
7	B2177 Portsmouth Rd	6,981	1,135	7,124	1,192	2.0%	5.0%
9	B3354 Winchester Rd	10,292	1,341	10,302	1,341	0.1%	0.0%
15	B2177 Winchester Rd	14,041	2,557	14,145	2,557	0.7%	0.0%
28	A334 Winchester Rd	13,616	2,202	13,799	2,268	1.3%	3.0%
31	A32 Wickham Rd	19,837	2,576	20,028	2,656	1.0%	3.1%
35	Boarhunt Rd	4,583	920	4,603	940	0.4%	2.2%
43	B2177 South-wick Hill Rd	4,440	518	4,580	538	3.2%	3.9%
45	B2177 Ports-down Hill Rd	13,023	1,243	13,103	1,263	0.6%	1.6%
52	Harts Farm Way	9,995	2,394	10,535	2,487	5.4%	3.9%

6.7.5 It can be seen that the impacts of construction traffic are relatively minor on the majority of links within the study area.

6.8 Public Transport Impact Assessment

6.8.1 The TA will forecast the potential delay on public bus services associated with the construction of the Proposed Development. Given the construction traffic flows are not anticipated to result in material delay in the local highway network, the scope of this assessment will predominately relate to works within the highway network, including temporary road/lane closures.

6.8.2 The proposed methodology for this assessment is as follows:

- Identify all road/lane closures along the network associated with the construction of temporary/permanent accesses and the construction of the proposed Underground Pipeline.
- For each road/lane closure, identify which services would be impacted, the period of time the impacts would be experienced. Where appropriate, the impact of the works on delay will be forecast using junction modelling software.
- For each bus service, review the forecast delays across the construction period and provide a qualitative assessment of the likely impacts on future bus patronage.

7 Transport Assessment Structure

7.1 Overview

7.1.1 The TA will be structured as follows:

Chapter	Sections
Chapter 1: Introduction	Background, Pre-Application Engagement, Scoping, Methodology and Report Structure
Chapter 2: Policy Context	Local, Regional and National Policy and Supplementary Planning Guidance
Chapter 3: Walking, Cycling, Horse-Riding and Public Transport Network	Pedestrian Access, Cycling, Horse-Riding and Public Transport
Chapter 4: Highway Network	Highway Network, Strategic Road Network and Road Traffic Collisions
Chapter 5: Existing Travel Demand	Study Area, Survey Overview and Traffic Data
Chapter 6: Development Proposals	Overview and Construction Programme
Chapter 7: Construction Traffic Management	Introduction, Construction Programme, Construction Vehicle Movements, Vehicle Routing, Vehicle Access and Construction Traffic Management Principles
Chapter 8: Future Travel Demand	Key Methodology and Assumptions, Background Traffic Growth, Trip Generation, Trip Assignment and Distribution and Assessment Scenarios
Chapter 9: Assessment of Walking, Cycling and Horse-riding Impacts	Walking, Cycling, Horse-riding
Chapter 10: Highway Capacity Assessment	Percentage Impact Assessment, Method of Assessment and Junction Assessment Results
Chapter 11: Assessment of Public Transport Impacts	Road Closures and Programme, Impacted bus routes, Crossing Assessment, Bus Service Delay, Summary
Chapter 12: Summary and Conclusions	

8 Supporting Plans and Assessments

8.1 Introduction

8.1.1 This section presents an overview of the additional traffic and transport documents and plans that will be developed alongside the EIA and TA. Whilst there have been initial discussions with HCC, each of the below documents will be fully scoped with the relevant highway authorities.

8.2 Framework Traffic Management Strategy

8.2.1 The Framework Traffic Management Strategy (fTMS) will set out the overarching principles and methodology that would be used during the construction of the Proposed Development. The strategy will be developed in further detail by the appointed contractors prior to the commencement of the works (or phase of works).

8.2.2 The scope will include the following:

- Traffic Management Principles, including construction methodology, traffic management methodology, construction programme, communication strategy and framework signage strategy; and
- For all works in the public highway, describe the works and associated traffic management, relevant existing conditions (e.g. road speeds) and programme restrictions.

8.2.3 It is expected that the full Traffic Management Strategy(s) will be secured via the DCO requirements.

8.3 Framework Construction Traffic Management Plan

8.3.1 The Framework Construction Traffic Management Plan (fCTMP) will set out the proposed construction traffic arrangements and mitigation measures associated with the Proposed Development. The fCTMP will provide an overarching plan as to how the construction traffic and site operations will be managed. Individual CTMP documents will be developed in further detail by the appointed contractors prior to the commencement of each phase of the Proposed Development.

8.3.2 The scope of the fCTMP will include the following:

- Summary of the proposed works;
- Construction Traffic Estimates;
- Construction Compound Access;
- Construction Traffic Management; and
- Road Safety.

8.3.3 It is expected that the full CTMP(s) will be secured via the DCO requirements.

8.4 Framework Construction Worker Travel Plan

8.4.1 In addition to the fCTMP, a Framework Construction Worker Travel Plan will be developed which sets out the measures that will be introduced to encourage

construction workers to travel to the Proposed Development by sustainable modes of transport.

8.4.2 It is expected that the full Construction Worker Travel Plan(s) will be secured via the DCO requirements.

8.4.3 Given there will be limited workers associated with the Proposed Development in the operational phase, an Operational Travel Plan is not considered to be necessary.

15 mins Vehicle Classification-Speed Data 2023

Globals

Report Id	CustomList-445
Descriptor	15 mins Vehicle Classification-Speed Data 2023
Created by	MetroCount Traffic Executive
Creation Time (UTC)	2023-07-12T07:15:46
Legal	Copyright (c)1997 - 2016 MetroCount
Graphic	header.bmp
Language	English
Create Version	5.0.2.0
Metric	Non metric
Speed Unit	mph
Length Unit	ft
Mass Unit	ton

Dataset

Site Name	11138_2g.
Site Attribute	Hampshire
File Type	Plus
Algorithm	Factory default axle
Description	Portsdown hill rd 40mph
Lane	0
Direction	8
Direction Text	8 - East bound A]B, West bound B]A.
Layout Text	Axle sensors - Paired (Class/Speed/Count)
Configuration	40 MC5900 80 00 0f a8 a8 ? SA44HEAX MC5900-X13 (c)MetroCount 09Nov16

Profile

Name	30_40
Title	MetroCount Traffic Executive
Graphic Logo	
Header	
Footer	
Percentile 1	85
Percentile 2	95
Pace	10
Class Scheme	Euro13
F	Cls(1-12) Dir(BA) Sp(6,99) Headway(]0) Span(0 - 328.084) Lane(0-16)
Low Speed	6
High Speed	99
Posted Limit	40
Speed Limits	45 50 55 40 40 40 40 40 40 40
Separation	0.000
Separation Type	Headway
Direction	Westbound
Encoded Direction	15

15 mins Vehicle Classification-Speed Data 2023

Globals

Report Id	CustomList-452
Descriptor	15 mins Vehicle Classification-Speed Data 2023
Created by	MetroCount Traffic Executive
Creation Time (UTC)	2023-07-12T07:38:42
Legal	Copyright (c)1997 - 2016 MetroCount
Graphic	header.bmp
Language	English
Create Version	5.0.2.0
Metric	Non metric
Speed Unit	mph
Length Unit	ft
Mass Unit	ton

Dataset

Site Name	11138_7g.
Site Attribute	Hampshire
File Type	Plus
Algorithm	Factory default axle
Description	London rd 30mph
Lane	0
Direction	8
Direction Text	8 - East bound A]B, West bound B]A.
Layout Text	Axle sensors - Paired (Class/Speed/Count)
Configuration	40 MC5600 00 00 00 00 00 ? AF40PRY8 MC56-L5 [MC55] (c)Microcom 19Oct04

Profile

Name	30_40
Title	MetroCount Traffic Executive
Graphic Logo	
Header	
Footer	
Percentile 1	85
Percentile 2	95
Pace	10
Class Scheme	Euro13
F	Cls(1-12) Dir(BA) Sp(6,99) Headway(]0) Span(0 - 328.084) Lane(0-16)
Low Speed	6
High Speed	99
Posted Limit	30
Speed Limits	35 40 45 30 30 30 30 30 30 30
Separation	0.000
Separation Type	Headway
Direction	Westbound
Encoded Direction	15

File Type	Plus
Algorithm	Factory default axle
Description	B2177 40mph
Lane	0
Direction	8
Direction Text	8 - East bound A]B, West bound B]A.
Layout Text	Axle sensors - Paired (Class/Speed/Count)
Configuration	40 MC5600 00 00 00 00 00 ? JK95K4ZP MC56-L5 [MC55] (c)Microcom 19Oct04

Profile

Name	30_40
Title	MetroCount Traffic Executive
Graphic Logo	
Header	
Footer	
Percentile 1	85
Percentile 2	95
Pace	10
Class Scheme	Euro13
F	Cls(1-12) Dir(AB) Sp(6,99) Headway(]0) Span(0 - 328.084) Lane(0-16)
Low Speed	6
High Speed	99
Posted Limit	40
Speed Limits	45 50 55 40 40 40 40 40 40 40
Separation	0.000
Separation Type	Headway
Direction	Eastbound
Encoded Direction	15
