[redacted]

Good evening,

I am writing to you today regarding the examination set for the 11th and 12th November. I fully support the Water Matters community representation and support the experts who have all come together to highlight the communities' concerns.

This project has got devastating environmental consequences for the area. The experts explain very clearly how and why this is the case.

To work with nature and not against it - is important. Natural solutions are suggested and should be seriously considered. Too much is at risk .

Regards,

Viola Langley
