Submission ID: SEEEE9B65

I am a resident of Lordwood and am appalled at the underhand way in which SWA have failed to consult with residents of [redacted], Lordswood and nearby homes prior to submitting their application for a DCO. These residents will be directly affected by the intended major construction site compound proposed for the green fields directly behind the houses in [redacted] & Lordswood comprises of 46 properties and the vast majority of these residents were never made aware to SWA intention to use those green fields as a site construction compound.
The custodian's of those fields, whose ageing family of horses are extremely unlikely to survive relocation, have over many years of careful management and wildlife and biodiversity conservation re-introduced and enticed a huge and diverse number of wildlife species back into the immediate area and hedgerows.
All this natural beauty and calm which everyone lucky enough to live in this area has enjoyed would be instantly decimated by this large scale construction site compound.
I understand that this construction site will be working 7 days a week, creating continual noise, light pollution, congestion and pollution, fundamentally destroying the quality of life of the residents many of whom are in their twilight years. This situation is totally unacceptable and the resulting decimation of the land, hedgerows biodiversity and animals is needless, particularly as there are two viable large commercial sites in operation (Gracelands & Highbridge Farm) locally both with large splayed entrances, plenty of land and importantly a distance away from houses thereby reducing disruption.
I would urge you to re-think the location of this massive construction site compound.
