> [redacted]

Dear Sir/Madam,

I live at [redacted], which is about 100m from the field intended for Construction Compound L-10, shown on Sheet 25 of the Works Plan [APP-014]. My wife, daughter and granddaughter live with me. My daughter drives to work each day and occasionally works from home. Her journey involves taking my granddaughter to school in Colden Common. My wife and I sometimes assist with the school run but regularly travel to Winchester for work, appointments and shopping. We also like to walk from Wardle Road to Colden Common for exercise, to catch a bus and primarily to avoid driving. All these activities require us to travel along Highbridge Road as there is no realistic alternative.

I therefore object to the use of the field as a construction compound and ask the Examining Authority to examine its location and impacts in detail.

I first learned that a compound would be built near to my home in late October 2026 by word of mouth from neighbours. I have never received a letter from Southern Water about the compound, its location and impacts on my living environment. I therefore did not submit a Relevant Representation by August 2026. I ask the Examining Authority to accept this representation and to register me as an Interested Party.

Yours Faithfully

John Lane
