Submission ID: S8DDBCA74

To Whom It May Concern;
Written representation: Construction Compound L-10 and the effect on our home
I live at [redacted] with regards to Construction Compound L-10, shown on Sheet 25 of the Works Plans [APP-014 I object to a compound of this size positioned close to any residential properties, there is land opposite the chosen location which is industrial use and on nearby Highbridge Farm which is within a few hundred metres. Both are alternative options.
Construction traffic and road safety on the B3335
Southern Water forecasts the following for L-10 (its report, Table 1, drawn from the Framework Construction Traffic Management Plan [APP-414]):

Vehicles	Average two-way trips per day	Peak two-way trips per day
Light goods vehicles	119	260 (for 4 months)
Heavy goods vehicles	19	75 (for 4 months)

The works would last 17 months. All HGVs would travel from M3 Junction 11 along the B3335, the road is already a very busy road with a speed limit of 60 mph, the road regularly floods and there is a staggered junction which is a known accident area.
HGV should have restrictions outside school and peak hours and a reduced speed limit.
Working hours, noise and night working Standard hours would be 07:00 to 19:00 on summer weekdays, 07:00 to 17:30 in winter and 07:00 to 17:00 on Saturdays. Overnight, Sunday and bank holiday working may be needed for tunnelling. We feel there should be no night, Sunday or bank holiday working without advance notice to residents.
We have never received a letter from Southern Water about the compound, its location and impacts on us. we therefore did not submit a Relevant Representation by August 2026. I ask the Examining Authority to accept this representation.
Yours sincerely
Stephen & Liza Moore
