Submission ID: SC4D8DA61

Further to my previous comments regarding the proposed complete decimation of my life and home and Southern Water having failed to provide any acceptable suggestions to how I will manage 5 horses with no paddocks, I would also like to address the issue of time scale. I have noted from the documentation sent to me that a time scale is very open ended. I have read numerous reports from people similarly affected by the installation of oil pipes, who have had their land left in a state of disruption and chaos for around 2 years when the suggested duration was 4-6 weeks. If this project goes ahead, I feel very strongly that there should be a legally binding time limit set to carry out the work on privately owned property. This is people's lives and homes being ruined and the work should be completed promptly and the property restored quickly. Vague indications of possible duration which can be ignored simply is not good enough.
Also, with boundary fences and locked gates being removed I would like to know what insurance provision for damage and theft by third parties will be in place. Similarly, my horses would also require insurance cover as they could become stressed and suffer injury or illness.
On a different note I would like to point out that as an affected member of the public, I have not been consulted on this project from the consumers point of view and from what I heard at the meetings held at Lee on Solent recently I do not consider the water will be safe and I do not want to have it coming out of my taps.
