Submission ID: SBDD224FB

The Rule 6 letter asked people with shared concerns to choose speakers to cover each topic and avoid repetition. Water Matters Community, SOSCA and Andrew Newbery did that, and told the ExA so in PDA-027. We all also support the submissions made at the hearings by Havant Friends of the Earth, Havant Climate Alliance and Chris Stanley as Chair of Rowlands Castle Parish Council. We hope this assists the examination.
Please note that I have seen drafts of and support the following documents that I expect others to submit ahead of Deadline 1:
01. Summary of RR-354 by Water Matters
02. Summary of RR-294 by SOSCA
03. My summary of RR-018 - attached
04. Water Matters' written submission addressing SW's hearing comments on the use of the term 'recycled effluent'
05. Water Matters' and others submission on PM1
06. Water Matters' and others submission on OFH1
07. Water Matters' and others submission on ISH1 - water environment
08. Water Matters' and others submission on other RRs etc
09. Water Matters' submission responding to ExA's specific question on Alternatives
