Submission ID: SCD5F8432

As 'Leader of the Independent and Green Group' at Winchester City Council, a Trustee and member of 'Winchester Action on the Climate Crisis (WinACC)', and a member of the 'Institute of Sustainability and Environmental Professionals (ISEP)', I continue to object to the proposed scheme.
My objection is not to improving water security, but to the failure to demonstrate adequately that this scheme is necessary, proportionate, environmentally sustainable and cost-effective, when less damaging alternatives exist.
