1 Introduction

1.1 Overview

1.1.1 This document sets out the response by Southern Water Services Limited (hereafter referred to as 'the Applicant') to the Relevant Representations (RR) submitted in relation to the Hampshire Water Transfer and Water Recycling Project (hereafter referred to as 'the Project').

1.1.2 A detailed description of the Project can be found in Environmental Statement (ES) Chapter 3 Description of the Proposed Development [APP-080]. The Application Glossary [APP-007] sets out the abbreviations and definitions used in the DCO application for the Project.

1.1.3 The Applicant submitted the DCO application on 21 May 2026, which was formally received on 28 May 2026, and the Planning Inspectorate accepted the application for examination on 25 June 2026. The window for Interested Parties (IPs) to submit Relevant Representations (RRs) for the Project opened on 13 July 2026 and closed on 24 August 2026, as explained in the section 56 notice. The RRs were published on the Planning Inspectorate website on 28 August 2026.

1.2 Purpose of this document

1.2.1 The purpose of this document is to provide a guide to the Applicant's response to RRs. Rule 3 of the Infrastructure Planning (Examination Procedure) Rules 2010 and the Rule 8 letter [PD-006] require written comments be provided on any RRs.

1.2.2 This document explains the methodology applied by the Applicant in the review, organisation and analysis of RRs. It describes the thematic framework used to categorise and respond to the issues raised and provides an index of all RRs to enable IPs, the Examining Authority and other stakeholders to identify individual representations and navigate efficiently to the Applicant's corresponding responses. The document is intended to provide a transparent and consistent explanation of how RRs have been considered and addressed.

1.2.3 New guidance published on 3 July 2026, Ministry of Housing, Communities and Local Government (MHCLG) (2026) Guidance on the pre-examination stage of an application states that a RR is 'a crucial element' of the pre-examination process because it is the mechanism by which a person or organisation can become an IP and participate formally in the examination of an accepted DCO application. RRs are also the means by which IPs set out their principal submissions on a project.

1.2.4 The Planning Inspectorate published 361 RRs and an additional 12 were accepted at the discretion of the Examining Authority. The total number of relevant representations received was 373 from the following IPs:

- Local authorities
- Parish councils
- Statutory consultees

- Members of the public/businesses

1.2.5 All RRs have been reviewed and considered by the Applicant.

1.3 Relationship with other application documents

1.3.1 The Applicant's response to RRs should be read alongside the other application documents which contain details of stakeholder engagement and issues raised during the development of the Project. The Consultation Report [APP-029] summarises the feedback received during the pre-application stage and explains how the Applicant considered and responded to the feedback. The Statement of Engagement [APP-072] records stakeholder engagement undertaken through the development of the Project. The Applicant submitted a suite of draft Statements of Common Ground (SoCGs) [APP-059] to [APP-071] as part of the DCO application. These documents reflect the position reached through engagement with stakeholders at the point of submission. The Applicant intends to update the draft SoCGs and submit these to the Examination Authority at the appropriate stage of the process.

1.3.2 Engagement with stakeholders has continued following submission of the application and throughout the pre-examination stage. Therefore, RRs may reflect a progression on specific positions which have been discussed between the Applicant and the relevant IP.

1.4 Structure of the response documents

1.4.1 To aid readability, the Applicant has divided its response to RRs into three parts based on stakeholder type, in addition to this guide document. These reports are as follows:

- The Applicant's guide to responses to Relevant Representations (Document reference 8.4, Volume 8, Version 0) (this document)
- The Applicant's responses to Relevant Representations from local authorities, parish councils and statutory consultees (Document reference 8.5, Volume 8, Version 0)
- The Applicant's responses to Relevant Representations from persons with an interest in land (Document reference 8.6, Volume 8, Version 0)
- The Applicant's responses to Relevant Representations from members of the public and businesses (Document reference 8.7, Volume 8, Version 0)

2 Relevant Representation processing methodology

2.1 Introduction

2.1.1 This chapter sets out the process undertaken by the Applicant for collecting, organising, coding and analysing RRs received for the Project. The process ensured that issues raised by IPs were captured accurately, categorised consistently, and addressed through a clear and proportionate process. The following steps describe how RR data was collected from the Planning Inspectorate website, organised by stakeholder type and topic, coded against themes, analysed to identify common issues, and translated into the response documents.

2.2 Declaration of the use of artificial intelligence

2.2.1 In accordance with the Planning Inspectorate (2024, updated 2026) Use of artificial intelligence in casework evidence guidance, this section provides a declaration of, and explanation for, the Applicant's use of digital and AI-assisted tools in the preparation of its responses to RRs.

2.2.2 The Applicant used a combination of digital automation and AI-assisted tools to support the administration, organisation and analysis of RRs received during the RR stage of pre-examination.

2.2.3 A digital automation tool was used to collect and compile RRs published on the Planning Inspectorate's website and to prepare them for subsequent analysis.

2.2.4 AI-assisted tools were used to support:

- The segmentation of RRs into constituent paragraphs and sentences to facilitate review and analysis.
- The identification, coding and grouping of issues raised within RRs and the assignment of thematic categories.
- The preparation of thematic summaries presented in The Applicant's response to Relevant Representations from members of the public and businesses (Document reference 8.7, DCO Volume 8, Version 0). Further information regarding the thematic summaries is provided in section 2.6 of this document.

2.2.5 At each stage of the process, outputs were reviewed and verified by members of the Project team to ensure that they accurately reflected the content of the original representations. The Applicant's substantive responses to RRs were prepared and reviewed by the relevant technical specialists in the Project team and were not generated by AI-assisted tools. The Applicant remains responsible for the accuracy, completeness and content of all submissions.

2.3 Response approach

2.3.1 The response approach was determined according to the stakeholder group and the nature of the issues raised. The Applicant adopted a hybrid response approach that combined individual 'as received' responses and responses to thematic summaries. For RRs from local authorities, parish councils and statutory consultees, and from persons with an interest in land, individual responses were considered most appropriate by the Applicant and were therefore responded to 'as received'. Representations from members of the public, businesses and non-statutory organisations were responded to in the form of thematic summaries, where multiple RRs raised the same or substantially the same issues.

2.4 Data collection

2.4.1 Once the relevant representations had been published, the Applicant developed a web-scraping tool which collected all the RR data from the Planning Inspectorate website. A random, manual check of 10% of RRs was undertaken to ensure the web scrape had extracted all the data form the Planning Inspectorate website. Many RRs also contained attachments which were manually extracted and checked.

2.5 Data organisation

2.5.1 RRs were first organised by stakeholder type. This enabled the Applicant to identify the appropriate response document and determine whether the representation would be responded to individually or through thematic summaries. Once assigned to a stakeholder group, representations were segmented into individual comments according to the topics discussed within them. Each segmented comment received a unique reference derived from its original RR reference to ensure traceability.

2.6 Theme assignment and coding

2.6.1 Each segmented comment was assigned a theme. The theme structure was based on the coding framework developed during pre-application consultation and included within Consultation Report Appendix F – Statutory Summer 2024 Consultation – 6 of 7 documents [APP-047].

2.6.2 As per the declaration, digital and AI-assisted tools were used to assign a theme to each segmented RR using keywords from the Project's issues log, which records matters raised through engagement with stakeholders and formed the basis of SoCGs and pre-application statutory consultation. The tool used these keywords to assign an initial theme to each segmented comment.

2.6.3 The theme assignments were manually reviewed by the Project team to ensure accuracy and consistency of the theme assignment.

2.7 Thematic analysis

2.7.1 The thematic analysis stage applied solely to RRs submitted by members of the public, businesses and non-statutory organisations. Segmented RRs assigned to the same theme were considered together. Comments were summarised at issue level where they raised the same or substantially similar matters and where the Applicant's response would be materially the same.

2.7.2 The level of detail in each summary reflected the nature, frequency and complexity of the issues raised. Materially different or location-specific issues were retained as separate summaries where they required different Applicant responses.

2.7.3 AI-assisted processes supported the preparation of the initial thematic summaries. The Project team manually compared and reviewed all segmented RRs assigned and corresponding to each thematic summary to ensure that all points raised in RRs had been considered by the Applicant.

2.8 Report production and quality assurance

2.8.1 Following completion of coding and, where applicable, thematic analysis, the outputs were transferred into the relevant response report.

3 Theme definitions

3.1.1 Table 3-1 lists the themes and their definitions used to code the RRs. The coding table in the Consultation Report Appendix F – Statutory Summer 2024 Consultation – 6 of 7 documents [APP-047] provided a base of themes for coding the RRs. As the Project has progressed since the pre-application consultations were undertaken, the Applicant made the following amendments:

- Added a new 'Greeting' theme.
- 'Preliminary design principles' was amended to 'Design principles' to reflect the stage of the Project.
- Removed 'Project legacy and benefits' as a separate theme to combine it with 'Need case'.
- Removed 'The process of developing the proposed pipeline routes' as a separate theme to combine it with 'Location of the proposed pipeline routes'.

Table 3-1 Theme definitions

Theme	Description	Reference
Air quality and odour	Comments on air quality and odour impacts on human and ecological receptors, as reported in the ES Chapter 6 Air quality (Document reference 6.1, DCO Volume 6, Version 1).	AQO
Alternatives	Suggestions of other solutions instead of water recycling and water transfer to meet the need. Alternative technologies and solutions include rainwater capture, demand reduction, reservoirs, desalination and other suggestions.	ALT
Archaeology and cultural heritage	Comments on archaeology and cultural heritage including impacts on designated heritage assets (including scheduled monuments, listed buildings, conservation areas and registered parks and gardens) and non-designated heritage assets, as reported in ES Chapter 7 Archaeology and cultural heritage [APP-086].	ACH
Attitudes to water recycling	Where IPs express an opinion or attitude towards the advance treatment techniques to turn treated wastewater into purified recycled water. This includes the overall acceptability of purified recycled water as a source of drinking water.	WRA

Theme	Description	Reference
Carbon and climate change	Comments on the energy needed to operate the Water Recycling Plant (WRP). In addition, potential impacts from carbon emissions during construction and operation, as reported in ES Chapter 10 Carbon and climate change [APP-089].	CCC
Construction compound location	Comments on the siting of proposed construction compounds.	CCL
Construction impacts and effects	Comments on construction methods including trenched open cut, trenchless method, and tunnelling method. Comments on engagement, site access, required working widths, and mitigation proposed during construction.	CIE
Consultation	Comments on the adequacy of pre-application consultation, the quality of the consultation materials, promotion, effectiveness of the in-person consultation events.	CON
Cumulative effects	Combined impacts with other schemes, cumulative environmental impacts, cumulative health impacts, and combined impacts on the wider road network, as reported in ES Chapter 20 Cumulative and in-combination effects [APP-099].	CEF
Design of AGP	The design of the AGP including access and visual design.	DAGP
Design of the WRP	Feedback on how the WRP is designed, including the access and visual design.	DWRP
Design principles	Suggestions and comments on the design principles.	DP
EIA approach and methodology	The EIA process, and the production of the ES, surveys, the EIA Scoping Opinion, the Commitments register, and engagement with prescribed environmental bodies.	EIAA
Equality Impact Assessment	Comments pertaining to the Equality Impact Assessment (Document reference 7.13, DCO Volume 7, Version 1).	EQIA

Theme	Description	Reference
Greeting	The beginning and/or end of a RR, including but not limited to, an IPs name, address or description of said IP. RRs assigned to this theme are deemed not directly relevant to the Project or a particular theme.	N/A
Interface with the Applicant's existing infrastructure and assets	How the Project would interface with the Applicant's existing infrastructure and assets, including Eastney Long Sea and Eastney Transfer Tunnel, Otterbourne Water Supply Works, and Budds Farm Wastewater Treatment Works.	ISWI
Land quality and ground conditions	Comments on sources of contamination and impacts on environmentally sensitive areas including geology and groundwater, as reported in ES Chapter 11 Land quality and ground conditions [APP- 090].	LQGC
Land use and agriculture	Comments on the assessment of impacts on commercial and residential property, agricultural land, and development land, as reported in ES Chapter 12 Land use and agriculture [APP-091].	LUA
Landowner engagement	This includes comments on compulsory acquisition, property valuation, compensation, landowner soil handling, landowner drainage, and engagement with landowners.	LEN
Landscape and visual	Comments on vegetation removal (includes trees), lighting from construction activities, visual effects on sensitive receptors as reported in ES Chapter 13 Landscape and visual [APP-092].	LVIA
Legislation, policy and permits	Comments on planning and environmental policy and legislation, including the Section 20 Agreement with the Environment Agency (EA), the Environmental Permitting (England and Wales) Regulations 2016, the Water Environment (Water Framework Directive) (England and Wales Regulations 2017), the Water Resources Southeast Regional Plan, the National Policy Statement, and the Conservation of Habitats and Species Regulations 2017 (as amended).	LPP
Location of Above Ground Plant (AGP)	The siting of all AGP, which collectively refers to the proposed Intermediate Pumping Stations,	LAG

Theme	Description	Reference
	Break Pressure Tanks and High Lift Pumping Station.	
Location of the proposed pipeline routes	Where an IP provides a comment on one or more sections of the proposed pipeline routes, the amount of land required for specific routes and the impact of proposed pipeline routes.	PPR
Location of the WRP	The location of the WRP at site 72, land 300m northwest of the Budds Farm Wastewater Treatment Work, north of Harts Farm Way, south of the A27 and west of the Hermitage Stream.	LWRP
Major accidents and disasters	Comments on how the Project could be affected by or contribute to major accidents or natural disasters, as reported in ES Chapter 14 Major accidents and disasters [APP- 093].	MAD
Marine biodiversity	Marine biodiversity, including impacts on marine biodiversity (habitats and species) and fisheries, as reported in ES Chapter 9 Marine biodiversity (Document reference 6.1, DCO Volume 6, Version 1).	MBIO
Need case	The need for the Project and addressing the water supply challenge in Hampshire, as well as comments on potential national, regional and local benefits of the Project, and its legacy.	NC
Noise and vibration	Comments on noise and vibration impacts of the Project on people and structural damage due to vibration emissions, as reported in ES Chapter 15 Noise and vibration [APP-094].	NAV
Portsmouth Water proposal	The separate planning application for Havant Thicket Reservoir, Portsmouth Water's combined tunnel option and the working relationship between the Applicant and Portsmouth Water.	PWP
Principle of development	The IP's overall view of the Project. This could be when a respondent supported the Project overall or if they objected to the principle of it.	POD
Project finance and cost	How the Project would be financed and how the cost could impact customers. Themes also included the perceived benefit to shareholders and the value for money of the Project .	PFC

Theme	Description	Reference
Project timescales and programme	Comments relating to the construction timeline and the consenting timetable.	TPP
Public Rights of Way (PRoW)	Comments relating to PRoW (includes footpaths and bridleways) effects, and diversions for walkers and cyclists, as reported in ES Chapter 18 Traffic and transport [APP-097].	PRW
Resources and waste management	Comments on the safeguarding of mineral resources and effects on landfill capacity, resources and waste management licenses and responsible waste management, as reported in ES Chapter 16 Resource and waste management [APP-095].	RWM
Socio-economic, tourism and health	Comments on access to recreational grounds during construction, job creation, impacts on employment and the local supply chain, Havant Thicket Reservoir as a recreational space, and impact on community wellbeing and mental health, as reported in ES Chapter 17 Socio-economics tourism and health (Document reference 6.1, DCO Volume 6, Version 1).	STH
Terrestrial and freshwater biodiversity	Comments relating to the potential impact on terrestrial and freshwater biodiversity, including designated sites, habitats, protected and notable species, and Invasive Non-Native Species (INNS), as reported in ES Chapter 8 Terrestrial and freshwater biodiversity (Document reference 6.1, DCO Volume 6, Version 1). Comments relating to the Habitats Regulations Assessment - Stage 2 Appropriate Assessment and Marine Conservation Zone - Stage 1 Assessment [AS-012], Biodiversity Gain Plan [APP-426] and the Environmental Net Gain Statement [APP-427].	TFB
The Applicant's wider operations and Project interfaces	Comments on the trust and reputation of the Applicant, existing wastewater operations and the Applicant's wider Net Zero Plan.	WSWO

Theme	Description	Reference
The draft Development Consent Order (DCO)	Comments relating to the draft DCO [APP-023] and its content, including Schedules and Articles, and its relationship with the Planning Act 2008. Comments relating to the Explanatory Memorandum to the Draft Order [APP-024] are also included within this theme.	DCO
The process of developing the Project	The overall process undertaken to develop the design of the Project considering a range of technical, planning, social and environmental criteria.	PDP
The water recycling process	How the water recycling process would work within the WRP.	WRPR
Traffic and transport	Comments on construction traffic access routes, movements of heavy Goods Vehicles (HGVs), effects of construction traffic on local communities, including delays and severance, accident and safety measures, as reported in ES Chapter 18 Traffic and transport [APP-097]. Comments on sustainable travel and construction traffic management plans.	TTR
Use of Havant Thicket Reservoir for the storage of recycled water	The principle of using Havant Thicket Reservoir for the storage of recycled water and mixing this with spring water. In addition, any commentary on Havant Thicket Reservoir's proposed other uses.	UHTR
Water environment	Comments on water quality modelling and investigations, and potential impacts on the water environment including Riders Lane Stream, Hermitage Stream and Langstone Harbour, as reported in ES Chapter 19 Water environment (Document reference 6.1, DCO Volume 6, Version 1). Other topics include groundwater, surface water, flood risk, river and stream health, discharges into chalk water streams, pollution prevention and water release through washout valves.	WEN
Water quality at Havant Thicket Reservoir	Comments regarding water quality at Havant Thicket Reservoir, including modelling results, contaminants and parameters and monitoring, as reported in ES Chapter 19 Water environment	WQH

Theme	Description	Reference
	(Document reference 6.1, DCO Volume 6, Version 1).	
Wider water industry challenges	This includes comments regarding the relationship between the water industry and government, public discontent with the water industry and the handling of wastewater.	WWIC

4 RR index

4.1 How to use the relevant representation index

4.1.1 Table 4-1 includes the RR reference, the IP name, the response document and the Book of Reference (Document reference 4.3 DCO Volume 4, Version 1) plot number, where applicable. The index can be used to locate the Applicant's response to RRs.

Table 4-1 RR index

RR number	Interested Party	Response document reference	Book of Reference plot number
