An EIA Scoping Boundary has been adopted for the purposes of seeking input as to how the environmental assessment of the Proposed Development will be carried out and is included on a number of the Figures presented in Volume 2 of this EIA Scoping Report. These Figures are not consenting/planning application plans. The EIA Scoping Boundary is wider than the final DCO limits (red line) for the application. Inclusion in this EIA Scoping Boundary does not mean that any feature or individual building is anticipated to be affected by physical works, please see the project description for detail. Existing buildings and other identified constraints, will be excluded from the DCO limits (red line) where possible. The DCO limits as refined will be published and consulted on in the next stage of public consultation (currently expected to be Q4 2025/ Q1 2026).

- supplied by the Forestry Commission. © Crown copyright and database right 2022 Ordnance Survey 100021242.
- 4. Zone of theoretical Visibility (ZTV) has been generated using OS Terrain 5 – 5m Lidar Digital Terrain Model which does not consider the screening effects of vegetation buildings or other structures. Existing Buildings have been incorporated into the DTM from OS Map Local with an assumed height of 7.5m. Woodland from the National Forest Inventory has also been incorporated into the DTM with an assumed height of 10m. ZTV is based upon a grid of points at 50m apart within the Site Footprint at a height of 15m, with an observer height of 1.6m. All heights mentioned are above ground level (AGL) unless otherwise specified.
